MILITARY CONSTRUCTION APPROPRIATION BILL, 1996

JULY 19 (legislative day, JULY 10), 1995.—Ordered to be printed

Mr. BURNS, from the Committee on Appropriations,  
submitted the following

**REPORT**

[To accompany H.R. 1817]

The Committee on Appropriations, to which was referred the bill (H.R. 1817) making appropriations for military construction, family housing, and base realignment and closure for the Department of Defense for the fiscal year ending September 30, 1996, and for other purposes, reports the same to the Senate with amendments and recommends that the bill as amended do pass.

Amount of bill passed by House .....	\$11,177,009,000
Amount of Senate bill under the House .....	— 18,014,000
<hr/>	
Total of bill as reported to Senate .....	11,158,995,000
Amount of 1996 budget estimate .....	10,697,995,000
Amount of 1995 appropriations .....	8,735,400,000
The bill as reported to the Senate:	
Over the budget estimate, 1996 .....	+ 461,000,000
Over appropriations for fiscal year 1995 .....	+ 2,423,595,000

## BACKGROUND

### PURPOSE OF THE BILL

The Military Construction appropriation bill provides necessary funding for the planning, design, construction, alteration, and improvement of military facilities worldwide, both for Active and Reserve Forces. It also finances the construction, alteration, improvement, operation, and maintenance of military family housing, including payments against past housing mortgage indebtedness. Certain types of community impact assistance may be provided, as well as assistance to members of the military who face loss on the sale of private residences due to installation realignments and closures. The bill is also the source for the U.S. share of the NATO Security Investment Program. In addition, the bill provides funding to implement base closures and realignments authorized by law.

### COMPARATIVE STATEMENT

The Committee recommends appropriations totaling \$11,158,995,000 for fiscal year 1996 military construction, family housing, and base closure. The following table displays the Committee recommendation in comparison with the current fiscal year, the President's fiscal year 1996 request, and the House allowance:

COMPARATIVE STATEMENT OF NEW BUDGET (OBLIGATIONAL) AUTHORITY

(In thousands of dollars)

Item	1995 adjusted	Budget estimate	House allowance	Committee recommendation	Increase (+) or decrease (-) compared with—	
					1995 adjusted	Budget estimate

## SUMMARY OF THE BILL

The Committee recommends a total of \$11,158,995,000 in new budget authority/appropriations for fiscal year 1996 programs under its jurisdiction. Significant comparisons are noted below:

Fiscal year 1996 budget request: Budget authority .....	\$10,697,995,000
Committee recommendation for fiscal year 1996: Budget authority .....	11,158,995,000
Which is—	
Over the appropriation for fiscal year 1995 by .....	+ 2,423,595,000
Over the budget request by .....	+ 461,000,000
Under the House appropriation by .....	- 18,014,000

## COMPLIANCE WITH SECTION 308 OF THE BUDGET CONTROL ACT

Section 308(a) of the Budget and Impoundment Control Act of 1974 (Public Law 93-344) requires that the Committee include in its report a comparison of its recommendations with levels contained in the first concurrent resolution. Appropriate data are reflected below:

## BUDGETARY IMPACT OF BILL

PREPARED IN CONSULTATION WITH THE CONGRESSIONAL BUDGET OFFICE PURSUANT TO SEC. 308(a), PUBLIC LAW 93-344, AS AMENDED

[In millions of dollars]

	Budget authority		Outlays

Projections of outlays associated with the recommendation:				
1996 .....				2,311
1997 .....				3,310
1998 .....				2,145
1999 .....				1,890
2000 and future year .....				1,114
Financial assistance to State and local governments for 1996 in bill .....	NA		NA	

<sup>1</sup> Includes outlays from prior-year budget authority.

<sup>2</sup> Excludes outlays from prior-year budget authority.

NA: Not applicable.

## COMMITTEE RECOMMENDATION

As previously noted, the Committee is recommending new fiscal year 1996 appropriations of \$11,158,995,000. This is \$461,000,000 over the budget request, \$18,014,000 under the House appropriations, and \$2,423,595,000 over the appropriations for fiscal year 1995. The basis for this recommendation is contained in the following "Items of special interest," and under the discussions pertaining to each individual appropriation. Complete project detail is provided in the tables at the end of the report.

## ITEMS OF SPECIAL INTEREST

### CONFORMANCE WITH AUTHORIZATION BILL

The Committee strongly supports the authorization-appropriation process. However, the Committee has reported the appropriation bill prior to completion of the authorization process. Therefore, the Committee has provided construction funds for specific projects which were included in the Senate-reported version of the National Defense Authorization Act for Fiscal Year 1996 and projects subject to authorization.

### BASIS FOR COMMITTEE RECOMMENDATION

The Committee's 602(b) budget allocation is \$18,014,000 less than the bill passed by the House of Representatives. This allocation, however, includes a transfer of \$161,000,000 from the defense appropriation to the military construction appropriation. This transfer is for the Pentagon renovation.

The Committee has provided only for the highest priority military construction requirements. In order to meet the budget targets, the Committee has phase funded several large projects that cannot be completely obligated in the first year of execution. The Committee has given priority to projects approved by the Senate Armed Services Committee in the national defense authorization bill. It has also added projects which will be subject to authorization.

