## Overview - National Defense Budget Estimates for FY 2012

The National Defense Budget Estimates, commonly referred to as "The Green Book," is a convenient reference source for data associated with the current budget estimates of the Department of Defense (DoD). It also provides current (nominal) and constant dollar historical data for the Department, as well as selected data on all National Defense, the total Federal Budget, and the U.S. economy. This edition reflects the FY 2012 President's Budget as submitted to Congress in February 2011. Dollar amounts for FY 2011 reflect the Annualized Continuing Resolution funding level, consistent with those exhibited in the President's Budget submission.

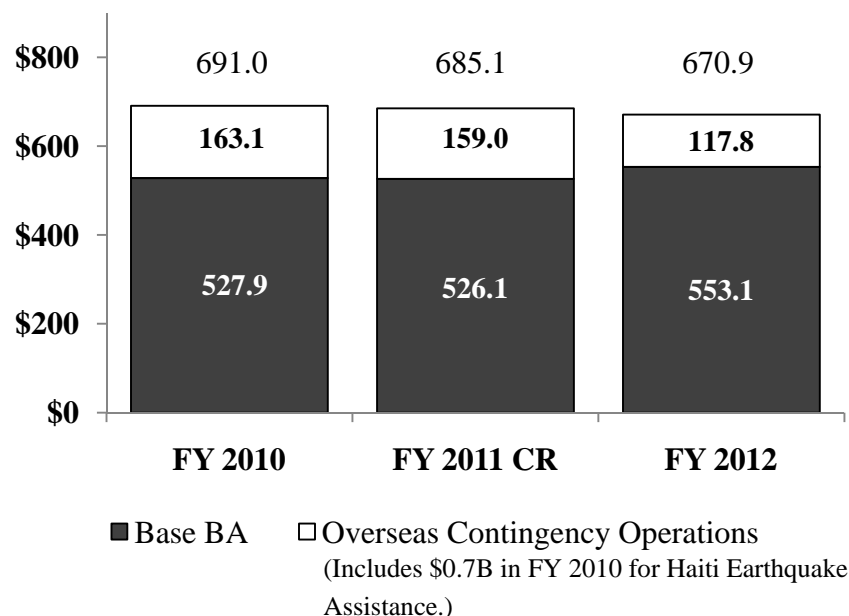

The FY 2012 Green Book may be used as a companion to the FY 2012 Budget Request Summary Justification Book. However, while the Justification Book speaks mainly to the Department's budgetary request in terms of discretionary budget authority, most tables in the Green Book display combined discretionary and mandatory dollars. The difference between discretionary and mandatory funding is discussed later, and can also be found in the Glossary of Terms on page 241.

Also to follow is a short guide to understanding the data presented in this document. There is an explanation of budget authority vs. total obligational authority, along with outlays. Next is a section on discretionary, mandatory, and emergency funding. Current vs. constant dollars, a mainstay of inflationary analysis, is then discussed, followed by an explanation of deflators. Finally there is a description of this book's calculation methodology and how rounding plays a role in the final product.

### Budget Authority, Total Obligational Authority, and Outlays

Green Book funding data are provided in three standard categories: budget authority (BA) (both discretionary and mandatory authority is included in most tables), total obligational authority (TOA), and

**Department of Defense  
Discretionary Budget Authority**  
(As Reflected in the FY 2012 President's Budget Submission)  
(Dollars in Billions)

outlays. While DoD analysts distinguish between BA and TOA, BA is what the general public recognizes as the amount of funding appropriated to the DoD by Congress (in most cases). It is authority given to the government to incur legally binding obligations (signing contracts and placing orders), which will result in current year and future outlays. On the other hand, TOA is a DoD financial term expressing the value of the direct Defense program for a fiscal year, exclusive of the obligation authority from other sources such as reimbursable orders accepted. Some differences between BA and TOA are listed below:

