PROGRAM ASSESSMENT

Defense Communications Infrastructure

The purpose of this program is to provide Information Technology networks and systems for the transmission of voice, data, and video information to locations around the world for the Department of Defense for both military and business functions.

NOT PERFORMING

Results Not Demonstrated

- The program failed to demonstrate results because there are no enterprise or department level standards to measure program performance, such as availability, reliability, security, and capacity.
- Some elements of the program, such as the Defense Information Systems Network, have performance measures for availability, reliability, security and capacity, and generally meet those targets.

We are taking the following actions to improve the performance of the program:

- Developing common measurements to assess performance across the department to ensure that military and business users have a network that is universally available, secure and robust.
- Create procedures to audit performance reporting to ensure dependability.

RATING What This Rating Means

PROGRAM ASSESSMENT

Department of Defense Facilities Sustainment, Restoration, Modernization, and Demolition

The Department of Defense (DoD) Facilities Sustainment, Restoration, and Modernization Program keeps DoD's facilities in good working order. It also repairs aging or damaged facilities and alters existing facilities to meet new needs.

PERFORMING Adequate

• DoD has developed a long-term strategic plan to manage its facilities. The plan will help improve its business practices, by incorporating performance measurements and life-cycle cost analyses in business decision-making.

- The program is decentralized, which has allowed military services to deviate from the strategic management plan. Higher priority defense requirements have caused program managers to use funds intended for maintenance of facilities for other programs.
- A key performance measure, readiness of existing facilities to meet mission requirements, uses subjective assessments and can yield inconsistent results.

IMPROVEMENT PLAN About Improvement Plans

We are taking the following actions to improve the performance of the program:

- Improving program management; including placing renewed emphasis on facility maintenance, and on using performance measurements to improve accountability.
- Using a new facilities condition metric that provides an objective indication of facility readiness. This metric should be in use across the entire Department by 2008.
- Eliminating excess facilities through the Base Closure and Realignment process.

What This Rating Means

PROGRAM ASSESSMENT

Navy Ship Operations

The purpose of the program is to provide trained and ready ships and crews and to continuously deploy combat ready vessels to protect our national security objectives.

PERFORMING

Effective

- The Navy has continued to routinely and effectively deploy combat ready ships in support of the Global War on Terror and other missions.
- The Navy is institutionalizing an improved training, maintenance and deployment cycle, known as the Fleet Response Plan. The goal of the Fleet Response Plan is to improve the efficiency of the fleet by producing more ships that are ready for deployment at any given time than under the old Cold War deployment and maintenance schedules.
- The Navy reviews its current and planned future operations on a continuous basis for this program. The Navy balances risk and funding levels while incorporating the latest pricing and financial execution data.

IMPROVEMENT PLAN

About Improvement Plans

We are taking the following actions to improve the performance of the program:

- Evaluating Fleet Response Plan implementation to ensure that proper readiness levels are maintained and global ship presence requirements are being met.
- Providing adequate funding to support the Fleet Response Plan goals so that the Nation has the capability to surge six carriers to sea within 30 days, and two additional carriers within 90 days.

| | FY 2005 | Price | Program | FY 2006 | Price | Program | FY 2007 | |
|-----------------------------|----------------|---------------|---------------|-----------------|---------------|---------------|-----------------|--|
| | Actuals | Change | Change | Estimate | Change | Change | Estimate | |
| Appropriation Funding (\$M) | 1,364.1 | 71.5 | -206.1 | 1,229.5 | 76.5 | -17.2 | 1,288.8 | |

<u>Description of Operations Financed</u>: This appropriation provides for the cost of operating Navy Reserve forces and maintaining their assigned equipment at a state of readiness that will permit rapid employment in the event of full or partial mobilization and meet fleet operational support requirements. The Navy Reserve's mission is to support the Navy-Marine Corps team with mission ready units, equipment and individuals throughout the full range of operations from peace to war. In FY 2007, the Navy Reserve will continue to integrate with the active Navy to maximize total force effectiveness.

The Navy Reserve operating force consists of aircraft, ships, combat support units, and their associated weapons. The cost of operating and maintaining Reserve aircraft in the Fourth Marine Air Wing is also funded in this appropriation. The Navy and Marine Corps Reserve average operating aircraft inventory totals 354 airframes in FY 2007, with an estimated ending inventory of 341 operational aircraft. With the decommissioning of two mine-hunting class ships, the FY 2007 Navy Reserve ship inventory will reflect 13 battle force and 4 non-battle force ships at the end of the year.

