

OCT 26 2012

MEMORANDUM FOR RECORD

SUBJECT: EM 1110-2-1304, Civil Works Construction Cost Index System, Appendix A Amendment Approval.

1. Office Memorandum (OM) 25-1-51, paragraph 15.d. delegates approval authority for amendments to appendices of publications (regulation, manual, or pamphlet--signed by the HQUSACE Chief of Staff) that contain engineer/technical instructions, which on occasion require amendments, to division chiefs of the originating offices.
2. The appendix to Engineer Manual (EM) 1110-2-1304, Civil Works Construction Cost Index System (CWCCIS), provides technical instructions based upon tables and examples that are updated, each year in March and September, with the most current data available to develop historical and forecasted cost indexes for use in escalating United States Army Corps of Engineers civil works project costs.
3. Amendment #1 which updates tables and examples in Appendix A to indices that are current as of 30 September 2012 is hereby authorized.
4. The proponent for this Engineer Manual is Raymond Lynn, CECW-CE, 202-761-5887; points of contact for the appendix are Kim Callan, CECW-CE, 509-527-7511 and John P. Skarbek, CENWW-EC-X, 509-527-7514.

# Civil Works Construction Cost Index System (CWCCIS)

CECW-EC

DEPARTMENT OF THE ARMY  
U.S. Army Corps of Engineers  
Washington, DC 20314-1000

EM 1110-2-1304

Manual  
No. 1110-2-1304

31 March 2012

Engineering and Design  
CIVIL WORKS CONSTRUCTION COST  
INDEX SYSTEM (CWCCIS)

1. Purpose. This engineer manual (EM) is to provide historical and forecasted cost indexes for use in escalating United States Army Corps of Engineers (USACE) civil works project costs.
2. Applicability. This EM applies to all USACE commands having civil works design cost responsibilities.
3. Distribution Statement. Approved for public release, distribution is unlimited.
4. References.
  - a. ER 1105-2-100, Guidance for Conducting Civil Works Planning Studies.
  - b. ER 1110-2-1302, Civil Works Cost Engineering.
  - c. EP 1110-1-8, Construction Ownership and Operating Expense Schedule.
  - d. Corps of Engineers Civil Works Direct Program – Program Development Guidance for applicable fiscal year.
5. Availability. The complete text with updated cost index tables is available at the official HQUSACE documents webpage at [www.usace.army.mil](http://www.usace.army.mil). Select "Library" and then select "Publications." The document is provided in Portable Document Format (PDF).
6. Policy. Engineer Regulations, specifically ER 1110-2-1302 and ER 1105-2-100, require this EM be used to update unit prices and other various project costs to current or forecasted price levels. Before using cost indexes to update project costs, check to ensure there have been no changes in the project design, schedule, and USACE policy. The recommended procedure is to re-estimate project costs using current labor, equipment, and material rates at least every two years and use indexed values to escalate for inflation during the interim. Using index values to update project costs more than two consecutive years is not recommended.

---

This Engineer Manual supersedes EM 1110-2-1304, dated 31 March 2000.

7. Use. The indexes presented in this manual are specifically designed for Civil Works construction, and are specific for each of the major Civil Works features. Only indexes for construction costs have been developed. The indexes are used to escalate or inflate various project cost features to current or future price levels. There are state adjustment factors included in this manual that allow a project estimated in one state to be adjusted to a project in another state.

8. Basis. A cost index is a ratio between composite costs at one period of time compared to the same composite cost at the base year. The index number thus indicates the change in cost between the base year and the later date. The base year for this manual is 1967; this year is the same base reference point used by several of the index sources.

9. Escalation of Project Costs. For programming and budget preparation purposes, project costs are escalated for inflation. Indexes used to escalate costs from the past to the present are developed from actual historic data. Indexes for future escalation are developed using the “Updating Factors” in Table 1, of the EC, Corps of Engineers Civil Works Direct Program – Program Development Guidance which are based on the current annual Office of Management and Budget (OMB) inflation factors.

10. Index Tables and Examples. An explanation of each index table and an example of how to use the indexes are included in the Appendix. The cost index tables will be updated each year in March and September.

11. Reliability. The user is cautioned that these index tables are made of historic indexes and projected indexes based on Office of Management and Budget (OMB) inflation factors. While the historic projections are reliable to update project costs, forecasting beyond two years may be unreliable.