- If BA expires before obligations are incurred, the TOA for that year is reduced by the expired amount. There is no effect on BA.
- If legislation (proposed or enacted) transfers the unobligated balance of one account to another, where the purpose of the balance has changed, scoring rules require that transfer to be reflected as a change in BA in the year in which the transfer occurred (reduction of BA in the losing account, increase of BA in the gaining account). The adjustment to TOA will be in the original program, regardless of when the transaction occurred.
- Reappropriations (the extension of availability of previously appropriated funds) are scored as BA in the first year of extended availability, while TOA is unchanged.
- Rescissions (congressional action canceling new budget authority or unobligated balances) are reflected as a reduction to BA in the fiscal year in which the rescission is enacted. However, TOA reflects this adjustment in the program year of the rescinded funds (i.e., fiscal year funds were appropriated). If rescissions are proposed in the budget, they would be reflected in the TOA as if enacted.
- Net offsetting receipts (collections from the public that arise out of business-type or market-oriented activities of the government, and are deposited in receipt accounts) are deducted from BA, but have no effect on TOA.

The third category of data reflected in this book is outlays, also known as expenditures or disbursements. Outlays are the liquidation of the government's obligations and generally represent cash payments. Outlays in a given fiscal year may represent the liquidation of obligations incurred over a number of years. There is a time lag between budgeting funds (congressional appropriation), signing contracts and placing orders (obligations), receiving goods or services, and making payments (liquidation of obligations). For acquisition and construction programs, the Department operates under a "full funding" policy by which Congress approves, in the year of the request, sufficient funds to complete a given quantity of

items or build a facility, even though it may take a number of years to actually build and deliver these items. Thus, in exceptional cases (such as the building of an aircraft carrier), final outlays may be recorded a decade after the BA for the program was originally granted.

### **Discretionary, Mandatory, and Emergency Programs**

Discretionary programs are funded annually through the congressional appropriations process. The scorekeeping guidelines in the Budget Enforcement Act (BEA) of 1990, as amended, established annual limits on the amount of BA and outlays available for these programs. Though the BEA expired in 2002, OMB and the Congressional Budget Office continue to apply many of the concepts and scorekeeping principles embodied within the Act, such as pay-as-you-go requirements.

Mandatory programs, also known as "pay-as-you-go" or PAYGO programs, are direct spending programs and receipts defined as entitlement authority. This is BA authorized by permanent law, rather than annual appropriations acts. Social Security and Medicare are examples of mandatory programs. The Military Retirement and Medicare-Eligible Retiree Health Care Funds are examples of DoD-specific mandatory programs. Even though the BEA expired, the Administration has proposed that statutory PAYGO requirements be reinstated in slightly modified forms.

Emergency programs are programs that the President deems "emergency requirements" and are designated as such in law by Congress. Many supplemental appropriations are designated "emergency." Supplemental appropriations provide additional budget authority for unanticipated activities or requirements too urgent to be delayed until the regular appropriation is enacted. Emergency programs are not bound by the overall caps on discretionary programs. Once these emergency appropriations are released, they are recorded as discretionary funding, and the BEA caps are adjusted accordingly.

Programs specifically noted in the budget resolution, such as Overseas Contingency Operations, are treated as emergency programs for scoring purposes.

The Department of Defense is unique in that it is one of the few Federal entities where the majority of its funding falls into the discretionary category. The majority of the entire Federal Budget is mandatory, and much of the discretionary funding in the budget goes to DoD. The dollar amounts listed in this book are mainly comprised of discretionary, mandatory, and enacted supplemental funding rolled together.

### **Current Dollars and Constant Dollars**

The Green Book displays dollar amounts in both current dollars and constant dollars. If an item or service is priced in current dollars, the price includes all inflationary changes expected to occur in the program over the duration of the spendout of that program's appropriation.

Constant dollars measure the value of purchased goods and services at price levels that are the same as the base year level. Constant dollars do not contain any adjustments for inflation that have occurred outside the base year. Thus, by looking at dollar amounts across various years in the constant-dollar format, one will see the program changes, often referred to as "real growth." This will show how much programs have increased or decreased in cost – without the impact of inflation.

