## Memorandum

To: SAFER Users  
From: FMCSA Technical Support Project Manager  
Date: May 19, 2004  
Subject: Release of SAFER Version 4.4.1

The following changes were implemented in FMCSA Safety and Fitness Electronic Records system (SAFER) Version 4.4.1 on May 11<sup>th</sup>, 2004.

1. Defect (CR34) – This version of SAFER will correct a defect in the EDI Vehicle Sendlist caused by data incompatibility between the EDI and XML data.
2. Defect (CR59) - This version of SAFER will correct a defect in the SAFER ELQ Service to ensure that the post crash violation flag of the inspections will be processed by SAFER.
3. Defect (CR60) - This version of SAFER will correct a defect in SAFER XML service that caused Oracle error “ORA-00001: unique constraint violated for transponder ID” to occur when processing T0024 XML input transaction (E-Screening).
4. Defect (CR66) - This version of SAFER will correct a defect in the SAFER XML Service that caused Oracle error “ORA-01400: cannot insert NULL into LICENSE\_SEQ\_NUMBER” to occur when processing T0022 (Vehicle Registration) input transactions.
5. Defect (CR87) - This version of SAFER will correct a defect in the SAFER XML Logging Function that the number of records received and applied does not match and there are no error messages about the records violating business rules under some conditions.
6. Enhancement (CR88) – This version of SAFER will correct a defect in the SAFER XML Logging Function to log the schema validation errors in the sub-transactions into the transaction log files when processing T0022 input files. In addition, the status of the processing will be correctly reported as Failure under these circumstances.

7. Enhancement (CR91) – This version of SAFER will correct a defect in the XML Service that failed to generate T0028 output transaction files due to NULL value of IRP\_BASE\_COUNTRY. It will also correct a defect that produces duplicate vehicle registration records in T0028 output.