The Operation and Maintenance, Navy Reserve appropriation consists of two budget activities: BA-1 - Operating Forces, and BA-4 - Administration and Service-wide Support. Operating Forces (BA-1) funding provides for the operation and maintenance of Reserve force ships, aircraft and combat support forces. In addition, funding is used to operate and maintain Navy Reserve activities and commands in all fifty states. There are expected to be 159 Navy Reserve facilities at the end of FY 2007. Administration and Service-wide Support (BA-4) encompasses the funding required for various command and administrative activities.

Introduction Page 3 of 131

| Funding levels by Budget Activity (\$M) | FY 2005 | Price | Program | FY 2006 | Price | Program | FY 2007 |
|---|----------------|---------------|---------------|-----------------|---------------|---------------|-----------------|
| | <u>Actuals</u> | Change | Change | Estimate | Change | Change | Estimate |
| Operating Forces (BA-1) | 1,335.2 | 71.0 | -204.8 | 1,201.4 | 76.4 | -12.4 | 1,265.4 |
| Administration and Servicewide Support (BA-4) | 28.9 | 0.5 | -1.4 | 28.0 | 0.1 | -4.7 | 23.4 |

Narrative Explanation of Changes:

In BA-1 (Operating Forces), the FY 2007 request includes a pricing increase of \$76.4 million and a net program decrease of \$12.4 million. Major programmatic changes in BA-1 include the restoral of a FY 2006 reduction of \$53M applied the flying hour program to remove reprioritized training hours, baseline operational hours and mobilization assets supporting the Global War on Terrorism (GWOT); increased use of operational spares and replacement parts for Navy Reserve ships; increased use of consumable and repairable parts for all aircraft types; a reduction in Aicraft Depot Maintenance requirements due largely to decreasing Navy Reserve aircraft inventory; and a reduction in Facilities Operations and Maintenance funding to meet Department of Defense planning goals and to achieve Base Realignment and Closure (BRAC) savings.

In BA-4 (Administration and Servicewide Support), the FY 2006 request includes a pricing increase of \$0.1 million and a net program decrease of \$4.7 million. The decrease is principally associated with the reduction of the requirement for DFAS services and a reduction in the General Defense Intelligence Program (GDIP) requirement.

In FY 2005, increases in world fuel market prices, along with the impact of hurricane damage on the U.S. refining industry, necessitated a significant price change, and drove an increase to the current stabilized rate of \$84.00 per barrel. The FY 2006 budget, however, only reflected funding to meet an overall composite rate of \$61.74 per barrel. Due to this significant increase in cost, the Department is requesting \$2.6 billion in the FY 2006 Global War on Terror Supplemental to fund the price growth. As a result, the FY 2007 budget requests funding to reflect the increase from \$61.74 to \$84.00. The budgeted increase is reflected as price growth, since the customer's budget does not include the funding necessary to meet the stabilized price of \$84.00 per barrel in FY 2006.

Introduction Page 4 of 131

<u>Perfor mance Metrics:</u> The FY 2007 President's Budget reflects the Navy's efforts to establish performance metrics in accordance with the President's Management Plan. There are several major programs with established performance metrics reflected in the FY 2007 OMNR budget request. In total, they comprise 86.6% of the requested funding for the appropriation. The chart below depicts these major programs.

The performance metric in the Naval Reserve's Flying Hour Program is the percentage of aircrews that are funded to fully integrate into the Active component. There are two performance metrics in Aircraft Depot Maintenance. For the Airframes Rework Program, the goal is to provide enough airframes to meet 90% Primary Aircraft Authorized levels for the Reserve's non-deployed squadrons. For the Engines Rework Program, the goal is to provide enough Ready-For-Issue engines to achieve zero bare firewalls and maintain 90% of the Type/Model/Series spares pools.

In Ship Operations, the performance metric is the number of non-deployed steaming days-per-quarter that the Reserve ships provide to the fleet. In Ship Depot Maintenance, the performance metric is the percent of the notional maintenance projection reflective of ship availabilities and operational commitments.

The metric for the Navy Marine Corp Intranet (NMCI) is the percent of personnel that are provided NMCI seat or hybrid account access.

In Base Support the performance metric is Capability Level 2 for the Port Ops Support, Air Ops Support and Utilities Support special interest (SI) programs, and Capability Level 3 for all other SI areas.

For Facilities Sustainment, Restoration and Modernization, the Department of Defense (DoD) has two performance metrics. For Facilities Sustainment, the goal is to have no more than five percent deferred sustainment in FY 2007. For Restoration and Modernization (R&M), the DoD goal is to fund to a rate that will achieve a recapitalization rate of 67 years by 2008.

