

Appendix A: Service Type Identifier (STID) Matrix

The descriptions that follow show the Service Type Identifiers (STIDs) that apply to the basic automation and Full-Service options for Intelligent Mail. You may also wish to refer to the Intelligent Mail Barcode Technical Resource Guide, which can be found at <http://ribbs.usps.gov/>.

Appendix A provides a detailed description of the various address correction options available within basic automation and full-service mailings and the STIDs that provide the different undeliverable-as-addressed (UAA) handling treatments. **NOTE:** Mailers who wish to receive address correction information on nonautomation mailpieces should use the corresponding STID for basic automation option mailpieces unless otherwise defined in Appendix A.

Appendix A is divided into:

- Mail Class (First-Class, Periodicals, Standard Mail, and Bound Printed Matter)

Within each class of mail, it is divided into:

- No address correction or ancillary services desired for handling of UAA mailpieces
- Manual address corrections or for other ancillary services not available in ACS (Address Change Service)
- Traditional ACS
- OneCode ACS
- Full Service ACS

To use Appendix A, follow the below steps:

- Step 1 Determine the Class of Mail that is appropriate.
- Step 2 Determine whether the Mailing Type will be either basic automation or full-service option.
- Step 3 Determine whether or not you want to receive ACS Detail Records.
- Step 4 Determine if you want to receive IMb Tracing scan data.
- Step 5 Select the Mailpiece Disposition desired for any UAA pieces. Note that Mailpiece Dispositions are often similar with minor differences. Select the Mailpiece Disposition that best meets your needs.
- Step 6 Determine whether the associated Mailpiece Disposition requires the use of an Ancillary Service Endorsement (ASE). If not, skip to Step 8.
- Step 7 Determine whether to use a "Recommended Ancillary Service Endorsement (ASE)" or an "Allowable ASE" on your mailpiece by checking the column "Action taken if barcode unreadable".
- Step 8 Understand the fees, if any, that will be associated with the use of the STID and/or the ASE.
- Step 9 Check the Constraints and the Notes columns for applicable information.
- Step 10 When you are certain that you have correctly identified all options and understand the Constraints and Notes use the STID specific to that line item when you create the IMb.

STID	Class of Mail	Notice Type	IMb Service Option	ACS Detail Record Provided to Mailer	IMb Tracing	Mailpiece Disposition	Requires an On-Piece, Text Printed ASE	Recommended ASE Printed on mailpiece	Allowable ASE Printed on Mailpiece	Address Change Service (ACS) Option	Fees	Provides data that can be used to meet the Move Update requirements.	Constraints / Notes	Action taken if barcode is unavailable or invalid
