Commander to retire, replacement named

The Air Force announced that the commander of the Warner Robins Air Logistics Center, Maj. Gen. Polly A. Peyer, will retire.

Maj. Gen. Polly Peyer

While it did not provide a date, it also said her successor will be Maj. Gen. Robert H. McMahon, who is currently director of logistics, deputy chief of staff for logistics, installations and mission support, Headquarters U.S. Air Force.

"It has been an honor and a privilege to serve as commander of the Warner Robins Air Logistics Center at the pinnacle of my 35-year career," said Peyer.

"The decision is always a personal

and hard one to make, but I feel that it is the right time for me and my family," she added.

Peyer started her career as an enlisted member in July of 1975 and was commissioned a second lieutenant in March of 1977.

She has commanded at the squadron, group and wing levels; held a number of major command and headquarters-level positions; and served overseas in Germany and South Korea.

Prior to coming to Robins, she was the military assistant to the acting Secretary of the Air Force in Washington, D.C.

The C-130 makes its way to the Museum of Aviation. The aircraft will be used to train mechanics for the 402nd Maintenance Wing.

C-130 to help train mechanics

Robins' partnership with museum enhanced by aircraft relocation

BY WAYNE CRENSHAW
wayne.crenshaw.ctr@robins.af.mil

A C-130 which moved to the Museum of Aviation last week is much more than just another plane in its collection.

The aircraft will have a role unique to any other at the museum, save for an F-15 already moved there for the same purpose.

The two aircraft will be used to train mechanics for the 402nd Maintenance Wing. Both were already being used for that purpose

but were taking up much-needed real estate on the flightline.

Moving the aircraft to the museum not only frees up space, but now trainees can get to the aircraft without having to go on base, which helps reduce traffic and parking congestion.

The museum, in turn, gets to augment its partnership with Middle Georgia Technical College. Students will now train on the newly-located aircraft rather than just on retired models they help restore for the museum.

"It's a triple win," said Brig Gen. Lee Levy, 402nd commander. "It's really part of an ongoing effort to recruit and train the very best aerospace workers in the country."

Sustainment wings inactivated

BY WAYNE CRENSHAW

wayne.crenshaw.ctr@robins.af.mil

The 330th Aircraft Sustainment and 542nd Combat Sustainment wings were formally inactivated Tuesday in a ceremony at the Museum of Aviation.

The wings were inactivated July 1 as part of an Air Force-wide reorganization of wings, groups and squadrons, and their elements combined to

form the Aerospace Sustainment Directorate.

Maj. Gen. Polly A. Peyer, Warner Robins Air Logistics Center commander, officiated Tuesday's ceremony.

"The mission stays the same and the people stay the same," she said. "It's just some nomenclatures and office symbols change."

Peyer added there are some benefits to having combined the two wings, one of

which is base leaders no longer have to explain to the public the difference between an aircraft sustainment wing and a combat sustainment wing.

Col. Chris Davis is the director of the new Aerospace Sustainment Directorate. He noted the 330th and 542nd have histories which date back to World War II, and said the ASD "fully intends to build on the heritage of its past."

'What is a watt?'

The term "watt" was coined to honor James Watt, a contributor to the development of the steam engine. It measures the amount of energy being used.

We see watts listed on light bulbs, on our utility bill as "kilowatts" (a kilowatt is 1,000 watts), and on any number of machines and appliances.

Now, do this: Replace the word "watt" with something closer to home — dollars.

Robins pays about 7.2 cents for every kilowatt used per hour. That means a simple 100-watt light bulb, if left on all

year — 8,760 hours — costs the base about \$63.

How many light bulbs do you have in your work area? How many of them are left on when they're not being used?

We must leave our work computers on at night, but we can turn off our monitors, wall chargers, and almost everything else that uses watts. In fact, I have everything around me plugged into a power strip I can turn off every night when I leave.

As an experiment, look around and count all the watts,

or dollars, being spent in your work area. We obviously need watts to do our work, but we can save an incredible amount of money by using only the watts, or spending only the dollars, we absolutely need.

For more information on how to save energy, or if you have ideas on how to save energy here, e-mail me at hubert.saleem.ctr@us.af.mil or contact the Robins Energy Office at 926-2848.

Year of Family draws to close

BY KENDAHL JOHNSON
kendahl.johnson@robins.af.mil

Although the Air Force Year of the Family campaign officially ends in just a few days, the effort to focus on Airmen and their families in recognition of their dedication and service to the nation will continue.

