WSR-88D Confined Space Entry Permit

Mod Note 145 placed a Confined Space Entry Permit Required During Calibration sign on the hatch door going into the radome. Based on a Job Hazard Analysis performed on June 15, 2012, and subsequent approval from the DOC Legal Office on June 22, 2012, and NWSEO concurrence on July 24, 2012, the radome is now classified as a non-permit required confined space. Mod Note 154 (TCTO and EEM Numbers to follow) will remove the sign from the hatch door. To view the above documents, please go to the ROC Web page using the following URL: <http://www.roc.noaa.gov/WSR88D/SafetyandEnv.aspx?1>

The following technical manual changes will reflect the confined space changes:
EHB 6-510, Preliminary, Change 4
EHB 6-510, Rev 0, Change1
