 - (f) OPNAVINST 3811.1C
 - (g) OPNAVINST S3882.2B (NOTAL)
 - (h) Defense Intelligence Management Document, DOD-0000-151-94, Department of Defense Intelligence Production Program of Jul 94 (NOTAL)
 - (i) SECNAV 5000.2C

1. Purpose

- a. To define objectives and scope of the STILO Program.
- b. To outline STILO Program responsibilities of the Director of Naval Intelligence (DNI) (Chief of Naval Operations (CNO) (N2)) and the Navy STILOs.

2. Cancellation. OPNAVINST 3880.6.

05 Nov 07

3. Background and Definitions

a. The Naval acquisition community must have current, validated intelligence to support Naval program developments. The complexity and speed of technological developments demand the insertion of threat information at the earliest phase of the system development cycle. The cost and complexity of design, research, development, test, evaluation, procurement, installation, maintenance, and modification of modern Naval systems require continued intelligence support throughout the life cycle of those systems. The STILO Program is a "community of interest," specifically designed by the Navy to provide consistent intelligence support, liaison, and coordination among the acquisition, research, development, test, and evaluation (RDT&E) and intelligence communities. The program incorporates a wide range of collaborative techniques and methodologies to ensure effective interagency networking. Efficiencies are gained through identifying, sharing, leveraging, and expanding collaborative relationships and best practices between participating STILO activities. This instruction has been administratively revised and should be read in its entirety.

b. The Commander, Office of Naval Intelligence (ONI) directs and coordinates much of the intelligence collection, production, and dissemination to satisfy Navy intelligence information requirements.

c. The STILO acronym was selected to reflect the strong reliance of the RDT&E community upon scientific and technical (S&T) intelligence support. Increasingly, that support has diversified to encompass a broader spectrum of intelligence requirements which goes well beyond traditional S&T intelligence boundaries. The STILO designation has been retained because its brand name recognition is a valuable asset in the business of obtaining intelligence support.

d. The STILO Program was established in 1970 to strengthen the interface and flow of intelligence between the intelligence community (IC) and non-IC Navy components that require intelligence support. The long history of the program has resulted in mature and trusted relationships within the acquisition, Naval laboratory, academic, and intelligence communities. The primary STILO objectives are:

(1) To channel and expedite intelligence flow from the IC to Navy acquisition and RDT&E activities in a manner that consistently satisfies program requirements;

05 Nov 07

(2) To reduce duplication of effort among STILO participants and the IC;

(3) To establish a method for Navy acquisition and RDT&E activities to access experienced intelligence professionals as primary points of contact for intelligence matters within those activities;

(4) To develop a partnership for the sharing of technical information and expertise between the national IC and Navy RDT&E centers; and

(5) To ensure that security concerns regarding "need to know" are satisfied in accordance with reference (a). The STILO at an activity may also serve as the activity's Senior Intelligence Officer (SIO) as described in reference (b).

4. Scope

a. The STILO Program is designed to support the intelligence needs of the Navy's acquisition community, including the systems commands, Program Executive Offices (PEOs), warfare centers, systems centers, and their RDT&E field activities.

b. Naval systems commands, RDT&E Centers, and Laboratories which participate in the Navy's STILO Program shall designate STILOs and provide essential resources and facilities. STILO Program funding and billet management are the responsibility of the parent activities. These STILOs serve as the single point of contact for obtaining threat intelligence to support their activity's requirements. The STILO Program is in consonance with and facilitates the execution of reference (c).

c. Participation in the Navy's STILO Program is extended to select University Affiliated Research Centers (UARCs), through Commander, Naval Sea Systems Command (COMNAVSEASYS COM) sponsorship. Reference (d) provides enhanced security requirements, procedures, and provisions that apply to UARC STILO activities. UARCs operate under a COMNAVSEASYS COM contract. The COMNAVSEASYS COM STILO office will validate the intelligence-related requirements of UARC STILO offices as outlined in reference (e).

