

Public Notice Submission

Provider Name: Twin Lakes Telephone Cooperative Corporation

Summary: Twin Lakes Telephone Cooperative Corporation (Twin Lakes) demonstrates that it provides broadband service within the census tracts listed herein. All communities and subscribers within Twin Lake's service area within the listed census tracts have access to adequate and affordable middle mile transport facilities. 100% of the Twin Lakes service territory has access to at least 1 GigE Middle Mile facility, while some are capable of 10 GigE. All of the Twin Lakes Community Anchor Institutions already have access to significant bandwidth availability, therefore additional Middle Mile service through the Twin Lakes service territory is redundant and not necessary. As such, the proposed overlapping service areas contained in the NTIA applications that are currently served by Twin Lake's should not be eligible for funding.
