INSTRUCTIONS FOR COMPLETION OF STANDARD FORM 135

FOR COMPLETION BY THE TRANSFERRING AGENCY

Items 1, 2, 3 and 5 are self-explanatory. Specific instructions for item 4 are as follows:

101.

Accession Number. A separate accession number is required for each series of records listed on the form. A series consists of records having the same disposal authority and disposal date that are transferred together to the records center. The accession number is entered in three parts, consisting of:

- (a) The NARA record group number assigned to the records of the agency making the transfer;
- (b) The last two digits of the current fiscal year, and
- (c) A four digit sequential number obtained in advance from the records center. (Arrangements may be made with the center to have these numbers assigned by the agency records officer or other official.)
- (d) Volume. Enter the volume in cubic feet of each series of records being transferred.
- (e) Agency Box Numbers. Show the inclusive box numbers for each series of records being transferred. The agency shall number each carton sequentially as follows: 1 of 25, 2 of 25, 3 of 25, etc. (Each new series of records should begin with carton number 1.) To facilitate control of the records and future reference service, the agency also shall mark each container with the assigned accession number prior to shipment.
- (f) Series Description. Describe the records in sufficient detail to allow the records center to check for proper application of the disposal schedule. Inclusive dates of the records should be indicated. Show the organizational component that created the records when it is other than that shown in item 5.
- (g) Restriction. Enter one of the following codes to show a restriction on use of the records. Restrictions other than (or in addition to) security classifications, such as limiting access to certain agency officials, are to be specified by a statement in the Series Description column (1).

Code	Restrictions
1	Automatic classification
2	Use of records classified secret
3	Security clearance restriction
4	Construction security classification
R	Restricted use—witnessed disposal <i>not required</i> (specify in column (1))
W	Restricted use—witnessed disposal <i>required</i> (specify in column (1))
N	No restrictions

(h) Disposal Authority. For each series of records, cite the agency schedule and specific item number authorizing disposal. Cite the NARA disposal job and item number if it has not been incorporated into an updated agency schedule.

(i) Disposal Date. Applying the disposal authority previously cited in column (h), enter the month and year in which the records may be destroyed.

FOR COMPLETION BY THE RECORDS CENTER

Item 4 is self-explanatory. Specific instructions for item 6 are as follows:

101.

- (j) Location. The records center annotates the shelf location of the first carton for each series of records.
- (k) Shelving Plan. The records center enters the appropriate code from Chap. 7-10b, NAR P 1864.1A, to reflect the type of container in which the records are retired.
- (l) Container Type. The records center enters the appropriate code from Chap. 7-10b, NAR P 1864.1A, to reflect the type of container in which the records are retired.
- (m) Automatic Disposal. The records center enters either Y (yes) to indicate automatic disposal applies or N (no) indicating that the agency wishes to receive disposal concurrence notice prior to destruction of the records. Automatic disposal is applied only when previously agreed upon by the agency.

Use Standard Form 135-A, Records Transmittal and Receipt continuation, when additional space is required for listing records data.