I. <u>Description of Operations Financed</u>:

The Naval Air Force Reserve flying hour program funds the following activities for the Navy Reserve and Marine Corps Reserve:

Day-to-day aviation operations and unit operational activities
Organizational (O-level) and Intermediate (I-level) maintenance activities
Contracted Aviation Maintenance Services
Unit and Operational training
Engineering and logistical support
Administrative support

Flying hour funding is provided to maintain an adequate level of readiness, enabling Reserve aviation forces to operate, maintain, and deploy aviation forces in support of the National Military Strategy.

II. Force Structure Summary:

Naval Air Force Reserve consists of one Logistics Support Wing (fifteen squadrons), one Carrier Air Wing (five squadrons), one Maritime Patrol Wing (three squadrons), four Helicopter Combat Support squadrons, and one Helicopter Anti-Submarine Warfare squadron. The Navy Reserve provides one hundred percent of the Navy's organic airlift in the Logistics Support Wing. The Fourth Marine Corps Air Wing consists of fourteen squadrons and supporting units that are also funded through Naval Air Force Reserve.

| OPTEMPO (Hrs/Crew/Month) | 10.2 | 8.8 | 10.2 |
| Navy Average T-rating | 2.3 | 2.8 | 2.3 |

Explanation of Performance Variances:

Prior Year: FY 2005 actuals include fuel and cost of war supplementals. In FY 2005, the average cost per hour exceeded budget estimates due to higher than planned fuel costs and increased use of aviation depot level repairables, a result of preparing and reconstituting aircraft for overseas forward deployment, as well as increased travel and transportation costs due to extensive OCONUS operations. FY05 flying hours were reduced due to the mobilization of Navy Reserve aircraft (largely USMCR assets); the flying hours executed by these mobilized assets were included in active Navy flying hour reports.

Current Year: FY 2006 estimate reflects decreased hours and T-rating due to a \$53 million cost avoidance reduction to baseline OPTEMPO associated with continuing GWOT operations.

I. Description of Operations Financed:

This sub-activity group provides funding for all aspects of Navy Reserve Aviation Intermediate Level Maintenance Departments (AIMDs), and Mobile Maintenance Facilities (MMFs). These activities perform intermediate level maintenance that enhances and sustains the combat readiness and mission capability of supported activities by providing quality and timely material support at the nearest location with the lowest practical resource expenditure. Also included is Engineering Technical Services (ETS) to Reserve forces to furnish on-site technical information, instruction, and training (formal and on the job) to aviation maintenance personnel at the organizational and intermediate level of maintenance. The purpose of this training is to elevate the technical knowledge and skills of Reserve Navy and Marine aviation maintenance technicians in the installation, maintenance, repair, and operation of all types of aviation equipment and associated support equipment. Funding for I-level maintenance consists of on and off equipment material support and involves the following:

- a) Performance of maintenance on aeronautical components and related support equipment.
- b) Performance of I-level calibration of designated equipment.
- c) Processing aircraft components from stricken aircraft.
- d) Providing technical assistance to supported units.
- e) Incorporation of technical directives.
- f) Manufacture of selected aeronautical components.
- g) Performance of on-aircraft maintenance when required.
- h) Age exploration of aircraft and equipment under Reliability Centered Maintenance.

II. Force Structure Summary:

Naval Air Force Reserve consists of one Logistics Support Wing (fifteen squadrons), one Carrier Air Wing (five squadrons), one Maritime Patrol Wing (three squadrons), four Helicopter Combat Support squadrons, and one Helicopter Anti-Submarine Warfare squadron. The Navy Reserve provides one hundred percent of the Navy's organic airlift in the Logistics Support Wing. The Fourth Marine Corps Air Wing consists of fourteen squadrons and supporting units that are also funded through Naval Air Force Reserve.