The year-long campaign started in July 2009 to help remind people of the Air Force's long tradition of taking care of its people. The aim was to help members of the Air Force family reach their personal and professional goals, while maintaining a wartime ops tempo.

Matt Driver, Airman and

Family Services Flight chief, was the project officer for the Robins campaign. He worked with numerous helping agencies — the Health and Wellness Center, the Base Chapel, the Force Support Squadron and Family Advocacy among others — to provide a year

WORKING TOGETHER

Mechanic helps fix labor, management issues

BY WAYNE CRENSHAW
wayne.crenshaw.ctr@robins.af.mil

A kind deed done for her many years ago impact's Elaine Varnadoe's life to this day.

Elaine Varnadoe

Varnadoe is a 402nd Maintenance Wing sheet-metal mechanic and vice president of maintenance for the American Federation of Government Employees Local 987. She is also one of the original members of the Connectors group, which is made up of representatives of labor and management and aims to find ways for the two sides to work better together.

She agreed to serve on the group because she thought she could help others.

"When I was growing up, I had somebody stick a hand out to help me, and I always said if I could be in a position to help others that I would," she said. "I've always tried to help people who can't help themselves because at one time I was there and it taught me a lot."

For her service with the Connectors, she was honored with the Foster Leadership in People award. The award is given to members of Team

Robins who go the extra mile to build better labor/management relationships.

Her capacity to see both sides of an issue is reflected in her selection as an Alternative Dispute Resolution mediator. ADR is designed to resolve labor/management disputes before they go to a formal grievance process. In that role, she steps out of her employee and union roles and serves as a neutral observer.

Robert Caviness, ADR champion, said not just anyone can do the mediator's job.

"It takes a special individual to break away either from the union connections or management connections and put that hat on to be fair," he said.

Varnadoe has 31 years in the aircraft industry, previously working for Boeing and Delta before coming to Robins 21 years ago; however, she has no plans to retire.

"I like being able to negotiate with individuals and make sure things are done right," she said.

She said labor/management relationships are better now than she has seen in her time here, and she gave much of the credit for that to Maj. Gen. Polly Peyer, Warner Robins Air Logistics Center commander.

"I have never met another person who has put more of her heart and soul into doing what's right," Varnadoe said.

U.S. Air Force photo by TOMMIE HORTON

THREE-STAR TOUR

Lt. Gen. Janet C. Wolfenbarger, Air Force Materiel Command vice commander, tours the C-17 Programmed Depot Maintenance area last week, where she was shown structural issues which must be repaired during PDM. Wolfenbarger also toured other areas of the 402nd Maintenance Wing during a two-day visit here.

Robins unit transfers Infrared Detection System to Museum of Aviation

A Raytheon AN/AAQ-17 Infrared Detection System was retired last week in a ceremony at the Museum of Aviation. The system had been used for decades on Air Force Special Operations aircraft to view terrain and target information in total darkness.

The Q-17, which was transferred to the museum by the Warner Robins Air Logistics Center Special Operations Forces Avionics Integration Section, was used on Air Force Special Operations aircraft including the AC-130A and AC-

130H Spectre gunships, the MC-130P Combat Shadow, and the MC-130H Combat Talon II. It was also installed on some C-141s.

The system will eventually be displayed with the museum's AC-130 gunship, a veteran of combat in Southwest Asia.

According to Michael Beasley, the Warner Robins team which supported the system, became more critical as the Q-17 aged.

"In the final few years of the system's existence, newer technology began to

dominate the market, making older components harder to find," Beasley said. "As such, continued logistical support of the system required an integrated and dedicated team effort due to these obsolescence issues."

Beasley added, "The Q-17s place in avionics history cannot be mistaken. It represented the state-of-the-art technology during its years of service and served the warfighter well in many challenging and historic operations around the world." — *Courtesy Museum of Aviation*

FAMILY

Continued from 1A

of quality programs at no cost.

"The Year of the Air Force Family program has been an amazing success here," Driver said. "Countless Robins personnel and their family members have benefitted from the tremendous list of trips, special events and programs offered."

He said Team Robins members, namely youth, received more than \$40,000 in free support through various programs. Families impacted by deployments also received more than \$20,000 in support through the DeDeployment Program.

"Countless Robins personnel and their family members have benefitted from the tremendous list of trips, special events and programs offered."

