

AOML EEO Advisory Representative: Erica Rule

[Erica Rule](#)

I am the Communications and Outreach Coordinator for NOAA's Atlantic Oceanographic and Meteorological Laboratory in Miami, Florida. In addition to supporting the Office of the Director, I manage AOML's Technical Editor and the internal and external communications at AOML, including content and design of the laboratory's web site, Congressional interactions, media relations, and educational programming. I also serve as an AOML liaison for various NOAA and OAR offices and represents AOML on two of NOAA's Regional Teams. Locally, I am also a member of the South Florida Federal Executive Board's Public Affairs Committee.

I earned a BS in Biology from Mary Washington College and a Master's degree in Marine Affairs and Policy from the University of Miami's Rosenstiel School for Marine and Atmospheric Science. Originally from northern Virginia, I currently live in Miami, FL with my husband, Lance, and our two children.