Change from FV 2006 to FV 2007

I. <u>Description of Operations Financed</u>:

Airframe Rework - This program provides inspection, repair, reconfiguration and conversion of fleet aircraft. Through periodic return to depot level maintenance activities, aircraft major structures and airframe systems are maintained in a safe flyable condition. The Aircraft Service Period Adjustment (ASPA) Program adjusts individual aircraft period end dates for selected aircraft when material condition warrants. Under ASPA guidelines, only aircraft that upon inspection cannot safely be extended for another 12-month tour are inducted in the depot for Standard Depot Level Maintenance (SDLM). Depot maintenance is conducted under the SDLM concept in which maintenance is performed only to the level that is technically justified and cost effective. Depot maintenance is currently being performed under both the SDLM and Integrated Maintenance Concept (IMC) programs. Currently, the F/A-18, F-5, H-1, H-53, H-60, E-2, EA-6B, H-46, and P-3 aircraft programs have been incorporated under the IMC concept. The IMC concept uses Planned Maintenance Intervals (PMI), performing more frequent depot maintenance, with smaller work packages, reducing out of service time. The goal of this program is to improve readiness while reducing operating and support costs. NAVAIR's Industrial Strategy in the downsizing environment is to maintain only the minimum level of organic capacity, consistent with force levels, that is necessary to sustain peacetime readiness and warfighting surge capability. NAVAIR will work in partnership with private industry to make maximum use of industry's production capabilities and capacity for non-CORE related aviation depot level maintenance.

Engine Rework - The engine rework program accomplishes the repair, modification and overhaul of aircraft engines, gearboxes, and torque meters. The program objective is to return depot-repairable engines to ready-for-issue status to support fleet engine pool requirements. Under the Engine Analytical Maintenance Program (EAMP), engines are repaired at the lowest echelon of maintenance. Only engines that are beyond the repair capability of intermediate maintenance activities are scheduled for induction in the depots. Depot-level maintenance may also be performed concurrent with aircraft SDLM if such maintenance is operationally necessary and cost effective. Engine field team assistance is included in this budget submission to provide on-site depot level maintenance on an as-needed basis.

II. Force Structure Summary:

Aircraft Depot Maintenance - Aircraft Rework and Maintenance is performed at Naval Aviation Depots commercially, and as interservice agreements with Army and Air Force in support of the following aircraft inventory:

I. <u>Description of Operations Financed</u>:

This program provides unscheduled services to the Reserve activities and enhances operational readiness by providing expeditious solutions for the correction of unplanned depot maintenance problems incurred in the field. The services are budgeted on the basis of historical levels of effort and projected emergent requirements. Services include reserve maintenance training, customer services, and support of depot maintenance operations.

II. Force Structure Summary:

I. Description of Operations Financed:

The purpose of the Naval Reserve Force (NRF) is to augment the regular naval forces to expand the capabilities of the U.S. Navy to its total force. The Naval Reserve Force represents that addition to the regular force which is required to operate and support the Navy's total inventory of ships in time of war or national emergency, or when otherwise authorized by law. Organized Reserve units with organic equipment provide the most rapid means of expanding the combat and combat support capabilities of the regular Navy.

Ship Fuel. Tempo of Operations - Includes ship's propulsion fuel to operate the main plant/engines of the conventionally powered ships at an average budgeted OPTEMPO.

Ship Utilities. Includes the cost of steam, electricity, water, sewage treatment, and other utilities (excluding telephone and garbage removal) incurred by Reserve ships while partially or totally "cold iron" in port.

Ship Operations Supplies and Equipage (S&E) Repair Parts. Provides for the funding of diversified operations and organizational level maintenance requirements including Depot Level Repairable, spares for equipment repair to maintain stocks of on-board repair parts, and the Supply Operations Assistance Program (SOAP). In conjunction with each ship's overhaul, a complete inventory of on-board repair parts is conducted by the SOAP team, repair parts allowance lists are updated based on the most recent information supplied by the hardware managers, improperly preserved parts are repackaged, repair parts that are no longer usable are discarded or turned in, and additional spares are procured to bring ship's repair parts storerooms up to full allowance.

Ship Operations Supplies and Equipage (S&E) Other OPTAR. Provides for equipage and housekeeping items such as mooring lines, underway replenishment gear; life jackets; special clothing; bedding; paint and primers; life lines; ladder treads; lagging; battle lanterns; tools; plumbing and light fixtures; sheet metal; materials to replace and repair watertight scuttles, doors, and hatches; lubricants, chemicals; lube oil; boiler compound; bilge cleaner; batteries; office machines; damage control pumps and blowers; fire hose; binoculars; floor buffers; cleaning gear such as swabs, buckets, rags, wax and cleaning compounds; toilet paper; paper towels; light bulbs; and port service charges including tugs, pilots, fees, brows, and garbage removal.

<u>Fleet Temporary Additional Duty (TAD).</u> Supports operational, administrative, and training travel for active duty personnel assigned to ships and units of the Naval Reserve Force and the Commands and Staffs responsible for ships in the program. TAD costs are incurred for professional, technical, team and administration training, and attendance at conferences and meetings.