Matt Driver

Flight Chief,
Airman and Family Services

Other events included a tour of Middle Georgia via a train and time with former president Jimmy Carter, and a trip to Atlanta to see a Braves baseball game from a VIP club box. Several hundred free season

family pool passes were also given as part of the campaign. The campaign wrapped up with a three-hour event at the Heritage Club, which included a free buffet dinner and giveaways.

Driver said the Air Force has a long and enviable history of meeting the needs of the Air Force family through comprehensive quality of service initiatives. He said the high standard of caring for families — active-duty personnel, civilians, dependents and retirees — will not end just because this particular campaign will end.

"Developing and caring for Airmen and their families remains one of our top priorities," Driver said.

SUBMISSION GUIDELINES
Submissions must be received by noon the Monday prior to the requested Friday publication. They should be e-mailed to **78ABW.PARevUp@robins.af.mil**.

When you enter a site which has achieved Gold Level recognition in the Commander’s Safe Site Challenge, you probably expect to see a clean, neat and well-organized work area.

You might expect to see safety and health reminders posted in the workplace. You might also expect site personnel to be well-versed in the tenets of VPP and the safety requirements of their particular jobs. But, what you probably don’t expect to witness is emphasis on safety and health off the job.

In addition to increased awareness of on-the-job safety and health, gold level recognized safe sites also focus on off-the job safety and health.

Without exception, sites which have

achieved gold level recognition address off-duty safety and health in the form of goals, information sharing and activities.

A few noteworthy examples include the development of off-duty Personal Protective Equipment requirements. Do you know what sort of safety precautions to take when mow-

ing the lawn, cleaning gutters or using home chemicals? If you don’t, a home PPE matrix developed by a site within the 402nd Maintenance Support Group will describe just what you need.

What about your home evacuation plan? Many gold safe sites have developed goals which address the development and execution of home evacuation plans. These sites want to ensure their personnel and their families know what to do in the event of a home fire or other emergency.

Emphasizing workplace safety is the primary goal of the Commander’s Safe Site Challenge, but protecting people off the job is also important and should not be overlooked.

Commander’s Action Line

The action line is an open-door program for Team Robins personnel to give kudos, ask questions or suggest ways to make Robins a better place to work and live.

The most efficient and effective way to resolve a problem or complaint is to directly contact the responsible organization. This gives the organization a chance to help you, as well as a chance to improve its processes.

Please include your name and a way of reaching

you, so we can provide a direct response. Anonymous action lines will not be processed. Discourteous or disrespectful submissions will also not be processed.

Commander’s Action Line items of general interest to the Robins community will be printed in the Robins Rev-Up.

For more information, visit <https://wwwmil.robins.af.mil/actionline.htm>. To contact the Commander’s Action Line, call **926-2886** or e-mail action.line@robins.af.mil.

NO SMOKING AT BASE GYM

As an avid gym user, I use the outside running track three days a week. Quite often between 4:45 and 6 a.m., there is a group of contractors who park their trucks and cars on the east side of the outdoor track. There are as many as seven vehicles at one time. Not sure what they’re doing, but there are a couple who get out and walk the track. The others, however, get out of their

vehicles and smoke. Not surprisingly, the smoke drifts over to the running track.

Needless to say, it is a nuisance to those of us who are running. Is it possible to make the area around the track a “no smoking zone”? There are several others who have expressed their frustrations over this situation. They have brought the subject up to the gym personnel, but we realize they can only enforce

so much. Any advice or action you can offer would be very much appreciated.

Thank you in advance for your kind reply.

COL. BUHLER RESPONDS:

Thank you for your feedback regarding making the running track a “no smoking zone.” Policy letters designating the track as a “no-smoking area” are already in place.

Moreover, this policy applies to all personnel, including personnel performing contract work on the base. To better communicate the policy, we are adding this to the rules sign located at the track. Contact Stuart Baptiesa at 327-8480 if you have further questions or concerns regarding the installation policy, or Leslie Sparks at 926-2128 regarding the operation of the Fitness Center and track.

SES ranks expand

The number of Robins employees in the Senior Executive Service recently grew by one.

Jorge Gonzalez, Director of the Warner Robins Air Logistics Center Engineering Directorate, was promoted Friday into the SES.

Lt. Gen. Janet C. Wolfenbarger, Air Force Materiel Command vice commander, Wright-Patterson Air Force Base, Ohio, officiated the promotion ceremony.