5. Responsibilities

05 Nov 07

a. The DNI (CNO(N2)) is responsible for overall policy direction and coordination of the Navy STILO Program.

b. STILO Program funding and billet management responsibilities are determined and executed by the parent command and funded with CNO resources, with the exception of the ONI STILO. The ONI STILO acts as the Program Coordinator and is funded out of General Defense Intelligence Program funds.

c. ONI fulfills the STILO Program coordination responsibility for the DNI. The ONI STILO is responsible for the day-to-day operations and coordination with the STILO offices. Specifically, the ONI STILO will:

(1) Be proactive in facilitating a robust intelligence sharing network. Coordinate intelligence support to, and information sharing within, the STILO community to ensure consistent, effective intelligence support to the Navy acquisition and RDT&E community;

(2) Serve as the primary point of contact between the Navy acquisition and RDT&E activities and the IC;

(3) Coordinate products and activities among STILO organizations that share common interests;

(4) Conduct STILO conferences (at least annually) to assure effective program management and currency of intelligence available to STILOs; and

(5) Coordinate with acquisition and RDT&E community STILOs to obtain technical and engineering assistance for the IC when required.

d. Naval Systems Commands, RDT&E Centers, and Laboratories that participate in the Navy's STILO Program shall designate STILOs and provide essential resources and facilities. The STILO function should be established at the staff level with direct access to the commander/technical director for intelligence policy matters. The designated STILO shall be aware of planned and ongoing command programs and projects to ensure they receive appropriate intelligence support. The STILO shall be alert to applicable intelligence already available, establish requirements for that which is not available, and be aggressive in the pursuit of both. Specifically, and as

05 Nov 07

described by the threat support responsibilities identified in reference (f), the STILO shall:

(1) Keep the commanding officer or activity director informed of intelligence and technological developments that impact on the command's mission and assigned programs and projects. STILOs should be given an appropriate level of access to special access programs at their activities to ensure adequate intelligence support is provided to these programs;

(2) Exercise overall management of Sensitive Compartmented Information (SCI) programs and that portion of the Defense Special Security System (DSSS) under the SIO's security cognizance; execute other SIO duties as described in reference (b);

(3) Maintain a current file of intelligence requirements pertaining to activity acquisition programs and RDT&E projects;

(4) Ensure Navy systems development and acquisition programs consider and use valid, current intelligence appropriate to their programs;

(5) Review proposed technical approaches, technical development plans, and/or test plans for appropriate and adequate intelligence input;

(6) Coordinate the submission of requests for threat support, intelligence Production Requirements (PRs), and statements of intelligence interest (SIIs);

(7) Assure compliance with restrictions on use of contractor-produced threat assessments in development and acquisition efforts in accordance with reference (f); assist command program/project managers in identifying required contractor intelligence support;

(8) Prior to execution of any contract DD Form 254 which shows a "yes" in block 10e(1) for SCI, coordinate with the sponsor's SCI Information Security Department to assure compliance with contracting procedures defined in reference (c). Review other DD Form 254 documents on a case-by-case basis to ensure appropriate intelligence support is considered;

(9) Coordinate activity requirements for special intelligence billets and clearances with the Special Security

05 Nov 07

Officer; provide expertise and assistance when required to establish sensitive intelligence-related compartmented programs;

(10) Assist the IC in obtaining technical expertise when requested;

(11) Maintain liaison with the STILOs of other activities in the acquisition/RDT&E community and act as the primary point of contact with the IC;

(12) Coordinate the command's involvement in foreign material acquisition and exploitation, including the submission of command/activity requirements for acquisition and exploitation. Reference (g) pertains;

(13) Act as the primary command point of contact for the Foreign Military Intelligence Collection Activities (FORMICA) Program;

(14) Serve as the activity's tasking authority for required intelligence and threat support;

(15) Serve as the sole command/activity authority for tasking the IC (through ONI) for intelligence and threat support, including coordinating funding to support such tasking when ONI requires such funding. All requests for intelligence, unless signed by a flag officer or member of the Senior Executive Service, must be originated by the activity's STILO office or contain a statement that the activity's STILO has approved the request; and

(16) Serve as the activity's point of contact for providing customer feedback to the IC, coordinating with end-users as necessary.

