Department of Defense

Fiscal Year 2011 Report

on

Humanitarian Assistance (HA)

(Report furnished in accordance with Title 10, USC, Section 2561)

January 2012 Defense Security Cooperation Agency

THE HUMANITARIAN ASSISTANCE PROGRAM OF THE DEPARTMENT OF DEFENSE (10 USC SECTIONS 2561 AND 2557)

Introduction

The Department of Defense (DoD) Humanitarian Assistance Program supports U.S. foreign policy and national security goals, most notably in regions where humanitarian needs pose major challenges to stability, prosperity and respect for universal human values.

When faced with situations of dire need, DoD's humanitarian activities may focus on the direct provision of assistance aimed at saving lives, alleviating suffering or providing essential services for affected populations. Such activities may also encompass efforts to bolster a host nation's capacity to avert or respond to humanitarian crises, thereby reducing its reliance upon foreign disaster relief. Closely coordinated with U.S. government interagency partners, the DoD's efforts in this area also serve important security cooperation goals – to improve DoD's visibility, to improve DoD's access and influence, to foster collaborative relationships with a host nation's civil society, and where necessary, to help in countering violent extremism. These activities provide Geographic Combatant Commanders (GCCs) with unobtrusive, low cost, but highly effective instruments to carry out their security cooperation activities.

The Defense Security Cooperation Agency (DSCA) is charged with program/resource management. The Office of the Deputy Assistant Secretary of Defense, Partnership Strategy and Stability Operations, provides policy oversight.

Legislative Authorities

Pursuant to 10 USC Section 2561, funds authorized to be appropriated to the DoD for a fiscal year for humanitarian assistance shall be used for the purpose of providing transportation of humanitarian relief and for other humanitarian purposes worldwide. The Secretary of Defense may also use this authority to transport supplies intended for use to respond to, or mitigate the effects of, an event or condition that threatens to seriously harm the environment, but only if other sources to provide such transportation are not readily available.

Pursuant to 10 USC Section 2557, the Secretary of Defense may make available for humanitarian relief purposes any nonlethal excess supplies of the DoD.

The Overseas Humanitarian, Disaster, and Civic Aid (OHDACA) appropriation funds these activities. DSCA performs financial management, including allocation of funds to the GCCs.

Overview of Activities

The DoD conducts humanitarian assistance, disaster relief/emergency response, and funded transportation programs pursuant to Title 10 U.S. Code Sections 2557 and 2561.

Humanitarian assistance activities include assessments of needs; rudimentary construction and renovation of public facilities (such as schools, hospitals, clinics, and orphanages); digging or improving water wells and other sanitation and drinking water projects; and repairing/building rudimentary infrastructure such as roads and bridges. DoD in-country personnel or the GCCs nominate projects in coordination with the U.S. country team and other U.S. agencies in the country or region, such as the U.S. Agency for International Development (USAID). The respective GCC endorses a nominated project to DSCA using an automated database. DSCA coordinates proposed projects as appropriate with other DoD and interagency offices and determines whether or not the project is approved or disapproved. Once a project is approved, the responsible GCC determines when to fund the project and oversees its execution. Traditionally, more projects are submitted than can be covered by available funding, thus the GCCs must prioritize which ones are funded.

Non-lethal excess property provided may include such items as medical, school, or office equipment and supplies, construction and disaster-related equipment/tools, and vehicles. Excess property is transferred from DoD to the Department of State, represented by the American Embassy in the recipient country, for further distribution. Excess property for planned projects is generally moved to the recipient country by surface transportation. In support of disaster/emergency response, excess property is most often moved by a combination of surface and air transportation.

The DoD disaster relief and emergency response includes disaster preparedness and disaster response training, as well as immediate assistance in the wake of natural and manmade disasters. Such assistance may take the form of

airlift, logistical support, provision of emergency supplies such as blankets, tents, water and humanitarian daily rations, and search and rescue operations.

DoD components participate in foreign disaster relief and emergency response activities when directed by the President, or with the concurrence of the Secretary of State, or in emergency situations in order to save lives, when there is not sufficient time to seek the prior initial concurrence of the Secretary of State. DoD responses are coordinated with the USAID's Office of U.S. Foreign Disaster Assistance and other relevant agencies.

Also conducted pursuant to section 2561 is the funded transportation program. This program provides worldwide DoD-funded transportation of non-urgent humanitarian cargo. It applies to both DoD cargo (for example, disaster relief supplies and non-lethal excess property) and private donations by non-governmental and international organizations. Appropriated funds pay for the actual cost of transportation and any associated administrative costs incurred.

While statutory authority permits transportation of private donations via any mode and for any cargo that could be defined as humanitarian relief, current policy places the following restrictions:

- (1) cargo should address basic humanitarian needs (e.g.; medical, food, clothing, shelter);
- (2) minimum cargo size should be one 20-foot container or 1,100 cubic feet; and
- (3) cargo should be sent by less expensive surface modes of transportation (except in special circumstances).

OHDACA funds pay for the associated ground and port handling and surface transportation costs.

Reporting Elements – Fiscal Year 2011

Pursuant to Section 2561(c) an annual status report on the provision of humanitarian assistance is required for the prior fiscal year. The report shall set forth the following information:

- (1) The total amount of funds obligated for humanitarian relief under the section:
- (2) The number of scheduled and completed transportation missions for purposes of providing humanitarian assistance under the section; and

(3) A description of any transfer of excess DoD nonlethal supplies under section 2557, to include the date of transfer, the entity to whom the transfer is made, and the quantity of items transferred.

The total amount of funds obligated from the OHDACA appropriation for humanitarian relief and other humanitarian purposes worldwide under Section 2561 was \$270.69 million as of September 30, 2011. This figure represents humanitarian assistance projects and private donor shipments, as well as support to disaster relief/emergency response. For FY 2011, the latter amounted to \$166.07 million. Transportation missions were conducted in support of four disasters/emergencies. Because transportation missions are calculated in various ways, e.g., helicopter lift is calculated in hours rather than point-to-point flights, the following table summarizes funds obligated as of September 30, 2011 for fixed and rotary wing airlift during the periods indicated for the four disasters:

Philippines Typhoon (October 2010)	\$.802M
Israel Wildfires (December 2010)	\$.740M
Libya Complex Emergency (March 2011)	\$ 1.000M
Japan Earthquake (March 2011)	\$52.800M

Total: \$55.342M

The description of excess property transfers and an enumeration of other funded shipments for purposes of providing humanitarian assistance during FY 2011 are included in the following pages.

Enclosure: As stated