Through understanding current dollars and constant dollars, variations in purchasing power become evident. If one dollar buys one widget in 2009, but in 1950 one dollar purchased five widgets, purchasing power has declined. Inflation is usually a dominant factor in the decline of purchasing power. A current-dollar analysis portrays the DoD as spending much more now than it did in 1950, but a constant dollar analysis reveals that the percentage of program growth (its "real growth") is not as great.

It is important to note that many inflation indices, such as the Gross Domestic Product (GDP) index, are chain-weighted. This means they account for differences in products purchased over the years; new expenditure patterns are accounted for in the inflation figure. For example, if typewriters were regularly purchased in 1970, but by 2000 had become obsolete in favor of PCs, a chain-weighted index would account for this new purchasing pattern.

### **Deflators**

Deflators are the ratio of current prices to constant prices. They are a measure of broad price movements in the economy. The deflator in the base year always equals 100. For purposes of the Green Book, the base year is the budget year (budget request year) - FY 2012 in this edition. A deflator of 50 tells you that the current price is half the base year price, while a deflator of 200 means the current price is twice the base year price.

#### **Deflator Definition and Usage**

##### **Definition:**

$$\text{Deflator (for a given base year)} = \frac{\text{Current \$}}{\text{Constant \$}} \times 100$$

##### **Example:** Determining FY 2002 DoD Budget Authority in FY 2012 Constant Dollars

$$\text{Deflator (FY 2002 \$ to FY 2012 \$)} = 77.17$$

$$\text{FY 2002 Budget Authority (Current \$)} = \$345.6\text{B}$$

$$\text{FY 2002 Budget Authority (FY 2012 Constant \$):}$$

$$\text{Constant \$} = \frac{\text{Current \$}}{\text{Deflator}} \times 100 = \frac{\$345.6\text{B}}{77.17} \times 100$$

$$\text{Constant \$} = \$447.8\text{B}$$

## **Calculation Methodology and Rounding**

The DoD arrives at the figures in this book using inflation rates published by the Office of Management and Budget (OMB) as a baseline. The OMB bases their rates on Gross Domestic Product (GDP) composite rates, accounting for non-pay factors. The DoD, however, includes pay, fuel, and medical accrual factors in its composite rates. In addition, outlay rates for each account/appropriation are factored into the final DoD inflation rates.

There are some discrepancies between the dollar amounts shown for several DoD accounts in this document, and those same figures in OMB publications. These differences result from the way in which account totals are calculated and scored. For example, beginning

with the FY 1998 budget, OMB added data that had been rounded to the millions of dollars, while all DoD data in this book were derived from non-rounded data in the thousands. In those instances where a discrepancy exists, an amount is displayed as “OMB scoring and rounding.” In this edition, OMB displays FY 2011 totals that equal the FY 2011 President's Budget request, while DoD displays totals that equal the FY 2012 Annualized Continuing Resolution funding level. This will cause discrepancies as well.

In those tables for which column totals appear, small differences between the total shown and the sum of the column entries are possible. The discrepancies are also due to rounding.

# Chapter 1: National Defense – An Overview

This chapter provides an overview of the National Defense function of the federal budget. The National Defense Function (function 050) includes: DoD military activities (subfunction 051); the atomic energy defense activities of the Department of Energy (subfunction 053); and defense related activities of other federal agencies (subfunction 054).

Dollar amounts are provided in three standard categories: Budget Authority (BA) (discretionary and mandatory), Total Obligational Authority (TOA), and Outlays.

1/ "Actual" column consists of outlays for base plus enacted OCO and supplemental funding.

2/ OCO outlay data reflects outlays from that year's OCO funding only.

3/ In FY 2011, OMB totals reflect the amount requested in the FY 2011 President's Budget submission, while DoD reflects the Annualized Continuing Resolution funding level. The effects of this delta carry past FY 2011 as well.

4/ From OMB Analytical Perspectives table 27-14 (Baseline Budget Authority and Outlays by Function, Category, and Program).

