Subject: 2008 Annual Site Environmental Report for the Lawrence Livermore
National Laboratory

The Annual Site Environmental Report was prepared by the Lawrence Livermore National Laboratory (LLNL) for the Department of Energy/National Nuclear Security Administration (NNSA)/Livermore Site Office. This report provides a comprehensive summary of the environmental program activities at LLNL for calendar year 2008. This report is prepared annually and is made available to relevant regulatory agencies and other interested organizations and individuals.

The information in this report has been reviewed by NNSA and LLNL personnel for accuracy. The review was based on quality assurance and quality control protocols applied to monitoring and data analyses at LLNL.

LLNL is committed to achieving continuous improvement in environmental performance through pollution prevention, energy efficiency, and other related measures. Environmental monitoring of emission sources indicates compliance with environmental regulations. Remediation activities continue to reduce contaminants at both Livermore Site and Site 300.

The environmental protection and compliance programs at LLNL are implemented to ensure the health and safety of employees, and residents of neighboring communities, in addition to the preservation of the environment.

Sincerely,

Michael G. Brown
Assistant Manager for
Environmental Stewardship