Commands and Staffs. Supports normal administrative costs needed to administer managerial control and provides management information to higher authority which includes: consumable supplies, safety gear needed by inspection teams, rental, replacement and maintenance of labor saving devices, and telephone services required to support administrative duties for all units assigned; TAD in support of the Command and Staff components for training, conferences, on-site inspections of subordinate units; and printing and publication of directives, guidance to establish and promulgate standards of readiness, and printed material required for briefings or conferences.

II. Force Structure Summary:

The following table shows the year-end Naval Reserve Force (NRF) ship inventory:

| Hull Type | Category | FY 2005 | FY 2006 | FY 2007 |
|-----------|------------------|----------------|----------------|----------------|
| FFG | Battle Force | 9 | 9 | 9 |

I. <u>Description of Operations Financed</u>:

Funds the Navy Tactical Command Support System (NTCSS) program for NRF ships. NTCSS provides the Maintenance Resource Management System (MRMS) for ship intermediate maintenance to the Atlantic and Pacific fleets.

II. Force Structure Summary:

Navy Tactical Command Support System (NTCSS): MRMS supports reserve site Type Commanders, Group Commanders, Area Coordinators, Readiness Support Groups, and various Intermediate Maintenance Activities for information resource systems through command development and logistic support. The following table shows the year-end Naval Reserve Force (NRF) ship inventory:

| Hull Type | Category | FY 2005 | FY 2006 | FY 2007 |
|-----------|------------------|----------|----------------|----------------|
| FFG | Battle Force | 9 | 9 | 9 |
| MHC | Battle Force | 1 | 0 | 0 |
| MCM | Battle Force | 5 | 5 | 4 |
| MHC | Non Battle Force | <u>9</u> | <u>6</u> | <u>4</u> |
| | Total | 24 | 20 | 17 |

I. Description of Operations Financed:

Ship depot maintenance funding provides for depot level repairs during both scheduled and emergent availability of Naval Reserve Force (NRF) ships. This program is designed to enable safe and reliable operation of the ships in fulfilling their assigned combat and combat support related missions. The ship depot maintenance program includes all depot maintenance ranging from scheduled availabilities to non-scheduled restricted and technical availabilities (RA/TA). RA/TA repairs include selected restricted availabilities, phased maintenance availabilities, emergent repairs, service craft overhauls, and various other miscellaneous type repairs. Other depot maintenance related programs funded include: Planning and Engineering & Logistics Support, Integrated Logistics Overhaul (ILO), Integrated Logistics Review (ILR), Berthing and Messing Surface Ship Maintenance, and Surface Ship Engineering Operating Cycle (SSMPMS), Technical Support for Mine Countermeasure (MCM/MHC) Ships and Surface Ship Engineering Operating Cycle (SSEOC). These depot maintenance funds provide support for the following class NRF ships: FFG, MHC and MCM.

II. Force Structure Summary:

The following table shows the year-end Naval Reserve Force (NRF) ship inventory:

| Hull Type | Category | FY 2005 | FY 2006 | FY 2007 |

IV. Performance Criteria and Evaluation Summary:

Activity Goal: To provide maintenance necessary to sustain the operational readiness of combat forces, to ensure the safe and efficient operation of weapon systems, to renovate assets (recapitalization), and to ensure equipment is at or above fully mission capable standards prior to any transfers from the Active to Reserve Components.

Description of Activity: Depot Maintenance programs fund the overhaul, repair, and maintenance of aircraft and other equipment. Depot Maintenance is performed at both public (DoD) and private (contractor) facilities

I. <u>Description of Operations Financed</u>:

Navy Reserve combat support forces provide combat service support to Joint and Naval Component Commanders in forward areas as required. Funding is provided for various combat support forces that fall under Naval Expeditionary Combat Command (NECC) Enterprise, such as: Naval Construction Forces (NCF), Naval Expeditionary Warfare, Naval Expeditionary Logistics Support Group (NAVELSG), and Mobile Security Force units. The dual role of readiness and peacetime support is complementary and accomplishes the objective of maintaining adequate skill levels in highly technical specialties through training during weekend drills and active duty training. This program includes costs for travel, training, construction, maintenance, repair services, equipment and operational support.

Service Life Extension Program (SLEP) - Supports NCF Prepositioned War Reserve Material Stock.

Naval Mobile Construction Battalions and other reserve NCF units - These units support peacetime and wartime Naval construction operations. NCF units are required to support Navy OPLAN requirements by providing combat construction capability to Joint and Naval Commanders in forward areas as required.

Explosive Ordnance Disposal Mobile Units -These units perform underwater mine detection and range bomb detection or retrieval.

NAVELSG units - These units meet surge peacetime requirements in cargo handling and supply support.. NAVELSG units are used to support Navy OPLAN requirements by providing logistics support at advanced and forward logistics support sites.