# Chapter 2: Base Budget, War Funding and Supplementals

This chapter provides data on war and supplemental funding for the Department of Defense. War and supplemental funding dollars presented here include the American Recovery and Reinvestment Act of 2009, disaster assistance, the Global War on

Terror, Overseas Contingency Operations, and funding for other emergency and unanticipated urgent requirements. For fiscal years 2013 through 2016, OMB reports \$50B each year as an OCO request placeholder.

# Chapter 3: Legislative Authorization

Authorization legislation provides the authority for an agency to carry out a particular activity. This legislation may be annual, for a specified number of years, or indefinite. Most National Defense activities require annual authorization. Table 3-1 provides a reconciliation between the FY 2012 DoD Authorization Request, Appropriation Request, Budget Authority (BA), and Total

Obligational Authority (TOA). Table 3-2 presents personnel authorizations enacted for FY 2010 and FY 2011, and the FY 2012 budget request for the DoD. Selected Reserves are shown as end strength in accordance with Congressional direction.

# Chapter 4: Chronology

Chronologies are important because of the scorekeeping provisions of the Congressional Budget and Impoundment Act. Table 4-1 provides a chronology of FY 2010 National Defense budget authority, beginning with the FY 2010 budget estimate for the budget submitted to Congress in May 2009. This estimate reflects congressional action, rescissions/reappropriations, and transfers, resulting in the FY 2010 column of the FY 2011 budget submitted to Congress in February 2010. Finally, appropriations/rescissions,

contract authority, and other adjustments are shown, resulting in the FY 2010 column of the FY 2012 budget request submitted to Congress in February 2011. Similarly, table 4-2 provides a chronology of FY 2011 National Defense budget authority, beginning with the FY 2011 budget estimate for the FY 2011 budget request, and ends with the FY 2011 column of the FY 2012 budget request.

# Chapter 5: Treatment of Inflation

Inflation is an increase in the general level of prices in the economy. Inflation does not mean that prices rise evenly or that all prices are rising. Some prices may be constant and others actually may be falling. Prices of some commodities rise faster than others because of differences in the magnitude and direction of changes in supply and demand in various markets. Chapter 5 provides

the standard economic factors, known as deflators, for calculating the effect of changes in price.

<b>Tables</b>	<b>Pg</b>
<b>5-1 DoD and Selected Economic Indicies</b> .....	<b>53</b>
<i>Inflation indices, in base year FY 2012, for selected economy-wide measures as a comparison of inflation in DoD with that in the general economy.</i>	
<b>5-2 Pay and Inflation Rate Assumptions – Outlays</b> .....	<b>55</b>
<i>Pay and inflation assumptions used in the FY 2012 budget for DoD outlays. These rates are based on the Office of Management and Budget (OMB) guidance which reflects the change in the Gross Domestic Product (GDP) deflator. The historical inflation rates for fuel are based on the change in the cost per barrel paid by the customer to the stock fund while the outyear forecasts of fuel increases are based on the Administration's estimate of Refiners Acquisition Cost (RAC). Inflation estimates for all other purchases are in line with the GDP deflator.</i>	
<b>5-3 Pay and Inflation Rate Assumptions – BA</b> .....	<b>56</b>
<i>Pay and inflation assumptions used in the FY 2012 budget for DoD Budget Authority. The pay raises are annual rates and parallel Table 5-2. The purchases rates are based on the annual outlay rates in Table 5-2 converted to Budget Authority using the spendout profiles published in Table 5-11.</i>	
<b>5-4 DoD Deflators – TOA by Appropriation Title</b> .....	<b>57</b>
<i>Inflation indices in base year FY 2012 for each DoD appropriation title to be used in converting Total Obligation Authority from current to constant FY 2012 dollars.</i>	
<b>5-5 DoD Deflators – TOA for Pay and Purchases</b> .....	<b>58</b>
<i>Inflation indices in base year FY 2012 to be used in converting pay and purchases Total Obligation Authority from current to constant FY 2012 dollars.</i>	
<b>5-6 DoD Deflators – BA by Appropriation Title</b> .....	<b>59</b>
<i>Inflation indices in base year FY 2012 for each DoD appropriation title to be used in converting Budget Authority from current to constant FY 2012 dollars.</i>	
<b>5-7 DoD Deflators – BA for Pay and Purchases</b> .....	<b>60</b>
<i>Inflation indices in base year FY 2012 to be used in converting pay and purchases Budget Authority from current to constant FY 2012 dollars.</i>	

