

Facility Access and Shipment Tracking (FAST)

Release 19.0 – External Release Notes – Version 1.4

The FAST 19.0 Release will be deployed on January 8, 2012. Any changes to the Release Notes are outlined in this document and also in Appendix A (when applicable).

Chapter 1 External FAST Users (Customers)	2
I. Online User Interface	2
A. General	2
B. Customer / Supplier Agreements	2
II. FAST Web Services	2
Appendix A – Changes to Version 19.0	3

Chapter 1 External FAST Users (Customers)

I. Online User Interface

A. General

1. Users may add plus or minus 5% of the amount of content associated to the appointment an hour before the scheduled appointment time.
2. Online users will view a hyperlink labeled "New FAST User?" on the FAST Pre-Login landing page. This hyperlink will redirect users to the *Reference Documents* landing page.
3. FAST will display a link on the FAST Welcome page, allowing users to access Postal Explorer for weather related issues (facility closures, alternate hours, etc.).
4. FAST users that are associated to multiple corporations may specify which mailer they would like their content associated to as a content creator.

B. Customer / Supplier Agreements (CSAs)

No CSA enhancements will be included as part of this release.

II. FAST Web Services

No Web Services enhancements will be included as part of this release.

Appendix A – Changes to Version 19.0

The following table represents the changes from the previous version of the Release Notes for the FAST 19.0 Release.

Note: Section numbers referenced below reflect numbers after additions/deletions have been made and may not correspond with the section numbers of the original (or revised) document. Minor grammatical and spelling changes made are not included in the table below.

Section	Change Type	Description
I.A.8	Removal	<p>The FAST Test Environment for Mailers (TEM) will be modified with the following enhancements.</p> <ul style="list-style-type: none"> • Three facilities (one NDC, one SCF, one ASF): Designated as mailer test sites and provide unlimited slots for testing and verification. • Fourth facility: Appointments will be automatically closed within two hours of appointment creation. • Fifth facility: Appointment requests will generate a tracking ID. This tracking ID can be used to verify the MessageResponseRetrieval message type. • Sixth facility: Appointments created will automatically be processed as No Shows for the purpose of testing DeliveryContentCancelCreate messages.
