Table of Contents

Introduction

The Fiscal Year (FY) 2011 Enterprise Transition Plan (ETP) included business systems being modernized, or that were planning to modernize, in FY2011 and have, or will have spent more than $1 million in development and modernization funds. It also included programs that completed (closed out) their modernization in FY2010 and FY2011. System data was displayed in dashboards, designed to provide the key information required by title 10 section 2222 for acquisition strategies, including milestones and performance metrics (measures).

Table 1 provides summary information for all the FY2011 ETP dashboard systems, including transition plan state (core, interim, legacy) either at the beginning of the fiscal year or when a system was added to the ETP, whether the system was eventually archived in the DoD IT Portfolio Registry (DITPR), and relevant fiscal year periods for which the Defense Business System Management Committee (DBSMC) approved funding and modernization. Table 1 also shows whether key milestone plan (KMP) delivery or sustainment milestones occurred (were met) in FY2011. Finally, where there were measureable results based on performance measures it also shows whether the target(s) and goals were met for FY2011, along with any pertinent measure or other comments. For the FY2011 ETP, measures were *only* required for transition plan state *Core* systems past milestone B.

Subsequent tables show certification information, systems with change in transition plan state or name or acronym during FY2011, and dashboard system names and acronyms. A section on FY2011 milestone results analysis concludes the supplement.

ENDNOTES:

N/A. System for which goals were longer term, and goal attainment was not anticipated in FY2011. Alternately, systems that were not required to provide, or did not provide, measures are indicated with "N/A" in their met target/met goal fields.

Note 1. System was *not* a core system past milestone B; measure and measures results were not required.

Note 2. Shift in transition plan state to other than "core" or modernization plan archived; measures and measures results no longer required.

Note 3. System had no delivery and/or results to be measured in FY2011.

Note 4. System was included in FY2011ETP based on development modernization funds in the DoD information technology budget in Select & Native. Programming-Information Technology (SNaP-IT) at https://snap.pae.osd.mil/snapit/home.aspx, consistent with title 10 subsection 2222(h), or DITPR data. However, certification and DBSMC approval never occurred, the system was reclassified outside the business mission, or SNaP-IT data was later determined to be incorrect. These systems are considered "closed out" from the FY2011 ETP. This does not, however, preclude the system from reentering an ETP related to a future certification.

Note 5. System that was not asked to provide measures for the FY2011 ETP, or was required to provide measures but did not provide them. These systems will be asked to provide measures as applicable for future ETPs.

FY2011 Milestone Performance Summary

There were a total of 622 system milestones due in FY11, as contained in the 2011 ETP. Of the 622 milestones, 414 were categorized as either pre-delivery, delivery or compliance milestones. (The remaining 208 milestones are interim milestones excluded from this analysis because they are for internal Department use only.)

Of the 414 pre-delivery, delivery and compliance milestones, 262 (63.28 percent) were met. The remaining 152 (36.71percent) were either slipped or deleted. Milestone deletions are considered milestone revisions.

	Met	Slipped	Deleted	Grand Total
D- Delivery	7	2		9
Delivery	156	62	18	236
Directed/Compliance	8	2	2	12
PD - Pre-Delivery	1			1
Pre-Delivery	90	39	27	156
Total	**262**	**105**	**47**	**414**
Percentage %	63.28%	25.36%	11.35%	

The following acronymns appear in Table 10:

FD/FOC   Full Deployment/Full Operational Capability
MS B   Milestone B
MS C   Milestone C
FDD/IOC   Full Deployment Decision/Initiatl Operating Capability
IOT&E   Operational Test and Evaluation
SFIS   Standard Financial Information Structure
FFMIA   Federal Financial management Improvement Act
