

## What is PTi?

The Phillips Technology Institute, or PTi is part of AFRL and serves the Lab by bringing in collaborative partners from Academia, Industry, and Government and applying AFRL resources (funding, people, and facilities) to develop products that meet both Air Force and partner needs.

The PTi Collaboration Center's Mission is to provide a comfortable, neutral environment to support the nation's professionals in brainstorming, problem solving and creative design.

## How can the PTi Collaboration Center help you?

The PTi Collaboration Center offers modern meeting facilities to collaborative partners. The Center's space is flexible; through the use of folding partitions and movable furniture the center can transform to accommodate your function. It can simultaneously provide individual work space to varying configurations of teams (up to four 10 to 30-person teams). The Center can also operate as a space to conduct courses, or to support large meetings and conferences of up to 260 people.

## Location

The Collaboration Center is located in Building 1900 at Kirtland Air Force Base, near the Air Force Research Laboratory Directed Energy and Space Vehicles Directorates. It is approximately two miles from the Albuquerque Sunport and its surrounding hotels.

## Hours

8am to 5pm Monday through Friday.