12. Development of Cost Indexes and State Adjustment Factors.

a. Historical Basis. The basis for the development of these indexes was derived from over 80 detail government estimates. These estimates were used in developing the weighted relationship of labor, equipment, and material costs for various types of projects. This weighted relationship was used to develop a composite index for the various projects.

b. Civil Work Breakdown Structure (CWBS) Feature Code. The CWBS Feature Code can be found in ER 1110-2-1302. Civil Works cost estimates are summarized by the feature code levels listed in this and supporting documents. The feature code indexes listed in this manual were developed using the weighted relative costs taken from the 80 cost estimates. However, Feature 12, Navigation Ports & Harbors, was prepared using a weighted composite of: marine equipment cost, diesel fuel cost,

operating labor cost, and Facilities Capital Cost of Money only and did not use historical cost estimates.

13. Sources Used for Cost Indexes and State Adjustment Factors.

a. Sources Used to Develop Indexes. In developing the cost indexes, data for actual labor, equipment, and materials, are obtained from several sources. The data that makes up the indexes come from the following sources.

b. OMB Updating Factors. The yearly and quarterly projected cost indexes are forecasted several years into the future based on the updating factors provided by OMB. They are published each year in Table 1 of EC, Corps of Engineers Civil Works Direct Program – Program Development Guidance.

c. Producer Price Indexes (PPI). These historic indexes are the basis of the equipment and material resource portion of the cost indexes. The Bureau of Labor Statistics (BLS) prepares these indexes.

d. RS Means, Labor Rates for the Construction Industry and Building Construction Cost Data. The construction labor rate portion of the cost indexes is based on the “Average Historical Labor Rates for 30 Major Cities” for building construction trades wage rates. This data is published annually by R.S. Means Company.

e. Engineering News Record (ENR), Quarterly Cost Reports. The “20-City: Construction Cost Index” (CCI) is used to calculate the combined dredging index and “20-City: Builders Construction Index” (BCI) is used to calculate the cost indexes. The indexes are published quarterly by ENR magazine.

f. Bureau of Reclamation Construction Cost Trends. The “turbines and generators” index in this publication is used in the calculation of the cost indexes for Feature Code 07, Power Plants. This index is published quarterly by the Bureau of Reclamation.

g. EP 1110-1-8, Construction Equipment Ownership and Operating Expense Schedule. The equipment costs from this publication are used to develop the equipment element part of the state adjustment factors. The U.S. Army Corps of Engineers publishes this pamphlet every two years.

h. RS Means, Heavy Construction Cost Data. The “City Cost Index” installation labor index and materials index are used for the labor and materials portion of the cost indexes. This data is published annually by R.S. Means Company.

i. Cost of Money Rate (CMR). The CMR is used to develop the interest rate in the calculation of the cost indexes for Feature Code 12, Navigation Ports & Harbors. The

EM 1110-2-1304

31 Mar 12

Department of the Treasury adjusts the CMR (Prompt Payment Interest Rate) on or about 1 January and 1 July each year; these revisions are printed in the Federal Register.

14. Assistance. If assistance is required in understanding the methodology, or in obtaining updates of the cost index tables, contact the Chief, Cost Engineering Branch, CENWW-EC-X, U.S. Army Corps of Engineers, Walla Walla District, (509) 527-7510.

FOR THE COMMANDER:

Appendix A  
Instructions for Adjusting  
Costs Using Tables

DIONYSIOS ANNINOS  
Colonel, Corps of Engineers  
Chief of Staff

## APPENDIX A

### Instructions for Adjusting Costs Using Tables

A-1. Table Assumptions. Tables A-1 and Table A-2 are prepared by fiscal year (beginning 2 October, ending 30 September/1 October) with the indexes based on the first day of each quarter. These tables provide an acceptable means of updating existing project costs. For computation purposes, CWCCIS uses 1967 as the base year with an assigned value of 100.00.

a. TABLE A-1, Quarterly Cost Index by CWBS Feature Code. Table A-1 displays indexes on a quarterly basis for more exact short-term and long-term escalation. Table A-1 will be updated twice each year. See Figure A-1, How to Update/Escalate by Quarterly Indexes.

b. TABLE A-2, Yearly Cost Index by CWBS Feature Code. Table A-2 displays indexes on a yearly basis for long-term forecasting. These indexes are developed by averaging quarterly indexes for each year. Table A-2 will be updated twice each year. See Figure A-2, How to Update/Escalate by Yearly Indexes.

c. TABLE A-3, State Adjustment Factors. Table A-3 is prepared on a state-by-state basis. The state areas cost factors are developed from a representative breakdown of labor, materials and equipment. Table A-3 is used to compare or adjust a project cost prepared for a project in one state to a project located in another state. Note that Alaska and Hawaii are not considered in the national average. This table will be updated annually. See Figure A-3, How to Adjust Costs by Using State Adjustment Factors.

d. TABLE A-4, Historical State Adjustment Factors. Table A-4 is historical data. This table is used for information only and displays the last 10 years of state adjustment factors.

A-2. How to Update a Project Cost. Indexes used in any calculation must be from the same table and CWBS Feature Code. Before using a state adjustment factor, update the project costs to the price level of the project cost. The following figures illustrate the use of each of the tables.