Naval Coastal Warfare units - These units (Mobile Inshore Undersea Warfare units, Inshore Boat Units and Harbor Defense Commands) provide coastal surveillance, force protection, communication and command and control support of Joint and Naval Component Commanders.

The Naval Facilities Engineering Command (NAVFAC) also provides centrally managed support for NCF logistics management operations, construction and material handling equipment maintenance and training support for the Construction Basic Veteran (CB-VET) program This program is designed to recruit prior service personnel, thus eliminating the requirement for recruit training and Class-A school attendance.

Funding is also provided for equipment repair parts and other material costs required to maintain unit table of allowance assets at a minimum state of readiness in support of training and readiness objectives

II. Force Structure Summary:

The Navy Reserve combat support forces support the NECC Enterprise and include Naval Construction Force (NCF), Naval Expeditionary Warfare, and Naval Expeditionary Logistics Support Group (NAVELSG) units. NCF units consist of twelve Naval Mobile Construction Battalions, four Naval Construction Regiments, two Construction Battalion Maintenance Units and one Naval Construction Force Support Unit. Expeditionary Warfare units consist of twenty-two Mobile Inshore Undersea Warfare Units, twelve Inshore Boat Units, six Naval Coastal Warfare squadrons, and four Explosive Ordnance Disposal (EOD) Mobile Units. NAVELSG units consist of ten Cargo Handling Battalions two Supply Support Battalions, one Navy Air Cargo Handling Battalion and one Navy Ordnance Reporting and Handling Battalion. In addition, this program provides support to Naval Construction Battalion Centers for operation and maintenance activities, spares, and the Service Life Extension Program (SLEP).

I. <u>Description of Operations Financed</u>:

Navy Tactical Data System (NTDS) Computer Program: provides the FFG-7 reserve ships with the core combat direction system elements required to implement self-defense to detect, control and engage tracks of interest, and to maintain Battle Group Interoperability with Model 4 Link 11 capability. NTDS is a key element of the FFG-7 class ships and provides necessary multi-warfare command and control support for the combat system. The FFG-7 reserve ships are currently being used to protect homeports.

AEGIS MK 92 In-Service Engineering Program: provides engineering, logistics, logistics services and program management support for the MK 92 Fire Control System and Guided Missile Launching System onboard Reserve status FFG-7 class ships.

MCM/MHC Ships/Ships Depot Program: provides maintenance and depot level support of systems and components associated with mine hunting sonars and combat systems (navigation, neutralization, and sweeping) aboard reserve Mine Countermeasures (MCM) and Mine Hunting Costal (MHC) class ships. Maintenance of systems and components includes screening, maintenance, testing, adjustments, replacement, repair, modification, and test equipment. In addition, this program provides sonar In-Service Engineering Agent (ISEA) for overall engineering, maintenance, installation and logistic support for sonar systems; and ISEA and Technical Design Agent (TDA) functions including overall system engineering fleet support, maintenance, repair, logistic support, CASREP coordination, and tech manual upgrades for MCM and MHC class ships in the reserve fleet.

2F Cog Restoration provides for depot maintenance of Navy Reserve search radar major components (2F Cog equipment). Equipment is removed from ships as necessary and shipped to the appropriate repair facility for restoration. Requirements are based on replacement commitments to specific ships during maintenance periods and/or time usage factors. Estimates also include support for casualty replacements based on historical experience with Search Radar performance data. Restored material provides equipment for approximately twenty-five percent of the cost of new procurement.

II. Force Structure Summary:

Specific systems supported include mine -hunting sonar and equipment aboard Mine Countermeasure (MCM) and Mine-hunter Craft (MHC). In addition, provides for In-service engineering support to FFG ASW Sensors, FFG ASW Sensors, MK 92 Fire Control Systems, MK 13 Guided Missile Launching Systems, Radar Antennae and Ancillary/Electronics on Naval Reserve ships.

I. Description of Operations Financed:

Enterprise Information Technology (BSIT) includes IT resources for the Office of the Assistant Chief of Naval Operations for Information Technology (ACNO(IT)). Established by the Chief of Naval Operations in October 2004, ACNO(IT) will serve as the Navy lead for IT strategies and activities. Consolidation of IT efforts under ACNO(IT) will lend to full visibility and control of resources and requirements devoted to Navy Infrastructure and Enterprise Services and to put forth a prioritized set of programs that efficiently meet the needs of warfighting and business domain owners.

