

Completed Projects:

- **Alligator Creek Addition Restoration Project**, Charlotte County, FL.
The Charlotte Harbor National Estuary Program restored 405 acres by backfilling mosquito ditches and restoring the natural hydroperiod of the area.
Project completed - May 2008.

- **Restoration of Submerged Aquatic Vegetation (SAV)** on the Seaside of Virginia's Eastern Shore, Northampton County, VA
The Commonwealth of Virginia and Virginia Institute of Marine Science restored approximately 40 acres of SAV in lagoons along Virginia's eastern shore. Despite a sharp die-off of SAV in the Chesapeake Bay in 2003, restored SAV beds on the seaside of the eastern shore continue to thrive.
Project completed - October 2008.

- **Fort Sheridan Coastal Habitat Restoration Project**, Lake Forest, IL
The Lake County Forest Preserve District restored 74 acres of forested ravine within the Janes Ravine. This project stabilized an eroding area, helping to reduce sedimentation into Lake Michigan. It also removed point source stormwater flow, re-introduced native vegetation, and improved public access.
Project completed - September 2009.
