

FREEDOM SOARS

**DEFENDING
OUR NATION AND
OUR ENVIRONMENT**

In working toward bald eagle conservation, the Department of Defense salutes our nation's symbol, which has championed over adversity and returned from the brink of extinction. By helping the eagle soar again, our military has demonstrated the power of our forces to protect *all wildlife* while defending us. In the military's eyes, there are many ways to let freedom soar, and conservation of our *natural heritage* is just one of them!
