PIPELINE SAFETY COMPLIANCE

The U.S. Department of Transportation's Transportation Safety Institute is proud to introduce its newest course in Pipeline Safety Compliance. Specially designed for the energy industry, this course will familiarize participants with US DOT pipeline safety regulations and emphasize the practical side of regulatory compliance from the level of regulations to the acute, critical, and serious safety violations. If you are responsible for oversight of pipeline safety and regulatory compliance, this course will be invaluable to your success. Topics include:

- **Testing and Uprating**

- **General Construction Issues**

- **Routine Operations and Maintenance**

- **Pressure Regulation**

- **Corrosion Control**

- **Non-Metallic Pipe**

- **Odorization**

- **Compressor Stations**

- **Regulated Gathering Lines**

- **Control Room Management**

Register at **https://www.tsi.dot.gov/lms/ClassListing.aspx?CourseID=180&AOE=1**.
