

PAVE Cycle M Advisory
Additional Entry Option – DMM 707.30
March 2011

M-001

One new option being offered for Cycle M is the availability of the “Additional Entry’ option for Periodicals Mail covered at DMM 707.30. For those developers that would like to have this reflected in the Certified Listing, we will add it to two tests: 201 – Barcoded and Nonbarcoded Letters and 211 – CoSacked Machinable Flats.

In the event that a product supports additional entry but does not support tests 201 or 211, please inform the PAVE team prior to submitting the Cycle M Order Form so that the additional entry option can be assigned to a sortation (test) the software supports.