The Committee has utilized this approach in order to allow for the competition of projects in the House-Senate conference committee. Senators are urged to work with the military services and the Department of Defense to secure funding of priority projects prior to future budget submissions.

### HOUSING FOR OUR SERVICE MEMBERS

The Committee recognizes the need for better barracks for our service members. The three services have a combined estimated deficit of 160,100 barracks spaces. It would cost close to \$8,500,000,000 to remedy this deficit. The Committee supports the efforts being made in the "Real property maintenance" account of the defense appropriation to renovate barracks. This effort is critical at a time when resources are limited. Where possible funds in the military construction accounts for barracks projects are better used for renovation instead of new construction. The Committee directs that funds appropriated in this bill for new construction of barracks be used only for barracks renovation unless the Secretary of Defense certifies that new construction is required. This effort will afford for more barracks and consequently more people experiencing a better standard of living. The Department is directed to

submit reprogrammings to the four appropriate subcommittees to accommodate these changes to the appropriation.

Also, there has been much discussion over the proposed standard known as "1 plus 1." This standard would consist of two rooms with a bath and kitchenette. It would accommodate two enlisted personnel. This includes E-1's through E-4's. E-5's through E-9's would have the two rooms for themselves so that one room could be used as a living room. It is clear that some services have accepted this standard as the norm. The Committee urges the Under Secretary of Defense for Personnel and Readiness to determine a standard for construction of barracks. The Committee agrees with the House language and directs the Department to report on the accepted standard before award of any fiscal year 1996 barracks projects. The Committee also places the same restriction on current and prior year unobligated barracks projects.

#### CHILD DEVELOPMENT CENTERS

The Committee supports the efforts made by the Department to provide child care facilities to the families of service members. The Committee agrees with the House that none of the services are meeting the Department's goal for child care. The Committee also agrees that this shortfall may be significantly understated in the future. The Committee is especially concerned over the availability of care for the Navy. The Committee directs the Navy to program fiscal year 1997 funding for this effort.

#### SOUTHERN COMMAND AREA CONSTRUCTION

As in previous years, the Committee directs the Department to submit a 5-year construction plan for the Southern Command's area of operations by February 15, 1996. The report should include a discussion of all the operations and potential costs being considered by the Department for the relocation of the Southern Command from Panama. In addition, the report should include all construction-related activities which will be associated with counterdrug operations. As in previous years, the report should reflect construction expenditures from all DOD accounts.

In the February report the Department is also directed to include all construction, including construction from exercises, from any source since the beginning of fiscal year 1992. The report should include the project, its cost, justification as to why it was needed, and whether the project is still being used by either U.S. forces or host nation personnel. It should be mentioned whether usage is on a full-time or part-time basis.

#### OVERSEAS CONSTRUCTION

The Committee recognizes the need to continue funding overseas construction projects. The Army and Air Force have substantially reduced the number of installations in Germany and other European countries. The Committee recognizes the need to provide for improvements to the remaining installations overseas. However, the Committee believes that the financing for these projects should come from the host nation.

The Committee believes that any funds received from Germany or other European countries as a payment for the residual value of closed United States military facilities, should be made available to finance the construction of necessary facility improvements at United States military bases remaining in Europe.

The Committee directs that none of the funds in this appropriation may be used to purchase, construct, or lease any nonquality of life facility in Germany unless that facility is purchased, constructed, modified, or leased with funds provided by the Government of Germany as an offset for the value of the facilities returned by the United States Government to the Government of Germany pursuant to article 52 of the status-of-forces agreement with the Government of Germany.

The Committee directs that the Department shall not enter into any legal instrument to purchase, construct, modify, or lease any nonquality of life facility in Germany until the Secretary of Defense certifies to the appropriate committees of Congress that the United States is scheduled to receive cash payments or offsets-in-kind of a value equal to the projects to be constructed.

#### ENVIRONMENTAL COMPLIANCE PROJECTS

The Department has requested \$206,576,000 for environmental compliance project construction during fiscal year 1996. However, there appears to be no consistency or prioritization of projects among the various accounts.

The Committee asks the General Accounting Office to review and make recommendations regarding the potential future requirements for improved DOD environmental compliance, the total cost of compliance, and the DOD process for programming compliance projects. The Committee requests the GAO to report its findings and recommendations by March 1, 1996.

#### 1391 FORMS

The Committee finds that not all of the information which is needed on 1391 forms is being provided. The Committee relies on the details presented in these budget displays to review and support departmental priorities. The Committee expects the Comptroller at the Department to include in DOD Directive 7000.14-R that all 1391 forms must contain a name and phone number of the civil engineer at the installation responsible for the requested project. The Committee directs that this information be provided in one consistent place on the form. This information is needed to facilitate the work of the Committee.

#### BASE REALIGNMENT AND CLOSURE

The Committee has included \$3,897,892,000 for the base closure account. The Committee has fully funded the budget request for the fourth round of base closures recently approved by the Commission on Base Closure and Realignment. This includes full funding of the requirements for environmental cleanup at closing and realigning bases.

