

WORDS TO KNOW ... draw a line from the word to its definition...

- 1. Ecosystem
 - 2. Haze
 - 3. Pollutants
 - 4. Green Energy
 - 5. Energy Efficiency
 - 6. Compact Fluorescents
 - 7. Compost
- a. Actions that minimize the use of electricity or energy resources.
 - b. Substances (smoke) that make the air dirty.
 - c. Dead leaves and other organic matter that decay and turn into good soil. Sometimes worms help this process along.
 - d. Light bulbs that use less energy than incandescent bulbs.
 - e. Air with fine particles in it that make the view and scenery less bright and clear.
 - f. Renewable Energy (power created from wind, the sun, geothermal or hot springs sources) or Alternative Energy (fuel cells).
 - g. A community of organisms (for example, birds, plants, bugs and animals) that interact.

I'm Cool!
 What other activities can you do at work, at school or in your community to help save energy? Find alternatives that are less-polluting and help clean the air! How about when you are camping? Do you make sure any camp fires are cold to the touch after you smother them with water?

"Composting reduces the need to burn and enriches your soil!"

- WORDS TO KNOW ANSWERS**
- 1. = g
 - 2. = e
 - 3. = b
 - 4. = f
 - 5. = a
 - 6. = d
 - 7. = c
