PostalOne!®

Release 33.0.0.2

The *PostalOne!* Release *33.0.0.2 (January 17, 2013)* deployed to introduce software upgrades to the system, correcting issues that were identified.

These notes provide the contents of the software release.

1. Mailers (External)

1.1. Mail.dat Postage Statement Processing

1.1.1. BMEU Timestamp Error for the Pre-price Change Link

A timestamp error occurs for all domestic single and combined statements that re accessed through the Pre-price Change link and entered by BMEU. This occurs when returning back to the Permit Entry screen and then resubmitting the statement. The Receipt does not display and postage statement is not finalized. **ETR 110433**

1.1.2. By/For Identification for Periodicals mailings with Enclosures

When a job creates duplicate combinations of Postage Statement ID, MPU ID, or SEG ID an error will be thrown disallowing the job to process successfully. The By/For logic is not handling Mail Owner data scenarios correctly. Although the submissions are rejected, this had no impact postage calculations, or data distribution. **ETR 110486**

NOTE: If you have any questions or need any assistance regarding the *PostalOne!®* system please contact our *PostalOne!®* Help Desk at **1 – 800 – 522 – 9085.**
