

## **Public Notice Submission**

**Provider Name:** La Harpe Telephone Company

**Summary:** La Harpe Telephone Company has deployed fiber and copper broadband xDSL facilities throughout its service territory. As a result, La Harpe Telephone offers 11 Mbps (10 Mbps download/1 Mbps upload) broadband service to all of its customers throughout its service territory which covers the La Harpe and Fountain Green local telephone exchanges. The La Harpe and Fountain Green Local Telephone Exchanges touch parts of four different census tracts and do not serve any census tract in its entirety. It is more accurate to look at La Harpe Telephone's local telephone exchange area rather than an individual census tract.
