
Appendix C

ACS Product Code Information and Details

January 25, 2013

V 1.1

This document provides the ACS Product Codes and their detailed descriptions. These product codes are included on the ACS Invoice that is provided for SingleSource ACS customers billed through the US Postal Service National Customer Support Center Accounting Services Department in Memphis TN.

Appendix C provides the following details:

Product Code: a six-digit number that is assigned to a specific ACS type, mail class, ACS notice type, and mail processing category (shape).

Product Description: the text that is accompanied by the six-digit Product Code on the SingleSource ACS invoice

ACS Type: One of three ACS product options:

- Traditional ACS - the original ACS product dating back to the 1980's and requires the use of a USPS assigned Participant ID (i.e. #BWXYZZZ) and optional keyline on your mail piece. Traditional ACS may also include Shipper Paid Services and will be identified when applicable for the product code.
- OneCode ACS – the original Intelligent Mail barcode (IMb) ACS technology. In addition to other data fields, the IMb contains a Service Type ID that identifies a request for a particular ancillary service, IMb Tracing and mail class; a Mailer ID that identifies the mail owner or mail service provider, a Serial Number that identifies the specific mail piece, and a Routing ZIP Code that identifies the delivery address.
- Full Service ACS – based on OneCode ACS technology, this ACS product option is offered to Full Service mailers. In addition to full-service postage discounts and benefits, Full Service ACS is provided at no charge for qualifying full-service mail pieces.

Mail Class: the classification of domestic mail according to content (e.g., personal correspondence versus printed advertising). The following mail classes are identified in this document:

- First Class – A class of mail that includes all matter wholly or partly in writing or typewriting, all actual and personal correspondence, all bills and statements of account, and all matter sealed or otherwise closed against inspection. Priority Mail is a subclass of First-Class Mail.
- Periodicals – A class of mail consisting of magazines, newspapers, or other publications formed of printed sheets that are issued at least four times a year at regular, specified intervals (frequency) from a known office of publication. Periodicals usually must have a legitimate list of subscribers and requesters.
- Standard Mail – A class of mail that weighs less than 16 ounces. It comprises the subclasses of Regular Standard Mail, Nonprofit Standard Mail, Carrier Route Standard Mail, and Nonprofit Carrier Route Standard Mail. These subclasses include circulars, printed matter, pamphlets, catalogs, newsletters, direct mail, and merchandise.
- Package Services – class of mail that comprises three subclasses: Bound Printed Matter, Library Mail, and Media Mail.
- Parcel Select – a commercial based product for small and large parcels typically containing gifts and merchandise can be sent using Parcel Select.
- Standard Post – formerly “Parcel Post”, a retail based product with prices based generally on weight and zone.
- Bound Printed Matter – Bound Printed Matter is typically catalogs, directories, books, and other printed material that weigh up to 15 pounds and meet specific eligibility standards

Mail Shape: A mail processing category of mailpieces which include the following:

- Letters including cards, that do not exceed any of the dimensions for letter-size mail (i.e., 11-1/2 inches long, 6-1/8 inches high, 1/4 inch thick)
- Flats - The general term for flat-size mail, so called because the large mail is sorted without bending it so that the mail remains flat.
- Parcels - Mail that does not meet the mail processing category of letter-size mail or flat-size mail. It is usually enclosed in a mailing container such as a box.

Fee Charged: the address correction fee or postage and additional service fees charged for the product code. Address correction fees are charged for electronic or automated address correction notices and are assigned according to the ACS type, mail class and mail shape.

- **Automated** address correction fees are charged for First Class Mail and Standard Mail letters that can be processed on letter automation and use the Intelligent Mail barcode to receive address correction information via ACS.
- **Electronic** address correction fees are charged for:
 - Traditional ACS (regardless of mail shape or mail class)
 - Flat-sized mail
 - Parcels
 - Nonmachinable and non-automatable letters
 - Periodicals mail.
- **Forwarding Postage and Fees** in this document pertains to any additional charges that are applied to the product or service, such as postage for shipper paid services such as Shipper Paid Forwarding and Additional Service Fees applied to undeliverable Parcel Select mail.

Actual fees and postage charged is identified in [DMM Notice 123](#).

The following table describes the ACS Product Code assignment rules:

POSITION	PRODUCT CODE BREAKDOWN
1ST 2 CHARACTERS	30 = TRADITIONAL ACS
	31 = ONE CODE ACS
	33 = FULL SERVICE ACS NOT ASSOCIATED TO EDOC
	34 = FULL SERVICE ACS NOT FS COMPLIANT
	36 = FULL SERVICE ACS QUALIFIED
3RD CHARACTER	1 = FIRST CLASS MAIL
	2 = PERIODICAL
	3 = STANDARD MAIL
	4 = PACKAGE SERVICES/PARCEL SELECT/BOUND PRINTED MATTER
4TH CHARACTER	1 = COA (CHANGE OF ADDRESS)
	2 = NIX (NIXIE)
5TH CHARACTER	1 = LTR (LETTER)
	2 = FLT (FLAT)
	3 = PKG (PACKAGE)
	6 = SPS (SHIPPER PAID SERVICES)
6TH CHARACTER	1 = 1ST NTC (FIRST NOTICE)
	2 = 2ND NTC (SECOND NOTICE)
	3 = 3RD+ NTC (THIRD PLUS ADDITIONAL NOTICES)
	4 = ERT (ELECTRONIC RATE)
	6 = SPF POSTAGE & FEES (SHIPPER PAID FORWARDING)
	9 = N/C (NO CHARGE)
