

## **National Estuarine and Marine Exotic Species Information System**

The logo for NEMESIS is rendered in large, bold, black letters. Each letter is filled with a detailed, naturalistic image of an estuarine or marine environment, showing green vegetation, water, and possibly small animals, giving the text a textured, three-dimensional appearance.

A demonstration of the new National Estuarine and Marine Exotic Species Information System (NEMESIS) database will be provided. NEMESIS was developed by the Smithsonian Research Environmental Center in partnership with USGS and is a public database compatible with the Non-indigenous Aquatic Species database.