The Puerto Rico native holds a bachelor's degree in civil engineering and master's degrees in aerospace engineering and business administration. He's been working for the Air Force since 1980.

Cardboard recycling

Team Robins members have been good about recycling cardboard, so much so that cardboard containers are often overflowing.

People can help significantly by breaking down cardboard boxes, which saves considerable space in the containers, said Ervanette Murry, service contractor monitor for recycling.

Cardboard collection bins are scattered throughout the base, she said, but one of the most commonly used is in the recycling area behind the base exchange. The cardboard bin there is often overflowing on the weekend, so a second one has been added to help alleviate the problem.

Robins has a contract with Happy Hour, a service organization for the disabled, to recycle the cardboard. Proceeds from the sale of the cardboard, and other recyclables, is returned to the recycling program here.

Upcoming

The Warner Robins Diversity Steering Committee will host a Diversity Luncheon Wednesday at 11:30 a.m. in the Horizons Ballroom.

Charles Richardson, editorial page editor of The Telegraph, will be the featured speaker. RSVP with Renee Sconiers at 222-1027 by noon Monday.

The 78th Medical Group will provide **Healthy Start Screenings** for Tricare beneficiaries entering Georgia schools for the first time.

Students from pre-k to 12th grade can receive a screening July 31 from 9 a.m. to noon in Bldg. 700A. No appointments are necessary.

Children will have vision, hearing and dental exams, all of which are required by

U.S. Air Force photo by TOMMIE HORTON

Cookie donation

Col. David Southerland, 78th Air Base Wing vice commander, speaks with members of the Girl Scouts of Historic Georgia Tuesday following their a cookie donation to Team Robins. The Girl Scouts donated more than 2,000 boxes through the Girl Scout Cookies from Home program, in which Girl Scout troops ask the public to purchase cookies to donate to the military.

the Georgia school system.

In addition, height, weight, blood pressure and scoliosis screenings will be performed. Immunizations will be available, so bring a copy of your child's latest shot record. Security Forces will also provide finger printing services. The Georgia school forms 3300 and 3231 will be available and can be completed at the event.

These services will be performed for school screenings only. If your child needs a sports physical, contact 327-7850 to sched-

ule an appointment with his or her primary care manager.

For more information, call Master Sgt. Sonya Harper at 327-8220.

The C-5 Galaxy division of the Aerospace Sustainment Directorate will host the **Joint Services Wiring Action Group forum** Aug 3-5 at the Byron Conference Center, Byron, Georgia.

The focus of the event is Electrical Wiring Interconnect System Aircraft, and maintainers, engineers and

equipment specialists will benefit from the focused presentations and hands-on demonstrations of the latest in EWIS maintenance technology, tools and techniques.

Several major equipment manufacturers will be available during the forum to provide equipment training and demonstrations to help EWIS maintainers improve the reliability and maintainability of today's sophisticated aircraft wiring systems.

For more information on the forum, contact Cheryl

Brotherton at 926-0958 or cheryl.brotherton.ctr@robins.af.mil or Jan Ewing at jan.ewing@robins.af.mil or 926-7662.

The **78th Air Base Wing Exercise Office** reminds everyone August is an exercise month and particularly, the week of Aug. 9-13 will be brimming with activity.

Because of that, people may experience disruptions in services, limited access to facilities, or changes in base traffic.

The exercise office regrets any inconvenience, but asks everyone to be professional and courteous when dealing with those who are participating in these exercises. It is through these exercises that we sharpen our skills and provide a secure and safe working environment.

Voluntary Leave Transfer Program

To have the name of an approved leave recipient printed in the Rev-Up, e-mail Lanorris Askew at: lanorris.askew@robins.af.mil.

Submissions will run for two weeks.

Robins 2K users may access the current VLTP listing, reference materials, forms, and names of recipients who did not receive a sufficient amount of donations to cover their periods of absences by visiting <https://org.eis.afmc.af.mil/sites/FOWRALC/dp>.

C-130

Continued from 1A

He pointed out even experienced mechanics hired, such as those who have worked for Delta or other commercial airlines,

need to be trained on aircraft maintained at Robins.

Museum Director Ken Emery said the C-130 will be reassembled soon and, along with the F-15, placed on pads currently being constructed on. Pads for the two aircraft are current-

ly under constructed on land just south of the museum's restoration facility.

"The overall project is part of our workforce development efforts to sponsor and to place students," he said.