The Committee is concerned with the slow pace of obligations of previous appropriations for the base closures. As of April 30, 1995,

\$835,072,000 of the funds appropriated for base realignment and closure, part I remained available for expenditure. Of this amount, \$388,146,000 was unobligated. At the current rate of obligation at least \$200,000,000 would remain unobligated at the end of the current fiscal year. The end of fiscal year 1995 is when the funding of closures for BRAC I are required by law to be completed.

The Committee also recognizes that \$117,167,000 for base realignment and closure, part I has been transferred into the environmental account within part I. The purpose of the fungibility of these accounts was to ease the burden of reprogramming BRAC funding in support of affected communities. The Committee finds that the Department is using this transfer authority for purposes other than what was intended.

The Committee urges the Department of Defense to ensure that the obligation rates for the base closure accounts are improved. Failure to improve obligations will result in reduced appropriations unless the Department can demonstrate an ability to spend the funds provided on a more timely basis.

Also, the Committee is concerned that the financial flexibility the Department has with regard to the base realignment and closure accounts. The Committee believes this flexibility has hindered congressional oversight. The Committee supports appropriate steps that have been taken to reduce the amount of time and redtape necessary to prepare a base for re-use. The Committee, however, is strongly opposed to the inability to ascertain or approve changes made within the base realignment and closure accounts before they have occurred.

Last year the Committee required notification procedures for any change in the use of funds. This requirement was approved by the conferees. The Committee directs that if the Department does not provide timely notification as required by last years conference report the Committee will require reprogrammings procedures for any change to the projects listed in this report for BRAC II, BRAC III, or BRAC IV. For fiscal year 1996, any transfer of funds would then be treated like any other reprogramming within the military construction appropriation.

The Committee asks the General Accounting Office to continue its annual review of the base closure accounts. The Committee requests GAO's review of and recommendations on the validity of DOD's proposed budget requests for base closure activities. In particular, the Committee seeks GAO's assistance in validating the requests for individual construction projects, the operation and maintenance costs, and the environmental cleanup costs associated with base closures and realignments. The Committee believes the annual GAO review will provide the Congress with a better foundation for approving future requests.

#### OTHER ISSUES

*Rescissions.*—The Committee has approved \$55,705,000 in rescissions of prior-year appropriations reflecting military construction for the military services and defense agencies. The rescission recommended in this bill includes the following projects which have contract savings or were previously approved and now are no longer needed:

Military construction:	
Army 1992–96: Red River Army Depot, TX: DLA warehouse ...	\$6,245,000
Air Force 1992–96: Eareckson AFB, AK: Air freight terminal .....	2,765,000
Air Force 1992: Homestead AFB, FL: Airfield operations .....	13,240,000
Reserve components 1994–98: Air National Guard, Idaho training range .....	6,700,000
Defense agencies:	
1991–95: Defense Language Institute, Monterey, CA: Printing plant .....	989,000
1992–96: Defense Language Institute, Monterey, CA: Instruction building .....	6,000,000
1993–97: National Security Agency, Fort Meade, MD: SOUTHWESTER .....	3,590,000
Contingency funds—Worldwide unspecified:	
1991–95 .....	2,245,000
1992–96 .....	800,000
1993–97 .....	5,000,000
1994–98 .....	8,131,000
Total .....	55,705,000

*Base structure report.*—The base structure report was prepared by the Department of Defense to provide information on military installations. It also was used to relate current base structure to the military force structure and identify base operating support costs and efforts to reduce such costs.

The Committee observes that this report has not been recently prepared. Now that the Base Realignment and Closure Commission has had its final hearings, the Committee reminds the Department that under the provisions of section 115 of title 10, United States Code a written report on DOD base structures is submitted annually by the Secretary of Defense to the Congress. The public law calls for the report to identify, define, and group by mission and by region the types of military bases, installations, and facilities. The Committee directs that the report should be prepared and submitted by February 15 of each year.

*Reports.*—The Committee agrees with the need for the reports directed by House Report No. 104–137. The Committee directs the Department to provide a copy of each report requested by the House to the appropriate committees of jurisdiction.

MILITARY CONSTRUCTION, ARMY

Fiscal year 1995:	
Appropriation .....	\$550,476,000
Rescission .....	3,500,000
Net .....	546,976,000
Budget estimate, 1996 .....	472,724,000
House allowance .....	611,608,000
Committee recommendation .....	516,664,000

The Committee is recommending \$516,664,000 for the Army for fiscal year 1996. This is an increase of \$43,940,000 from the budget request for fiscal year 1996 and \$94,944,000 below the House allowance. (See State tables at the end of the report for complete program recommendations.)

*Barracks projects at Fort Bragg.*—The Committee has added projects to construct barracks at Fort Bragg, NC, which will support soldiers of the Special Operations Command. These projects have been included in the Army construction program. The budget authority provided when the U.S. Special Operations Command was established allowed the command to request acquisition of specific material, supplies, or services for special operations forces. The Committee finds nothing specific about barracks and dormitories, family housing, community facilities, or installation infrastructure which would justify the inclusion of such projects in the special operations budget. This type of common support facility requirement should be provided by the military departments in furtherance of their support responsibilities to special operations forces. The Special Operations Command should continue to budget for their own operations, training, equipment maintenance, and storage facility requirements.

