

FY11 energy slogan: Think Green, Build Green, Fly Blue

Please note that our goal for FY11 is 18% reduction in energy usage (BTU/SF) and we need your help to meet that goal.

Energy Tips:

1. Buy only Energy Star appliances and equipment for the government.
2. Infrared heaters in the shops and hangers should be set at no higher than 65 degrees occupied and 55 degrees unoccupied.
3. Close shop and hanger doors as soon as possible when moving aircrafts and equipment.
4. Turn off lights when you leave the office and your building.
 - The buildings are designed to have a minimum amount of lighting for safe egress.
5. Set back thermostats when leaving your building to 55 to 65 when the space is not occupied.
6. Turn off computers when leaving for the weekend.

Report wasteful energy usage to 678-655-4810 or 3537.

Thanks for your cooperation & support!
