

Public Notice Submission

Provider Name: Uintah Basin Electronic Telecommunications

Summary: Uintah Basin Electronic Telecommunications respectfully submits this response to the Round 2 BTOP applications. The applications identify the area of Fort Duchesne, and its surrounding area as either unserved or underserved. We challenge such categorization; contrary to the applications, indeed the entire area submitted in the related applications are fully served by our wireless broadband services that exceed the minimum bandwidth speeds required by the Round 2 NOFA. The data submitted with this response, clearly demonstrates the households and business are fully supported with available broadband, fixed or mobile. Broadband subscription rates in the area are near the national average. We have had no problem obtaining necessary Middle Mile facilities from the local provider. We have Middle Mile services connecting our network to Boise, Idaho; Cheyenne, Wyoming; Salt Lake City, Utah; Provo, Utah; Denver, Colorado; and Grand Junction, Colorado.
