Subject: 2009 Annual Site Environmental Report for the Lawrence Livermore National Laboratory

The Annual Site Environmental Report was prepared by the Lawrence Livermore National Laboratory (LLNL) for the Department of Energy/National Nuclear Security Administration (NNSA)/Livermore Site Office. This report provides a comprehensive summary of the environmental program activities at LLNL for Calendar Year 2009. This report is prepared annually and is made available to relevant regulatory agencies and other interested organizations and individuals.

The information in this report has been reviewed by NNSA and LLNL personnel for accuracy. The review was based on quality assurance and quality control protocols applied to monitoring and data analyses at LLNL.

LSO appreciates that LLNL is committed to achieving continuous improvement in environmental performance through pollution prevention, energy efficiency, and other related measures; and is committed to conducting its operations in an environmentally safe and sound manner. Remediation activities continue to reduce contaminants at both Livermore Site and Site 300.

The environmental protection and compliance programs at LLNL are implemented to ensure the health and safety of employees, and the residents of neighboring communities, in addition to the preservation of the environment.

Sincerely,

  
Michael G. Brown  
Assistant Manager for  
Environmental Stewardship