Robins civilian gets taste of deployed life

BY WAYNE CRENSHAW
wayne.crenshaw.ctr@robins.af.mil

Richard Newton spent 20 years in the Air Force but it wasn't until recently, as a civilian at Robins, he was afforded the opportunity to serve in a war zone.

Newton, 62, jumped at the chance to do a one-year tour in Afghanistan, with a compelling reason to go.

His son, Richard, is serving in the country as a civilian in the Army Corps of Engineers. Newton, who works as an electronics mechanic in the 566th Electronics Maintenance Squadron, also happens to have a background in construction.

His son told him a civilian position was available as a construction quality control inspector and Newton saw it as an opportunity to see what it was like to serve in a combat area while being with his son.

"I just sat down and thought about it, and I wanted to be over there with him to watch out for him," he said.

He went over in April and recently came back for a three-week break. He visited his coworkers in the

Courtesy photo

Richard Newton, an electronics mechanic in the 566th Electronics Maintenance Squadron, deployed to Afghanistan for a year to be closer to his son.

566th, where he works on the Pave Penny targeting system in the Avionics and Instrument Flight.

Flight director Ronnie Massengale said Newton is a key member of the Pave Penny team, but he had no qualms with letting him go for a year, considering the situation.

"It's totally understand-

able that he would want to watch out for his son," Massengale said. "It's a rare opportunity."

Rusty Hodge, Newton's supervisor in the Pave Penny area, said Newton is a mentor to younger members of the team and worked hard before his departure to make sure others were trained to fill his duties.

"He's the best," Hodge said. "He's a workaholic, and he's always in a good mood, except for when Georgia Tech loses."

Newton said he is aware of other father-son pairs in Afghanistan, but they all work in separate areas. Although he and his son don't work together during the day, they are together when they are off duty.

He admits at times he has had second thoughts about his decision, but plans to stick it out.

"I told my son I will be there as long as he is," Newton said.

He has armed Afghan guards who go with him wherever he goes and are "like family." He said he has to wear a 35-pound protective vest and helmet, which he said took some getting used to in the sweltering heat.

Seeing the squalid living conditions of the Afghan people has given him a new appreciation for what most people here take for granted.

"They are so primitive over there," he said. "Anybody who does not appreciate America should be put on a plane and sent over there."

Robins to host Air Force basketball team tryouts

BY WAYNE CRENSHAW
wayne.crenshaw.ctr@robins.af.mil

The Air Force men's basketball team's quest for a fifth consecutive Armed Forces Tournament title starts Monday at the Robins Fitness Center.

Airmen from around the world will be here to try to make the team, which will compete against teams from the Army, Navy and Marines in August.

This is the second year in a row the tryout camp is here, and once again the coaching staff is made up of Team Robins members.

The Air Force team won an unprecedented fourth consecutive title last year, so head coach John Bailey, a civilian employee at Robins, called this year's quest "The Drive for Five."

Bailey acknowledged the odds may be stacked against the team this year.

"It's going to be very difficult," he said. "The other services are getting a little dissatisfied with us finishing first."

Other Team Robins members on the staff include assistant coach Jeff McClain and project officer Eddie Goad. Staff Sgt. Miguel Stewart of the 78th Security Forces is the only Team Robins member trying out for the squad. Seven members of last year's championship team are among the 26 who will try out.

Practices will be in the main gym of the fitness center from 7 to 9:30 a.m. and 1 to 2:30 p.m. From Monday to Wednesday, scrimmages will be each day at 6 p.m.

Bailey said he expects the scrimmages to be highly competitive as those will be key in determining the 12 players to make the team. Everyone is invited to attend both the practices and the scrimmages.

A highlight of last year's camp was a well-attended exhibition game played against the Army team, which

U.S. Air Force file photo by SUE SAPP

John Bailey, right, has coached the Air Force basketball team to four consecutive championships in the Armed Forces tournament. Jeff McClain, left, is his assistant coach.

held its tryout camp at Fort Benning. That won't happen this year as none of the other teams are holding tryouts nearby. However, Bailey said a scrimmage will be with the Mercer Bears team; a date has not been set.

Appreciating spouses

Representatives from the Health and Wellness Center provide information about tobacco cessation to a military spouse at a marketing fair at Horizons. A Military Spouse Appreciation Day event, the fair was organized to help get information about base services to local military spouses.

NOW PLAYING

Tickets - \$4 adult; \$2 children (up to 11 yrs)
For details, call 926-2919.