*White Sands missile range.*—The Committee supports the building of a new National Range Control Center at White Sands missile range, New Mexico. The Committee has been informed that the current facility does not meet the mission requirements and poses a health threat. Therefore, the Committee directs that the Department include funding for this project in fiscal year 1997.

*Army museum.*—The Committee notes that the Senate Armed Services Committee deleted the requested amount of \$17,000,000 for the Army museum. The Committee supports the need for an Army Museum in the National Capital region. As fewer men and women experience military service, the need for a museum near other attractions in the region takes on greater significance. The Committee urges the Department to promote private fundraising efforts to acquire the needed land as well as construction of the facility. The Committee also urges the Secretary of Defense to consider a parcel of land in the north parking area of the Pentagon Building reservation, as well as locations at Fort Myer.

## MILITARY CONSTRUCTION, NAVY

Fiscal year 1995:	
Appropriation .....	\$385,110,000
Rescission .....	3,500,000
Net .....	381,610,000
Budget estimate, 1996 .....	488,086,000
House allowance .....	588,243,000
Committee recommendation .....	552,586,000

The Committee is recommending \$552,586,000 for Navy and Marine Corps military construction for fiscal year 1996. This amount is an increase of \$64,500,000 from the fiscal year 1996 budget request and \$35,657,000 below the House allowance. (See State tables at the end of the report for complete program recommendations.)

*Fallon Naval Air Station.*—The Committee believes there is an urgent need for a new child development center and expansion of galley facilities at Fallon Naval Air Station. The Committee directs that \$200,000 for planning and design be provided for a child development center and galley facility at Fallon Naval Air Station. The Committee directs that construction funds for these two individual projects be included in next year's budget request.

*Housing offices and self-help centers.*—The Committee's strongly supports the need to provide adequate housing for the enlisted members of the Navy. This concern takes precedent over housing offices and self-help centers. These offices are used infrequently as compared to the use of needed housing. To further this effort, the Committee redirects \$4,947,000 for the construction of housing offices and self-help centers. These funds will be applied to family housing construction improvements.

*Guantanamo Bay landfill.*—The budget included a request for \$18,000,000 for a landfill at Guantanamo Bay, Cuba. This was part of a fiscal year 1995 emergency supplemental request. The Committee finds that the administration's policy on refugees has changed since this request. The Committee denies funding for this project.

## MILITARY CONSTRUCTION, AIR FORCE

Fiscal year 1995:	
Appropriation .....	\$516,813,000
Rescission .....	3,500,000
Net .....	513,313,000
Budget estimate, 1996 .....	495,655,000
House allowance .....	578,841,000
Committee recommendation .....	569,616,000

The Committee recommends \$569,616,000 for the Air Force in fiscal year 1996. This is an increase of \$73,961,000 to the fiscal year 1996 budget request and \$9,225,000 below the House allowance. (See State table at the end of the report for complete program recommendations.)

*Aviano AB, Italy.*—The Committee is concerned over the long-term commitment by the United States for the use of Aviano Air Base. The Air Force is directed to provide the appropriate four com-

mittees with a long-term facilities and mission plan for the base by February 15, 1996.

*Elmendorf AFB, AK.*—Of the \$23,894,000 provided for planning and design within the “Air Force” account, the Committee directs that not less than \$2,700,000 be made available for the design of a C-130 operations and maintenance facility at Elmendorf AFB, AK. The Committee fully expects this design contract to be awarded as early in fiscal year 1996 as practical.

MILITARY CONSTRUCTION, DEFENSE-WIDE

Fiscal year 1995:	
Appropriation .....	\$504,118,000
Rescission .....	
Net .....	504,118,000
Budget estimate, 1996 .....	857,405,000
House allowance .....	728,332,000
Committee recommendation .....	828,078,000

The Committee recommends \$828,078,000 for projects considered within the “Defense-wide” account. The amount recommended is a decrease of \$29,327,000 from the fiscal year 1996 budget request and \$99,746,000 above the House allowance. (See State tables at the end of the report for complete program recommendations.)

*Portsmouth Naval Hospital.*—The Committee is concerned with the recent notification of intent to award an architect/engineer contract for the design of building 215 renovation. The Committee directs the Department to prepare a report of the current plans for building 215. This report should be provided no later than December 31, 1995.

*Pentagon building renovation.*—The Committee is not unmindful of the age and the deterioration of the Pentagon building. The Committee notes that, beginning in fiscal year 1993, the Department requested the Pentagon building renovation through a revolving fund under the jurisdiction of the Defense appropriation bill. The Committee believes that this fund has not provided the needed oversight required for the magnitude of this project. Therefore, the Committee will again fund this project through the military construction appropriation. The Committee directs that the Secretary of Defense should provide a plan on how the actual population of the Pentagon will be reduced by 15 percent when renovation is completed. This plan should be delivered to the four appropriate committees not later than February 15, 1996. This plan should include a breakout of permanent, part-time, and temporary employees within each service before and after this reduction. Each reserve component should be shown separately.