**5-8 DoD Deflators – Outlays by Appropriation Title** ..... **61**  
*Inflation indices in base year FY 2012 for each DoD appropriation title to be used to convert outlays from current to constant FY 2012 dollars.*

**5-9 DoD Deflators – Outlays for Pay and Purchases** ..... **62**  
*Inflation indices in base year FY 2012 to be used in converting pay and purchases outlays from current to constant FY 2012 dollars.*

**5-10 Long-Range Inflation – Defense** ..... **63**  
*Chronology of inflation estimates since January 1986, showing that estimated inflation rates for a given year are revised many times before becoming actual.*

**5-11 Outlay Rates for Incremental Changes in BA Purchases** ..... **65**  
*Outlay rates used in developing outyear inflation factors for estimating future costs of Defense purchases. These rates, derived from rates used to develop the overall outlay estimates, do not account for lapses in the accounts and only reflect the spending profile for Defense purchases, excluding fuel.*

**5-12 Military and Civilian Pay Increases Since 1945** ..... **68**  
*Military and civilian [general schedule] pay increases from 1945 to the pay raises assumed in the FY 2012 budget request.*

**5-13 Civilian Pay Deflators by Category** ..... **69**  
*Pay indices in base year FY 2012 for each component of civilian pay in DoD.*

**5-14 DoD Deflators – BA by Appropriation Title (Base Discretionary BA)** ..... **71**  
*Inflation indices in base year FY 2012 for each DoD appropriation title to be used in converting non-supplemental, discretionary-only Budget Authority from current to constant FY 2012 dollars.*

This chapter organizes a compilation of relevant U.S.-wide economic data, including Gross Domestic Product (GDP), employment figures, and historical spending.

Comparable DoD statistics are also presented to facilitate analysis and reveal trends.

## GLOSSARY OF TERMS

<b>Aggregate Price</b>	The Aggregate Price is a weighted average of individual prices, where each price is weighted by an item's contribution to total expenditures. The aggregate price is thus a notional price developed to measure changes in inflation and is greatly affected by the relative mix of the items considered, and the change of that mix over time.
<b>Annual Rate of Change in Prices</b>	The Annual Rate of Change measures the year-to-year change in prices, computed by dividing one year's aggregate price by the preceding year's aggregate price.
<b>Base Year</b>	The Base Year is a point of reference representing a fixed price level, and is expressed as 1.00 (e.g., FY 2012 = 1.00). The base year for a set of indexed numbers can be changed to another year by dividing each number in the series by the index for the desired base year.
<b>Budget Authority (BA)</b>	BA is the authority to incur legally binding obligations of the Government which will result in immediate or future outlays. Most Defense BA is provided by Congress in the form of enacted appropriations.
<b>Constant Dollars</b>	Constant dollars measure the value of purchased goods and services at price levels which are the same as the base or reference year. Constant dollars do not contain any adjustments for inflationary changes that have occurred or are forecast to occur outside the base year.
<b>Current Dollars</b>	An item or service is priced in Current dollars if the prices contain all inflationary increases expected to occur in a program over the duration of the spendout of an appropriation. Current dollars are also called “then year” dollars, “budget” dollars, or “fully inflated” dollars.
<b>Discretionary Programs</b>	Discretionary programs are funded annually through the appropriations process. The scorekeeping guidelines in the Budget Enforcement Act (BEA) of 1990, as amended, established annual limits or “caps” on the amount of BA and outlays available for these programs.
<b>Emergency Programs</b>	These are programs that the President designates as “emergency requirements,” and Congress so designates in law. They are not bound by the overall caps on discretionary programs. Once these emergency appropriations are released, they are recorded as discretionary and the BEA caps are adjusted accordingly.

