Transmittal No. 04-27

Canada – Advanced Extremely High Frequency Terminals Program

On 23 July 2004, the Defense Security Cooperation Agency notified Congress of a possible Foreign Military Sale to Canada of components for an advanced extremely high frequency terminals program as well as associated equipment and services. The total value, if all options are exercised, could be as high as \$83 million.

The Government of Canada has requested a possible sale of 19 Secure Mobile Anti-Jam Reliable Tactical Terminals (SMART-T) and 60 Single Channel Anti-Jam (SCAMP), modification kits, support equipment, spare and repair parts, supply support, personnel training and training equipment, publications and technical data, U.S. Government and contractor technical assistance and other related elements of logistics support. The estimated cost is \$83 million.

This proposed sale will contribute to the foreign policy and national security objectives of the United States by improving the military capabilities of Canada and further weapon system standardization and interoperability with U.S. forces.

Canada will mount the SMART-Ts on Canadian provided Light Support Vehicles Wheeled (LSVWs) which will be supplied as Government Furnished Equipment (GFE). The LSVWs will require modifications in order to mount the SMART-Ts to the LSVWs. This satellite terminal is also capable of stand-alone operation.

The proposed sale of this equipment and support will not affect the basic military balance in the region.

The principal contractors will be: Raytheon Incorporated in Marlborough, Massachusetts and Rockwell-Collins in Cedar Rapids, Iowa. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will require the assignment of several U.S. Government representatives for two-week intervals twice annually to participate in training, program management and technical review. The specific requirements for the support in-country will be established during program definition between representatives of the United States Government and Canada.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

This notice of a potential sale is required by law; it does not mean that the sale has been concluded.
