Transmittal No. 06-38

Oman – JAVELIN Anti-tank Missile Systems

Washington, July 28, 2006 - The Defense Security Cooperation Agency notified Congress of a possible Foreign Military Sale to Oman of JAVELIN anti-tank missile systems as well as associated equipment and services. The total value, if all options are exercised, could be as high as \$48 million.

The Government of Oman has requested a possible sale of 250 JAVELIN missile rounds and 30 JAVELIN command launch units, simulators, trainers, support equipment, spare and repair parts, publications and technical data, personnel training and equipment, U.S. Government and contractor engineering and logistics personnel services, a Quality Assurance Team, and other related elements of logistics support. The estimated cost is \$48 million.

This proposed sale will contribute to the foreign policy and national security of the United States by helping to improve the security of a friendly country that has been and continues to be an important force for political stability and economic progress in the Middle East.

The desert warfare missions of Oman's infantry and light armored forces require the protection afforded by the capabilities of the JAVELIN system. JAVELIN will provide the forces with a credible anti-armor defense that is critical to successful operations. The proposed sale of JAVELIN is consistent with Oman's ongoing efforts to modernize its armed forces and the presence of the weapon in the land forces' inventory will provide yet another inroad for enhancing interoperability between the U.S. and Omani military forces.

The proposed sale of this equipment and support will not affect the basic military balance in the region.

The prime contractor will be Raytheon/Lockheed-Martin JAVELIN Joint Venture in Orlando, Florida. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will require the assignment of a U.S. Government Quality Assurance Team consisting of one contractor and two U.S. Government representatives to Oman for one week to assist in the delivery and deployment of the missiles. Several contractor and U.S. Government representatives will travel to Oman for two-week intervals twice annually to participate in training, program management, and technical review.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

This notice of a potential sale is required by law; it does not mean that the sale has been concluded.
