Resource Conservation and Development Program

Overview

The Resource Conservation and Development Program (RC&D) is reauthorized in the Farm Security and Rural Investment Act of 2002. The purpose of the RC&D program is to encourage and improve the capability of volunteer local elected and civic leaders in designated RC&D areas to plan and carry out projects for resource conservation and community development. Program objectives focus on “quality of life” improvements achieved through natural resources conservation and community development. Such activities lead to sustainable communities, prudent land use, and the sound management and conservation of natural resources.

Benefits/Accomplishments

The RC&D program pulls together people, communities, Indian tribes, and grassroots groups that unite in shared purpose and pool resources to get work done. More than 20,000 volunteers are serving on and with RC&D councils. They are committed to revitalizing and sustaining their communities through the RC&D program. To date, 375 areas across the Nation (plus the Caribbean and Pacific Basins) have been designated by the Secretary of Agriculture as RC&D areas. They serve more than 85 percent (2,709) of U.S. counties and over 80 percent of the U.S. population.

In fiscal year 2004, RC&Ds completed more than 4,586 projects. These resulted in 551 businesses created and 1,543 businesses expanded; 5,939 jobs created; 5,244 miles of streams and 3,190,000 acres of wildlife habitat improved. Over 363,580 people learned new skills, and 16 million people were served.

How RC&D Works

Assistance is provided, as authorized by the Secretary of Agriculture, to designated RC&D areas through their organized RC&D councils (comprised of local leaders). RC&D councils and their sponsors, in association with State, local, and Federal governments and nonprofit organizations, develop and implement local RC&D area plans. Councils also obtain assistance from other local, State, and Federal agencies; private organizations; and foundations. RC&D priorities are set by area residents to meet their needs.

Eligibility

Technical assistance is available to RC&D areas designated by the Secretary of Agriculture. Technical assistance is available for planning and installing approved projects specified in RC&D area plans, for land conservation, water management, community development, and land management elements.

For More Information

If you need more information about RC&D, please contact your local USDA Service Center, listed in the telephone book under U.S. Department of Agriculture, or your local conservation district. Information also is available on the World Wide Web at: <http://www.nrcs.usda.gov/programs/rcd/>

Visit USDA on the Web at:
