Free Wi-Fi @ American Library for YOU!

Americal Library, Kolkata has now introduced Wi-Fi networking technology, i.e. **wireless computing and broadband internet access** service. This value-added facility is available to all our patrons and members - both individual and institutional, during library hours on all working days, absolutely **free of charge**. Proudly, ours is the **first Wi-Fi-enabled public library** in Kolkata.

Using radio technologies, Wi-Fi network provides **secure, reliable and seamless** internet connectivity. It eliminates complexities as in conventional wired network connection, and makes access to internet-based information services **easier, faster, and friendlier**. This expanded wireless service, offered free to our members, is part of our constant endeavour to offer the best services to our members, including access to the latest information technologies.

To avail free broadband internet services <u>within range of Library's Wi-Fi network area</u>, members of your institution may please bring their **laptop** (equipped <u>with Wi-Fi network card / adapter, or built-in Wi-Fi capability</u>), on their visits to the Library. As with current protocol for using Library's computers, internet users have to <u>register at the Information Desk </u>to obtain a log-in ID and password.

Kindly note that:

for proprietary security reasons, subscribed <u>online databases are to be accessed using library computers </u>as usual, and
once your laptop gets connected to the Wi-Fi network, the Library will not accept any responsibility for safety and configurations of your device.