II. Force Structure Summary:

Consolidated Enterprise IT resources include the Navy Marine Corps Intranet (NMCI) seat services, Enterprise Licenses, Base Level Information Infrastructure (BLII), OCONUS Navy Enterprise Network (ONE_NET), Common Access Cards (CAC), and the Navy Global Directory Service (NGDS).

NMCI is a comprehensive, enterprise-wide initiative that will make the full range of network-based information services available to Sailors and Marines for day-to-day activities and in war. NMCI will give the Navy and Marine Corps secure, universal access to integrated voice, video and data communications. It will afford pier-side connectivity to Navy vessels in port. And it will link more than 346,000 desktops across the United States as well as sites in Puerto Rico, Iceland and Cuba.

NMCI will apply the speed and might of world-class Internet technology to everything from administrative tasks to ammunition supply. It will help the Navy and Marine Corps meet these critical objectives: enhanced network security, interoperability with CINCs and other Services, world-wide knowledge sharing, increased productivity, improved systems reliability and quality of service, and reduced cost of voice, video and data services. The ultimate advantage for the warfighter is Increased combat readiness and effectiveness.

Enterprise Licenses contains funding to buy out the current ORACLE License and provide maintenance for that license structure as an Enterprise procurement and life cycle. This area will contain other Enterprise Services (either a Service or a License) as those issues are validated as requirements and resources provided.

BLII modernizes existing antiquated IT facilities and installs state-of-the-art IT capability where none exists at major OCONUS fleet concentration stations. ONE-NET is the operations of BLII.

CAC serves as the standard ID card for DoD personnel (Active Duty military, selective reserve and National Guard, DoD Civilians, and designated contractors). CAC provides the principal means to enable physical and logical access to facilities and computer networks.

NGDS is critical to the establishment of a Naval Common Identity and provides the ability to create and manage Identity across the Naval enterprise. NGDS will become the authoritative source to all Naval organizations (NMCI, OCONUS, Afloat) and is a key enabler of PKI requirements.

I. <u>Description of Operations Financed</u>:

This sub-activity group funds the sustainment, restoration and modernization (SRM) of real property for all consolidated Navy Reserve and Navy properties under the auspice of Commander, Naval Installations (CNI), whose objective is to provide adequate and viable facilities for shore-based readiness and protection of current plant investments, and to continue to provide a physical environment conducive to recruiting, training, and retaining skilled and motivated personnel.

II. Force Structure Summary:

Commander, Naval Installations (CNI) provides base support funding for approximately 159 Reserve activities across the continental United States, Alaska, Hawaii, and Puerto Rico. In addition, CNI provides support to related but distinct hardware equipped units. These units include Naval Construction Forces (SEABEES), Ordnance Handling Support Activities (Explosive Outloading Teams, Mobile Mine Assembly Groups, Explosive Ordnance Disposal Units), Assault Craft Units (ACU), Mobile Inshore Undersea Groups and Units (MIUW), Cargo Handling Battalions (CHB), Mobile Diving and Salvage Units (MDSU), Inshore Boat Units (IBU), Composite Naval Coastal Warfare Units (CNCWU) and Advanced Based Functional Components (ABFC).

I. <u>Description of Operations Financed</u>:

This sub-activity group funds the day-to-day operations of stand alone Navy Reserve activities consolidated under the auspice of Commander, Naval Installations (CNI). The objective of the Navy Reserve shore installations is to provide responsive services to Reserve forces; ensure updated capability for maintaining personnel skill proficiencies; maintain and protect investments in facilities, equipment, weapons and weapons systems; provide adequate personnel services; meet acceptable standards of habitability, health and safety in living and work areas; and effectively manage resources for proper and efficient utilization including the protection/enhancement of the environment and conservation of natural resources as well as quality of life for active duty and selected reserve personnel.

II. Force Structure Summary:

Commander, Naval Installations (CNI) provides base support funding for approximately 159 Reserve activities across the continental United States, Alaska, Hawaii, and Puerto Rico. In addition, it provides support to related but distinct hardware equipped units. These units include Naval Construction Forces (SEABEES), Ordnance Handling Support Activities (Explosive Outloading Teams, Mobile Mine Assembly Groups, Explosive Ordnance Disposal Units), Assault Craft Units (ACU), Mobile Inshore Undersea Groups and Units (MIUW), Cargo Handling Battalions (CHB), Mobile Diving and Salvage Units (MDSU), Inshore Boat Units (IBU), Composite Naval Coastal Warfare Units (CNCWU), and Advanced Based Functional Components (ABFC).