*Redstone Arsenal, AL.*—Of the \$83,992,000 provided for planning and design within the “Defense-wide” account, the Committee directs that not less than \$1,500,000 be made available for the design of the MSIC facility at Redstone Arsenal, AL. The Committee fully expects this design contract to be awarded as early in fiscal year 1996 as practical.

*Medical facilities, various locations.*—The Department recommended full funding of requested hospital construction projects. These affected projects cannot be fully executed in fiscal year 1996.

The Committee directs the continued phased funding of medical facility projects.

The Committee is also concerned that budget submissions by the Defense Medical Facilities Office [DMFO] do not receive an appropriate review by the construction agencies of the individual military services prior to submission to the Congress for funding. The Committee, therefore, directs that all future requests for medical facility construction be included in the budget request of each service. The lead agency should continue to be DMFO for department-wide medical policy. The Committee, however, believes that medical facility projects should compete for funding with the other requirements of the services.

*Defense Fuels Supply Center.*—Of the \$83,992,000 provided for planning and design within the “Defense-wide” account, the Committee directs that not less than \$1,300,000 be made available for the design of fuel tanks at Elmendorf AFB, AK. The Committee fully expects this design contract to be awarded as early in fiscal year 1996 as practical.

*Energy Conservation Investment Program [ECIP].*—The Committee supports the Energy Conservation Investment Program. The Committee understands the need for flexibility within this program. The Committee, however, is concerned that this program is budgeted without a clear understanding of what the funds will specifically be used for and lacks the necessary oversight required by Congress. The Committee directs the Department to accelerate its budget process so that specific projects are identified before the President’s fiscal year 1997 request is submitted to Congress.

*Bassett Hospital.*—Of the \$83,992,000 provided for planning and design within the “Defense-wide” account, the Committee directs that funds be made available for the design of the Bassett Hospital at Fort Wainright, AK. The Committee fully expects this design contract to be awarded as early in fiscal year 1996 as practical.

*Contingency construction.*—The Committee has provided \$4,967,000 for the “Contingency construction” account. This account provides funds which may be used by the Secretary of Defense for unforeseen facility requirements. The Committee supports maintaining a contingency construction account. However, for the past several years, the Department has maintained large unobligated funds in this account. As described in the section on rescissions prior-year funds are rescinded.

*National Defense University.*—The Committee supports the requirement for the National Defense University. The requirement for renovation of the university, however, has not been made clear to the Committee.

*Southwest Asia prepositioning.*—The Committee understands the requirement for prepositioning in the region as a force multiplier. However, the Committee is aware of the recent changes in government. The political instability in this region may impact the Department’s ability to execute this program. Therefore, the Committee denies funding for prepositioning at this time.

## MILITARY CONSTRUCTION, RESERVE COMPONENTS

Fiscal year 1995:	
Appropriation .....	\$574,302,000
Rescission .....	.....
Net .....	574,302,000
Budget estimate, 1996 .....	182,012,000
House allowance .....	284,924,000
Committee recommendation .....	452,119,000

The Committee recommends \$452,119,000 for military construction projects for the Guard and Reserve components. This amount is \$270,107,000 above the fiscal year 1996 budget request and \$167,195,000 above the House allowance. This increase reflects the Committee's strong support for the most cost-effective component of the Department of Defense.

The Committee continues to strongly support our Guard and Reserve forces. The Committee believes that the Guard and Reserve have been major contributors to what is considered the total force concept.

Historically, the Department of Defense has failed to adequately fund Guard and Reserve projects, expecting the Congress to add those projects deemed necessary. The Department has repeatedly been made aware of this situation. Therefore, the Committee has reduced other areas of the military construction bill and used this funding to fund Guard and Reserve projects.

The Committee's recommended action on each Reserve component project is reflected in the State list at the end of this report. The Committee recommends approval of military construction, Reserve components as outlined in the following table:

Component	Budget request	House allowance	Committee recommendation
Army National Guard .....	\$18,480,000	\$72,537,000	\$156,357,000
Air National Guard .....	85,647,000	118,267,000	168,972,000
Army Reserve .....	42,963,000	42,963,000	83,423,000
Naval Reserve .....	7,920,000	19,655,000	7,920,000
Air Force Reserve .....	27,002,000	31,502,000	35,447,000
Total .....	182,012,000	284,924,000	452,119,000

The Committee directs that the Department of Defense develop a long-term plan and program for replacement and rehabilitation of National Guard armories, and to request adequate funds in its fiscal year 1997 budget to initiate the program.

*Barbers Point, HI.*—Of the \$14,008,000 provided for planning and design within the "Army National Guard" account, the Committee directs that not less than \$2,800,000 be made available for the design of a headquarters complex at Barbers Point, HI. The Committee fully expects this design contract to be awarded as early in fiscal year 1996 as practical.

*Armed Forces Reserve Center, Billings MT.*—Of the \$14,008,000 provided for planning and design within the "Army National Guard" account, the Committee directs that not less than \$1,200,000 be made available for the design of the Armed Forces Reserve Center at Billings, MT. The Committee fully expects this

design contract to be awarded as early in fiscal year 1996 as practical.

