

CoRIS Place Keyword Thesaurus by Country/Territory - 1/30/2013

Atlantic Ocean

This keyword list contains Atlantic Ocean place names of coral reefs, islands, bays and other geographic features in a hierarchical structure. For example, the first name on the list - Antigua - is part of Antigua and Barbuda. The leading label - COUNTRY/TERRITORY - indicates that place names are preceded by their country or territory. The list is sorted alphabetically. The same names are available from "Place Keywords by Ocean - Atlantic Ocean" but in a hierarchy of ocean, seas and region name. Each place name is followed by a unique identifier enclosed in parentheses. The identifier is made up of the latitude and longitude in whole degrees of the place location, followed by a four digit number. The number is used to uniquely identify multiple places that are located at the same latitude and longitude. For example, the first place name "Antigua" has a unique identifier of "17N061W0001". From that we see that Antigua is located at 17 degrees north (N) and 061 degrees west (W). Its place number 0001 at that latitude and longitude. This is a reformatted version of a list that was obtained from ReefBase.

COUNTRY/TERRITORY > Antigua and Barbuda > Antigua (17N061W0001)