**Gross Domestic Product (GDP)**

GDP measures the market value of all goods and services produced during a particular time period by individuals, businesses and government in the United States, whether they are U.S. or foreign citizens or American-owned or foreign-owned firms. It includes income earned on U.S. soil by both foreign-owned corporations and foreign citizens, but excludes income earned abroad by both U.S.-owned corporations and U.S. citizens.

**Gross National Product (GNP)**

GNP measures the market value of all goods and services produced during a particular time period by U.S. individuals, businesses and government. It includes income earned abroad by both U.S.-owned corporations and U.S. citizens, but excludes income earned on U.S. soil by both foreign-owned corporations and foreign citizens.

**Index**

An Index is a component of a time series which measures the change in prices from a fixed point in time, and is calculated by setting the base year equal to one, and then multiplying the index value of each year by one plus the annual rate of change of the next year.

**Inflation**

Inflation is a change in the general level of prices in the economy. Inflation does not mean that prices rise evenly or that all prices are rising. Some prices may be constant and others actually may be falling. Prices of some commodities rise faster than others because of differences in the magnitude and direction of changes in supply and demand in various markets. There are many different measures of inflation:

- (1) GDP Implicit Price Deflator - The Gross Domestic Product (GDP) implicit price deflator, generally regarded as the best single measure of broad price movements in the economy, is the ratio of GDP in current prices to GDP in constant prices.
- (2) Consumer Price Index - The Consumer Price Index (CPI) is a measure of the average change over time in the prices paid by urban consumers for a fixed market basket of consumer goods and services. Although it is often called the “Cost-of-Living Index,” it measures only price changes, just one of several factors affecting living costs. The CPI reflects spending patterns for each of two population groups: All Urban Consumers (CPI-U), representing a majority of the U.S. population, and Urban Wage Earners and Clerical Workers (CPI-W), which are a subset of the CPI-U’s population.
- (3) DoD Purchase Index - The DoD Purchase Index developed by OUSD(C) consists of outyear projections based upon fiscal guidance from OMB, linked to actual DoD purchase price experience also calculated by OUSD(C).

**Mandatory Programs**

Mandatory programs, also known as “pay-as-you-go” or PAYGO, are direct spending programs and receipts defined as entitlement authority. This is BA authorized by permanent law, rather than annual appropriations acts.

**National Defense**

The National Defense Function (function 050) includes: DoD military activities (subfunction 051); the atomic energy defense activities of the Department of Energy (subfunction 053); and defense related activities of other federal agencies (subfunction 054).

**Outlays**

Outlays, or expenditures/disbursements, are the liquidation of the Government's obligations. Outlays generally represent cash payments. Outlays in a given fiscal year may represent the liquidation of obligations incurred over a number of years. There is a time lag between budgeting funds (congressional appropriation), signing contracts and placing orders (obligations), receiving goods or services and making payments (liquidating obligations). For major acquisition and construction programs, the Department operates under a "full funding" policy by which Congress approves, in the year of the request, sufficient funds to complete a given quantity of items, even though it may take a number of years to actually build and deliver these items. Thus, in extreme cases (such as building an aircraft carrier), final outlays may be recorded a decade after the budget authority for the program is approved.

**Real Growth**

Real Growth or program growth is the amount of growth that doesn't come from inflation. It is the year-to-year change in constant dollars - usually expressed as a percentage, and is computed by dividing the constant dollars for one year by the constant dollars of the previous year and subtracting one. Real growth always implies a relationship between two or more time periods.

**Spendout Rates**

Spendout Rates (also called outlay or expenditure rates) are the expected cash flow for a given appropriation expressed as the percent expected to be spent in a given year. These rates are appropriation unique and range from one year in the pay accounts to as much as ten years in ship construction.

**Total Obligational Authority (TOA)**

TOA is a DoD financial term which expresses the value of the DIRECT Defense program for a fiscal year. TOA may differ from BA for several reasons, including:

- (1) BA lapsing before obligations were incurred (decreasing TOA with no effect on BA).
- (2) Proposed or enacted legislation transferring unobligated balances for which the purpose of the balances has changed. Scoring rules require that such a transfer be reflected as a change in BA in the year in which the transfer occurs (reduction of BA in the losing account, increase of BA in the gaining account). TOA is adjusted in the original program, regardless of when the transaction occurs.
- (3) Reappropriations (the extension of availability of previously appropriated funds). Reappropriations are scored as BA in the first year of extended availability. TOA is unchanged.

