About TerraNova (/datacenter/assessment.cfm?cld=used#tn1)

Year	Grade	Number of Students	Reading	Language Arts	Math	Science	Social Studies
2010	3	23	53 %ile	60 %ile	56 %ile	79 %ile	61 %ile
2010	4	28	58 %ile	50 %ile	54 %ile	47 %ile	59 %ile
2010	5	19	70 %ile	61 %ile	75 %ile	70 %ile	58 %ile
2010	6	27	73 %ile	71 %ile	76 %ile	73 %ile	85 %ile

The TerraNova, Third Edition, Multiple Assessments (TerraNova 3) is the latest version of the norm-referenced, standardized achievement test developed by CTB/McGraw-Hill. The 2009 test year was the first administration of the test's new items which had been normed to a very inclusive national sample in 2007. Therefore results cannot be validly compared to the standardized test results prior to 2009, which serves as the baseline for comparison with results from future test administrations.

All TerraNova scores are reported in percentiles - not percentages. A percentile is a measure of comparison that ranks one score against the scores of all other test takers. For example, a 75 percentile score means that 75 percent of all other test takers nationally scored below and 25 percent scored above that score. The national average is always the 50%ile.

Note: Comparison of district data from year to year may not be valid due to redistricting of schools.
