

## SUBSYSTEM TEST TEAM

- Test Set/Instrumentation for Missiles and Missile Components
- Testing of Microwave and Millimeter Wave Radar Assemblies, Subassemblies and Components
- Functional Testing of Missiles and Missile Components
- Functional Testing and Monitoring of Aviation Subsystems in Conditioned and Dynamic Environments

## HARDWARE-IN-THE-LOOP TEAM

- 3 Operational HWIL Facilities
- Provides Performance Assessment and Production Acceptance Testing of Millimeter Wave, Infrared and SAL Missile Seekers and All-Up-Rounds
- Subject Matter Expertise in Combining T&E with M&S to support Simulation Based Acquisition

## DISTRIBUTED TEST TEAM

- Access to Classified and Unclassified Computer Networks
- Fiber Links to all RTC Ranges and Labs as well as connection to DREN
- Operates modernized Distributed Test Control Center (DTCC)
- Provides Subject Matter Expert Support for Networks and Simulation Architectures