*UH-60 hangar.*—Currently, the Army National Guard has a detachment of UH-60 Blackhawk helicopters located in Hilo, HI, which are without adequate hangar facilities. The rainy climate in Hilo makes it particularly imperative that adequate facilities are constructed soon. The Committee notes that a requirement exists for \$6,700,000 to build the facility for the Army Guard. However, because of fiscal constraints, the Committee is unable to identify sufficient funding for the project. The Committee believes that the Department of Defense needs to respond to this requirement as quickly as funding becomes available. If funding cannot be identified during fiscal year 1996, the Committee expects the Defense Department to request funding for the project in its fiscal year 1997 budget request.

*Planning and design.*—The Committee recommendation provides an additional \$36,529,000 for planning and design activities for the Reserve components. The Department continues to ignore the future needs of the Reserve components. For years this Committee has reiterated its direction to the Department to stop underfunding Reserve component military construction projects in anticipation of increased congressional support in the authorization and appropriations process. This year the Committee has taken funding from the Active components and transferred it to the planning and design line for the Reserve components. If this practice continues next year it is the intention of the Committee to take further action.

*Hickam AFB, HI.*—Of the \$9,680,000 provided for planning and design within the “Air National Guard” account, the Committee directs that not less than \$790,000 be made available for the design of a squadron operations facility at Hickam AFB, HI. The Committee fully expects this design contract to be awarded as early in fiscal year 1996 as practical.

*Fort Lawton, WA.*—The Committee is concerned that the Secretary of the Army did not request funding for phase II construction of the Joint Armed Forces Reserve Center, Fort Lawton, WA. The National Defense Authorization Act for Fiscal Year 1995 authorized the funds for phase I construction, with the understanding that funding for the subsequent phases would be included in the budget request. The Committee believes that the center will enhance the training and administration of the Reserve units in the area and urges the Secretary of the Army to include funding for phase II in the fiscal year 1997 military construction request.

NORTH ATLANTIC TREATY ORGANIZATION SECURITY INVESTMENT  
PROGRAM

Fiscal year 1995 .....	\$119,000,000
Rescission .....	33,000,000
Net .....	86,000,000
Budget estimate, 1996 .....	179,000,000
House allowance .....	161,000,000
Committee recommendation .....	161,000,000

The Committee has provided \$161,000,000 for North Atlantic Treaty Organization Security Investment Program for fiscal year

1996. This amount is \$18,000,000 below the President's fiscal year 1996 budget request and equal to the House allowance. This amount is an 87-percent increase over the fiscal year 1995 appropriated level. It is also a 10-percent decrease to the fiscal year 1996 budget request.

The Committee continues to support the NATO Security Investment Program. The Committee recognizes valid requirements remain after the drawdown. The Committee, however, is convinced that the Department is not serious in its attempts to have member nations participate in defraying construction program costs. The Committee urges the Secretary of Defense to moderate the construction program overseas and seek expanded contributions from our allies in Europe. These member nation funds should be provided to the NATO Security Investment Program. The amount should allow for the continuation of existing work and allow for emergency projects and new projects.

The Committee has found it difficult to justify a request that does not identify what specific projects will be funded with this request. The Committee directs the Department to work with our allies to create a new program and budgeting process that will allow for a specific review of projects before the funding is approved by the Congress.

#### FAMILY HOUSING OVERVIEW

The Committee has provided \$4,236,745,000 for family housing construction, operations, and maintenance, the Department's new family housing improvements fund, and the homeowners assistance program. This amount is \$111,524,000 above the fiscal year 1996 budget request and \$89,424,000 under the House allowance.

*Quality of life.*—The Committee supports the Department's efforts to upgrade the living standards for families. The average age of family housing is 33 years. This is the youngest part of the DOD infrastructure inventory. However, such factors as the level of maintenance and repair, usage, and climate have an accelerated affect on the condition of these facilities. The current family housing deficit for the Department is 273,795 units. The Department has requested \$22,000,000 for the private sector initiative proposed by the Secretary of Defense to address this deficit. The Committee is not clear as to how the \$22,000,000 will be used in this new program. The Committee directs the Department to identify specific projects that will be funded from this request prior to execution. The Committee directs the Department to notify the four appropriate committees regarding the identity and amount requested for each project.

*Reprogramming criteria.*—The reprogramming criteria that apply to military construction projects (25 percent of the funded amount or \$2,000,000 whichever is less) continue to apply to new housing construction projects and to improvements over \$2,000,000. To provide the individual services the flexibility to proceed with construction contracts without disruption or delay, the costs associated with environmental hazard remediation such as asbestos removal, radon abatement, lead-based paint removal or abatement, and any other legislated environmental hazard remediation may be excluded, provided that such remediation requirements could not be reasonably

anticipated at the time of budget submission. This exclusion applies to projects authorized in the budget year as well as projects authorized in prior years for which construction contracts have not been completed.

*General and flag quarters.*—The Committee agrees with House report language concerning general and flag officers quarters. The Committee further concurs with House report language concerning all reporting requirements and notifications for general and flag officer quarters.

