
xTrain Version 3.3.2.3 Release Notes

Fixes:

Trainee Information Now Complete on PDFs of 2271 Appointment Form

Previously, some Appointment Forms (2271s) submitted to the Agency appeared to be missing trainee information. This problem occurred when trainees completed or updated information in their personal profiles after the Program Director/Principal Investigator (PD/PI) initiated the appointment or reappointment. Though the trainee's personal information was always captured in the Agency's database, it was not visible to Agency staff reviewing the appointment information on the 2271 PDF.

Resolution

Now when the Appointment Form (2271) is submitted to the Agency by the PD/PI, the form displays all the relevant information from the trainee's personal profile.