BSSR Base Operating Support

BSSR Page 106 of 131

I. Description of Operations Financed:

This Sub-Activity Group provides resources for the operation of Office of the Chief of Navy Reserve. The Chief of Navy Reserve provides policy, control, administration and management direction, including the management of all resources (manpower, hardware, and facilities) assigned to affect an optimum training posture and mobilization readiness. Funding provides civilian salaries and administrative support. Funding also provides for Defense Finance and Accounting services for the Navy Reserve.

II. Force Structure Summary:

The staff of the Office of the Chief of Navy Reserve advises and assists the Chief of Naval Operations in the discharge of his responsibilities as the principal naval advisor and naval executive to the Secretary of the Navy on the conduct of the activities of the Department of the Navy, and as the Navy member of the Joint Chiefs of Staff.

I. Description of Operations Financed:

Director, Navy Reserve Personnel Management Department and Commanding Officer, Navy Reserve Personnel Center (NRPC) provide responsive coordination and administration of personnel matters concerning members of the Navy Reserve on inactive duty; provide services to reserve and retired members and their dependents; and ensure maximum readiness in the event of mobilization. Operations financed include screening and assignment of Reserve personnel for mobilization; administration of personnel and medical records for non-participation Fleet Reserve and USN/USNR personnel; maintenance of retirement point credits; management of the Pretrained Individual Manpower Management System (PIMMS) comprised of Individual Ready Reserve, Standby Reserve and Navy Retired community; accumulation of data required for the Reserve Component Common Personnel Data (RCCPDS); recording all Navy reservists participation in drills; distribution and control of enlisted personnel on active duty in the Full Time Support (FTS) program; reserve personnel management assistance to various Reserve commands throughout the country; and other Base Operations Support such as recurring utility costs and other engineering support for NRPC in New Orleans, LA. Also funds business Process Reengineering (BPR) of functional areas to promote organizational improvements and identify Information technology efficiencies.

II. Force Structure Summary:

This sub-activity supports the Navy Reserve Personnel Center (NRPC). NRPC provides responsive coordination and administration of personnel matters concerning members of the Navy Reserve on inactive duty; provide services to reserve and retired members and their dependents; and ensure maximum readiness in the event of mobilization. Operations financed include screening and assignment of Reserve personnel for mobilization; administration of personnel and medical records for non-participation Fleet Reserve and USN/USNR personnel; maintenance of retirement point credits; management of the Pre-trained Individual Manpower Management System (PIMMS) comprised of Individual Ready Reserve, Standby Reserve and Navy Retired community; accumulation of data required for the Reserve Component Common Personnel Data (RCCPDS); recording all Navy reservists participation in drills in the Reserve Standard Training and Readiness System (RSTARS); and distribution and control of enlisted personnel on active duty in the Full Time Support (FTS) program.

I. Description of Operations Financed:

Funding for this sub-activity is for all aspects of the Command and Control Protect (C2P) functions of Information Security operations which include the Vulnerability Assistance and Analysis Program (VAAP) for determination of computer and Local Area Network/Wide Area Network vulnerabilities for Naval Forces; the Automated Security Incident Measurement program for worldwide automated reporting and identification of possible attacks and intrusions on Naval computer networks; and the Naval Computer Incident Response Team program which provides rapid, worldwide response to hacking, intrusion, and virus incidents affecting Naval computer systems.

II. Force Structure Summary:

This sub-activity supports Fleet Information Warfare Center (FIWC) for Fleet-wide automated information security. This includes squadrons, ships, and all Fleet units.

I. <u>Description of Operations Financed</u>:

This sub-activity group provides funding for Mine Countermeasures (MCM) maintenance support aboard reserve MCM and MHC class ships. Maintenance includes sonar overhaul/maintenance and combat systems other than sonar such as mine navigation, neutralization, and sweeping.

The program also provides: overhaul/maintenance of Versatile Exercise Mines (VEMS); sonar In-Service Engineering Agent (ISEA) for overall sonar engineering/logistic support; and ISEA/Technical Design Agent (TDA) functions to support overall system engineering and technical manual upgrades.

II. Force Structure Summary:

Funding supports four activities and provides MCM maintenance support for mine sweeping, hunting, navigation, and neutralization systems. The following table shows the year-end Naval Reserve Force (NRF) mine warfare ship inventory:

| Hull Type | Category | FY 2005 | FY 2006 | FY 2007 |
|-----------|------------------|----------------|----------------|----------------|
| MHC | Battle Force | 1 | 0 | 0 |
| MCM | Battle Force | 5 | 5 | 4 |
| MHC | Non Battle Force | <u>9</u> | <u>6</u> | <u>4</u> |
