

Three Simple Steps for Fall

1 Take mass transit, and consider riding your bike or walking to the bus or transit stop instead of driving. Even if you do it just once or twice a week, you'll reduce traffic congestion and pollution... and save money.

2 Ride your bike or walk instead of driving. They're easy ways to get exercise and they're easy on the air. Vehicles on the road create more than 25% of air pollution nationwide.

3 Share a ride or car pool. Every time you share a ride, you're helping to reduce emissions by almost half.

Spread the word. If everyone would take just a few of these simple, easy steps, it could make a big difference, because —

It all adds up to cleaner air