#### FAMILY HOUSING, ARMY

Fiscal year 1995 .....	\$1,183,710,000
Budget estimate, 1996 .....	1,381,096,000
House allowance .....	1,463,996,000
Committee recommendation .....	1,410,948,000

The Committee recommends a total of \$1,410,948,000 for family housing, Army, in fiscal year 1996. This is \$29,852,000 over the fiscal year 1996 budget request and \$53,048,000 under the House allowance. Specific details are included in the tables at the end of the report.

#### FAMILY HOUSING, NAVY AND MARINE CORPS

Fiscal year 1995 .....	\$1,205,064,000
Budget estimate, 1996 .....	1,514,084,000
House allowance .....	1,579,618,000
Committee recommendation .....	1,564,876,000

The Committee recommends \$1,564,876,000 for family housing, Navy and Marine Corps, in fiscal year 1996. This amount is \$50,792,000 over the fiscal year 1996 budget request and \$14,742,000 under the House allowance. Specific details are included in the tables at the end of the report.

*Fallon Naval Air Station.*—The Committee is concerned over the unfunded requirement for Navy family housing at Fallon Naval Air Station. The planned influx of several major commands to NAS Fallon, including “Top Gun” and “Top Dome,” in addition to the normal heavy usage of the facility by both Reserve and active components is placing new and difficult demands for housing and other quality of life requirements. While a housing study was prepared in the spring of this year, the Committee has learned that the Naval Facilities Engineering Command is presently engaged in another market survey to ascertain current off base housing availability. It is unclear to the Committee whether existing and planned housing will adequately meet the installation’s growing needs. Therefore, the Committee directs that a report on the long-term housing situation be provided to the Committee. The report should incorporate the results of the ongoing assessment as well as the conclusions of the previous study. The Committee directs that the report should be provided to the appropriate Committees not later than January 1, 1996.

*Planning and design.*—Of the \$56,472,000 provided for planning and design within the “Navy” account, the Committee directs that not less than \$1,200,000 be made available for the design of a new bachelor enlisted quarters for NAS Fallon, NV. The Committee

fully expects this design contract to be awarded as early in fiscal year 1996 as practical.

#### FAMILY HOUSING, AIR FORCE

Fiscal year 1995 .....	\$1,102,289,000
Budget estimate, 1996 .....	1,098,216,000
House allowance .....	1,150,730,000
Committee recommendation .....	1,117,196,000

The Committee recommends \$1,117,196,000 for family housing, Air Force, in fiscal year 1996, which is \$18,980,000 over the budget request, and \$33,534,000 under the House allowance. Specific details are included in the tables at the end of the report.

*General and senior officer quarters.*—The Committee strongly supports the need to provide adequate housing for the enlisted members of the Air Force. This concern takes precedent over housing for more senior personnel. To further this effort, the Committee redirects \$2,509,000 for the construction of general and senior officer quarters. These funds will be applied to family housing construction projects.

*Detached housing offices.*—The Committee's concern for adequate housing again takes precedent over housing offices. These offices are used infrequently as compared to the use of needed housing. To further this effort, the Committee redirects \$6,502,000 for the construction of detached housing offices. These funds will be applied to family housing construction projects.

#### FAMILY HOUSING, DEFENSE-WIDE

Fiscal year 1995 .....	\$29,381,000
Budget estimate, 1996 .....	34,239,000
House allowance .....	34,239,000
Committee recommendation .....	46,139,000

The Committee recommends \$46,139,000 for family housing, defense agencies, in fiscal year 1996. This amount is \$11,900,000 over the budget request and the House allowance. Specific details are included in the tables at the end of the report.

#### FAMILY HOUSING IMPROVEMENT FUND

Fiscal year 1995 .....	.....
Budget estimate, 1996 .....	\$22,000,000
House allowance .....	22,000,000
Committee recommendation .....	22,000,000

The Committee recommends \$22,000,000 for family housing, improvement fund, in fiscal year 1996. This amount is the same as the budget request and the House allowance.

#### HOMEOWNERS ASSISTANCE FUND

Fiscal year 1995 .....	.....
Budget estimate, 1996 .....	\$75,586,000
House allowance .....	75,586,000
Committee recommendation .....	75,586,000

The Committee recommends an appropriation of \$75,586,000 for the homeowners assistance fund [HAP], the same as the budget request. Anticipated expenditures for fiscal year 1996 are not ex-

pected to be covered by available prior-year funds and proceeds from the resale of homes. This program benefits military personnel and Federal civilian employee homeowners in locations where the housing market becomes depressed due to an announcement of a base closure or realignment of a military installation. The HAP provides partial compensation to homeowners for their financial losses incurred in the sale of their homes.

The Committee directs the Department to include in its future budget justifications a detailed estimate of the funds requested for HAP which are necessary to support the decisions of the Commission on Base Realignment and Closure. The Committee believes that the true cost of the base closure process is understated since the HAP program is funded from a separate account. The Committee directs that of the amount requested for HAP in the fiscal year 1997 budget justification, all BRAC related funds shall be identified separately within the HAP account.

