Joining the "YouTube Generation": Ocean Explorer Website

Impacts

Inspires ocean stewardship, a new generation of ocean explorers, and encourages scientific discovery Does the thought of browsing a government website make you yawn? Scientific American thinks OAR's Ocean Explorer website will change your mind. "Poseidon beware! NOAA is determined to penetrate every minnow hideout and barnacle cluster of your realm, and with technology this advanced, there's no stopping this league of swashbuckling scientists. Ocean

Explorer is full of buried treasure," wrote the prestigious science magazine's editors in honoring Ocean Explorer with their Sci/Tech Web Award.

Ocean Explorer is a public portal to an ocean of sensory delights. Joining the YouTube generation, the Ocean Explorer's Ocean Channel explores underwater volcanoes, coral reefs, and historic shipwrecks to name a few. Newsworthy events and mission stories are told in video and audio podcasts. Each mission has its own section on the website, and is accompanied by a log that records the experiences of the mission's various team members while out at sea.

Since its inception in April 2001, NOAA Ocean Explorer has been featured on hundreds of web sites and print media sources, and received many awards and special recognitions.

For anyone interested in a career in ocean exploration and research, the OceanAGE section provides profiles of over 20 people involved in ocean exploration. Along with scientists from multiple disciplines there are some unusual options, such as

submersible pilot, NOAA Corps officer, marine archaeologist, research coordinator, and administrator. Resources for teachers, including modules to accompany missions, lesson plans, a glossary, and other activities, are also available. The *Ocean Explorer* website is used by teachers around the world.

Scientific American is not alone in recognizing the site. Ocean Explorer has been featured in Discover magazine, on the Animal Planet TV channel, and is a CNN science link. It has also been a site of the week on Voice of America. And, by the way, many of the videos at Ocean Explorer also appear on YouTube.

"This site...dares to go where no site has gone before. With a wealth of online goodies that will amaze even grizzled mariners of the Web, it tracks, records, photographs, and thrills to a fleet of deep sea expeditions. There's so much to talk about that it's almost painful to narrow it down..."