- (4) Rescissions (Congressional action canceling new budget authority or unobligated balances). Scoring rules require that rescissions be scored as reductions in budget authority in the fiscal year in which the rescissions are enacted. TOA is adjusted in the program year of the rescinded funds. If rescissions are proposed in the budget, they would be reflected as if enacted.
- (5) Net Offsetting Receipts (collections from the public that arise out of the business-type or market-oriented activities of the Government and are deposited in receipt accounts). Net offsetting receipts are deducted from BA but have no effect on TOA.

## END NOTES

### **Gross National Product & Gross Domestic Product**

In December 1991, U.S. National Income and Product Accounts (NIPAs) shifted emphasis from the Gross National Product (GNP) to the Gross Domestic Product (GDP). Both GNP and GDP measure output at market prices, but in a slightly different manner. The distinction between GNP and GDP is not very great for the United States because relatively few U.S. citizens work abroad, and U.S. earnings on foreign investments are about the same as foreign earnings in the United States.

### **Change in Account Structure**

In FY 1992 and FY 1993, funds were appropriated in Defense accounts which supported domestic, rather than defense, programs. Using the rules and definitions of the Budget Enforcement Act, OMB scored these appropriations in the correct domestic functions rather than in the DoD Military function (051). Data in this book display the total DoD budget request and include these amounts.

### **Changes in Scorekeeping**

Rescissions: Before the amended FY 1989 budget was submitted, rescissions of prior year unobligated balances were reflected as adjustments only against TOA in the applicable program year. However, since then, both the Congressional Budget Office (CBO) and OMB score such rescissions as reductions to current year BA with one large exception. Fifteen billion dollars were appropriated for the Persian Gulf Regional Defense Fund in FY 1991. Only \$304 million was transferred to other defense accounts to offset Operation Desert Storm costs. The balance of \$14.696 billion was rescinded, and FY 1991 BA was reduced rather than reducing BA in the current year.

Reappropriations were previously scored as new BA in the year of legislation. However, in presenting the amended FY 1989 budget, CBO and OMB directed scoring of reappropriations as BA in the first year of new availability [first year after original availability would lapse].

### **Retired Pay/Accrual**

In accrual-based financing, transactions are counted when the order is made or a service takes place, even if no cash has changed hands yet. Cash-based financing recognizes transactions only when cash is actually received or paid. For FY 1985, the OMB historical tables moved National Defense BA and outlays for the actual Military Retired Pay accounts (which were cash-based) from the DoD Military function (051) to the Income Security function (600), and replaced it with an estimate for Military Retired Pay Accrual. So for the years FY 1948 - FY 1984, the DoD BA and outlay tables in this book reflect military retired pay on a CASH basis. After FY 1984, the BA and outlays reflect only the ACCRUAL cost of military retirement.

The FY 2003 budget shifted the costs of civilian and military health care from central accounts to which they had been charged, to the affected program accounts as accruals. For comparability, OMB included imputed amounts for these shifts in their FY 2001 and FY 2002 data for the DoD Military function (051). This book

does not include the accrual costs of these transfers, and differences are included in the “OMB rounding difference” line where appropriate.

**Retired Pay Accrual Accounting**

In 1990, updated actuarial assumptions reduced the retired pay accrual Normal Cost Percentage (NCP) for full-time and part-time personnel. The effect is a decrease of about \$2.5 billion annually, beginning in FY 1990. This adjustment is treated as a price change and not as a programmatic change, and military pay deflators have been adjusted accordingly.

**Federal Employees' Retirement System (FERS) Adjustments**

The additional costs for retirement contributions due to enactment of the Federal Employees' Retirement System (FERS) Act of 1986, P.L. 99-335, are included as inflationary increases, and the DoD deflators have been adjusted accordingly.