#### BASE CLOSURE OVERVIEW

The Committee has approved \$3,897,892,000 for base closure and realignment activities during fiscal year 1996. This amount is \$1,189,734,000 over the amount appropriated by Congress for fiscal year 1995. A discussion of these activities is included at the beginning of the report under the heading "Base Realignment and Closure."

The Committee recommends providing full funding for these important projects. To this end, the Committee provides the following listing of the specific projects requested by the Department and appropriated by the Committee for the BRAC accounts. The Committee provides specific approval and appropriated funds for the following construction projects:

#### BASE REALIGNMENT AND CLOSURE

[Fiscal year 1996 budget estimate, base realignment and closure, fiscal year 1996 BRAC military construction projects]

[Dollars in thousands]

Component/State/project description	BRAC round	Committee recommendation
Army 91 BRAC construction, fiscal year 1996:		
Arizona: Fort Huachuca: Hospital/dental clinic (38300) .....	II	\$2,250
California: Sacramento Army Depot: Reserve center renovation (45589) ....	II	2,000

BASE REALIGNMENT AND CLOSURE ACCOUNT, PART I

Fiscal year 1995 .....	\$87,600,000
Budget estimate, 1996 .....	
House allowance .....	
Committee recommendation .....	

The Committee recognizes that fiscal year 1995 was the last year for appropriations into this account.

BASE REALIGNMENT AND CLOSURE ACCOUNT, PART II

Fiscal year 1995 .....	\$265,700,000
By transfer .....	(133,000,000)
Budget estimate, 1996 .....	964,843,000
House allowance .....	964,843,000
Committee recommendation .....	964,843,000

The Committee recommends \$964,843,000 for the "Base realignment and closure" account, part II as authorized and provided by the House allowance.

BASE REALIGNMENT AND CLOSURE ACCOUNT, PART III

Fiscal year 1995:	
Appropriation .....	\$2,322,858,000
Rescission .....	- 32,000,000
Net .....	2,290,858,000
Budget estimate, 1996 .....	2,148,480,000
House allowance .....	2,148,480,000
Committee recommendation .....	2,148,480,000

The Committee recommends \$2,148,480,000 for the "Base realignment and closure" account, part III as authorized and provided by the House allowance.

BASE REALIGNMENT AND CLOSURE ACCOUNT, PART IV

Fiscal year 1995 .....	
Budget estimate, 1996 .....	\$784,569,000
House allowance .....	784,569,000
Committee recommendation .....	784,569,000

The Committee recommends \$784,569,000 for the "Base realignment and closure" account, part IV as authorized and provided by the House allowance. The Committee does not want to disrupt the progress the Commission has made as well as the implementation of the Commission's recommendations. The Committee, however, agrees with the House and looks forward to the Department identifying the use of these funds before they are obligated.

## GENERAL PROVISIONS

The Committee has made no changes to sections 101–120 as recommended by the House. Other changes are as follows:

Sections 121–125. These sections have been deleted by the Committee.

### COMMITTEE RECOMMENDED PROVISIONS

The Committee has added two general provisions to the House-passed bill as follows:

Section 126 provides funding for projects subject to authorization. The Committee considers these projects to be critical for readiness and quality of life. The Committee believes that funding for these items is justified, although not currently covered in the Senate-reported authorization. For purposes of comparison, the amounts provided in this section have been set forth in the discussion of the parent accounts.

Section 127 directs that fiscal year 1996 funding for the Pentagon renovation will continue to be available as long as the cost of the renovation does not exceed \$1,218,000,000.

### COMPLIANCE WITH PARAGRAPH 7, RULE XVI, OF THE STANDING RULES OF THE SENATE

Paragraph 7 of rule XVI requires that Committee reports on general appropriations bills identify each Committee amendment to the House bill “which proposes an item of appropriation which is not made to carry out the provisions of an existing law, a treaty stipulation, or an act or resolution previously passed by the Senate during that session.”

All projects for which appropriations are provided by the Committee are unauthorized. These projects are subject to authorization. The National Defense Authorization Act for Fiscal Year 1996 is not passed the Senate.

### COMPLIANCE WITH PARAGRAPH 7(C), RULE XXVI OF THE STANDING RULES OF THE SENATE

Pursuant to paragraph 7(c) of rule XXVI, the accompanying bill was ordered reported from the Committee, subject to amendment and subject to the subcommittee allocation, by recorded vote of 24–0, a quorum being present.

COMPLIANCE WITH PARAGRAPH 12, RULE XXVI OF THE  
STANDING RULES OF THE SENATE

Paragraph 12 of rule XXVI requires that Committee reports on a bill or joint resolution repealing or amending any statute or part of any statute include “(a) the text of the statute or part thereof which is proposed to be repealed; and (b) a comparative print of that part of the bill or joint resolution making the amendment and of the statute or part thereof proposed to be amended, showing by stricken-through type and italics, parallel columns, or other appropriate typographical devices the omissions and insertions which would be made by the bill or joint resolution if enacted in the form recommended by the committee.”

In compliance with this rule, changes in existing law proposed to be made by the bill are shown as follows: existing law to be omitted is enclosed in black brackets; new matter is printed in italic; and existing law in which no change is proposed is shown in roman.

No change in existing statutes has been proposed.
