**179<sup>th</sup> AIRLIFT WING  
COMMANDER'S ENVIRONMENTAL COMMITMENT STATEMENT**

The Mission of the 179<sup>th</sup> Airlift Wing is to provide highly qualified airmen to engage in homeland, global, and joint missions.

The environmental vision of the 179<sup>th</sup> Airlift Wing is to be recognized as having one of the premiere Environmental Management Programs in the Air National Guard. The vision can be achieved by all personnel through our Mission. This extends to encompass our commitment to environmental protection by continually finding new ways to reduce waste generation, increase recycling efforts, and improve upon the procurement of "green" goods and services. All of this will be accomplished while maintaining compliance with all applicable Federal, State, and Local regulations.

The scope of this policy includes all operations and processes that are conducted at the 179<sup>th</sup> Airlift Wing. This environmental policy does not include any operations conducted at a deployed location.

The goals outlined in this commitment statement are not the only environmental obligations of the 179<sup>th</sup> Airlift Wing. They are an evolving set of ideas and commitments that are subject to change as we accomplish each goal and objective, as regulatory requirements change, and as new opportunities are identified. The 179<sup>th</sup> Airlift Wing is strongly committed to continued leadership in environmental stewardship.

  
GARY A. MCCUE, Col, Ohio ANG