6. Procedures. Navy acquisition and RDT&E activities, through their STILOs, shall request intelligence support and conduct coordination and liaison with other intelligence organizations as outlined below. Prior to submitting a PR, the STILO is responsible for reviewing existing holdings and searching Intelink (SIPRNET and/or JWICS) to ensure new intelligence production is needed to fulfill a request for support. These procedures are not meant to inhibit routine, informal liaison and information exchange.

a. Government STILOs should maintain a Community On-line Intelligence System for End Users and Managers (COLISEUM)

05 Nov 07

account; COLISEUM is the preferred method of assigning requirements. Requests for intelligence products should be submitted to the Navy Validation Office (VO) in the PR format described in reference (h). E-mail, electronic message, FAX, or mail should only be used if COLISEUM is not available. At a minimum, PRs are required for:

(1) Requirements for mandatory threat assessment support to Navy systems development programs required by references (f) and (i);

(2) Other requirements which will result in one-time or recurring publications; and

(3) All requirements that will be satisfied by a Department of Defense (DoD) intelligence production center other than ONI.

b. The Navy VO shall either:

(1) Decide that an existing product will satisfy the customer's requirement, in which case the product will be ordered and delivered to the customer; or

(2) Determine that new production is required, in which case the customer's draft PR will be submitted by the VO as a validated PR to the DoD intelligence production center best-suited to satisfy the customer's requirement. Reference (h) applies.

c. Requests for ONI intelligence briefings should be directed to ONI tasking/operations via COLISEUM, e-mail, FAX, message, or mail. To ensure briefer availability and a clear understanding by ONI of the customer's requirement, pre-coordination with the pertinent analytical office within ONI is strongly encouraged.

d. Intelligence collection requirements prepared in response to IC solicitations for use in time-sensitive collection will be forwarded to ONI Operations.

e. Visits by activity STILOs to ONI are encouraged. All visits, regardless of length, shall be coordinated in advance with the ONI STILO coordinator.

f. Visits to ONI by acquisition/RDT&E scientists and engineers are welcome but shall be coordinated with the activity

05 Nov 07

STILO, who will ensure that prospective visitors have already reviewed intelligence available locally and that the proposed visit is not duplicative of other ongoing efforts. The notification requirements described in paragraph 6e shall also apply to these visits. Professional contacts and relationships between ONI analysts and RDT&E personnel are strongly encouraged, provided the activity STILO is kept informed. This procedure should be followed regardless which organization (i.e., ONI or the RDT&E activity) initiated the contact or who benefits from the exchange(s). For long-term or ongoing projects, once initial contact has been coordinated through the activity STILO, follow-on visits pertaining to that specific project need not necessarily be coordinated through the STILO.

g. In the spirit of paragraphs 6e and 6f, visits by ONI personnel to RDT&E field activities should be coordinated with the activity STILOs.

h. Requests for liaison/visits by cleared personnel from Navy acquisition and RDT&E activities to other intelligence agencies, such as the National Security Agency or the Central Intelligence Agency, will be coordinated through the RDT&E center STILO office.

i. Proposals for in-house or contractor studies and analyses on foreign threats or other intelligence-related subjects will be coordinated with the responsible service or agency authority.

j. UARC participation in the STILO Program is sponsored by and subordinate to COMNAVSEASYSKOM. Accordingly, and as outlined in reference (e), UARC STILOs shall forward a copy of all requests for support to the COMNAVSEASYSKOM STILO office for endorsement.

7. Action. Revise all directives at variance with the foregoing.