A-3. Engineering/Technical Instruction Updates and Approval. The tables and examples in this appendix are updated as follows: updates to Table A-1, Table A-2, Figure A-1, and Figure A-2 occur in March and September; updates to Table A-3, Table A-4, and Figure A-3 occur in March. This amendment is approved by James C. Dalton, P.E., SES Chief, Engineering and Construction Division, CECW-CE, 202-761-8826.

**EXAMPLE COMPUTATION  
USING  
TABLE A-1, Quarterly Cost Indexes by CWBS Feature Code**

The following formula is used for the purpose of updating/escalating an existing project cost.

$$\frac{\text{Cost Index - Quarter A}}{\text{Cost Index - Quarter B}} \times \text{Cost in Quarter B (Known)} = \text{Cost in Quarter A (Unknown)}$$

Cost Index A is the cost index for the Quarter the project costs are updated to.  
Cost Index B is the cost index for the Quarter the project costs are updated from.

Note: Both cost indexes must be from the same Table and Feature Code.

EXAMPLE - Assume the following:

You have a project cost of \$500,000  
Date of the project cost is 1 Nov 2009 (1st QTR FY10)  
Feature Code is 04, Dams - Cost Index is **708.05**

You want to escalate the project cost to 1 Mar 2012 (2nd QTR FY12)  
Feature Code is 04, Dams - Cost Index is **763.32**

$$\frac{\text{FY12 QTR 2 - } \mathbf{763.32}}{\text{(Feature Code 04)}} \times \$500,000 \text{ (1st QTR FY10)} = \text{Cost in 2nd QTR FY12}$$
$$\frac{\text{FY10 QTR 1 - } \mathbf{708.05}}{\text{(Feature Code 04)}}$$

$$\mathbf{1.078} \times \mathbf{\$500,000} = \mathbf{\$539,000}$$

**Figure A-1. How to Update/Escalate by Quarterly Cost Indexes**

**EXAMPLE COMPUTATION  
USING  
TABLE A-2, Yearly Cost Indexes by CWBS Feature Code**

The following formula is used for the purpose of updating/escalating an existing project cost.

$$\frac{\text{Cost Index - Year A}}{\text{Cost Index - Year B}} \times \text{Cost in Year B (Known)} = \text{Cost in Year A (Unknown)}$$

Cost Index A is the cost index for the Year the project costs are updated to.  
Cost Index B is the cost index for the Year the project costs are updated from.

Note: Both cost indexes must be from the same Table and Feature Code.

EXAMPLE - Assume the following:

You have a project cost of \$500,000  
Date of the project cost is 1 Oct 2007 (FY08)  
Feature Code is 04, Dams - Cost Index is **703.25**

You want to escalate the project cost to 1 Oct 2012 (FY13)  
Feature Code is 04, Dams - Cost Index is **774.21**

$$\frac{\text{FY13 - } \mathbf{774.21}}{\text{(Feature Code 04)}} \times \$500,000 \text{ (FY08)} = \text{Cost in FY13}$$

$$\text{FY08 - } \mathbf{703.25} \text{ (Feature Code 04)}$$

$$\mathbf{1.101} \times \mathbf{\$500,000} = \mathbf{\$550,500}$$

**Figure A-2. How to Update/Escalate by Yearly Cost Indexes**

**EXAMPLE COMPUTATION  
USING  
Table A-3, State Adjustment Factors**

The following formula is used to adjust or compare project costs from one state to another.

$$\frac{\text{State Factor for State A}}{\text{State Factor for State B}} \times \text{Cost in State B (Known)} = \text{Cost in State A (Unknown)}$$

State Factor for State A is the factor for the State where the project costs are needed.

State Factor for State B is the factor for the State where project costs were developed.

Note: First, update project costs to the desired year by using Table A-1 or A-2. Then use the state adjustment factor to change the cost to another state. In addition, use Figures 3-1 or Figure 3-2 for methods to compute the escalation.

EXAMPLE - Assume the following:

You have a project cost of \$500,000 developed in the State of Washington,  
Dated or escalated to current FY

Location of the project: Washington State (State B)  
State Adjustment Factor for Washington State is **1.05**

Location of the State for adjustment or comparison: Pennsylvania (State A)  
State Factor for Pennsylvania is **1.08**

$$\frac{\text{PA State - } \mathbf{1.08}}{\text{WA State - } \mathbf{1.05}} \times \$500,000 \text{ (WA)} = \text{Cost in State A (Pennsylvania)}$$

$$\mathbf{1.029} \times \mathbf{\$500,000} = \mathbf{\$514,500}$$

**Figure A-3. How to Adjust Costs Using State Adjustment Factors**
