

Morgan Nugent
Principal, Osan American High School

Guiding Philosophy:

It is my belief that all students can achieve their full potential when the school, parents, community and most importantly the student devotes his/her energy to their education. I will continually strive to ensure that your child has a safe and nurturing school that pushes your child to be successful in the global workforce.

Professional Goals for Osan American High School:

During my tenure as principal, I will work with the school staff to expand opportunities for our students to take additional AP courses that support our government's STEM (Science, Technology, Engineering, and Mathematics) as well as linguist initiatives. Additionally, I would like to expand the opportunities that our students have to pursue Professional /Technical Study programs here at Osan.

Communication Style:

I find the best way to ensure that effective communication takes place is in person whenever possible. My door is open and I would appreciate the opportunity to talk with you about what we can do together to prepare your child for the global workforce.

Education and Experiences:

I hold a MA in Educational Leadership from California State University Bakersfield and a BS degree in Secondary Education with an emphasis in Social Studies from Greenville College. Prior to my current assignment, I was principal at M.C. Perry High School in Iwakuni, Japan. Before joining DoDEA, I served as both a Principal and an Assistant Principal/Athletic Director for ten years in both California and Georgia.

Interests, Hobbies, Fun Facts:

I love to be outdoors. During the summer months, I take my children hiking and fishing when I am not helping my family at our bakery in Bridgeport, CA. In order to pay for college, I worked road construction, worked in a meat department, mined for gold, and was a desk clerk at a hotel.
