

# Million Veteran Program: A Partnership with Veterans

Discovery ↔ Innovation ↔ Advancement

## MVP is Now ENROLLING

### What is the Million Veteran Program (MVP)?

MVP is a national, voluntary research program conducted by the Department of Veterans Affairs, Office of Research & Development, that collects genetic and health information to help lead to new ways of preventing and treating illness. MVP will provide a better understanding of how genes affect health and illness, with the goal of improving health care for Veterans.

### Who can participate?

Any Veteran enrolled to receive care in the VA healthcare system can participate.

### How do I enroll?

If you are interested in participating today, please visit your VA medical center information desk for directions to the MVP clinic located within your center. You can also call the MVP Information Center at the toll-free number below to schedule an appointment.

### Participation involves:

- Filling out surveys through the mail
- Completing a one-time, approximately 20 minute, study visit to provide a blood sample for genetic analysis at a VA Medical Center
- Permitting authorized MVP staff to access information in your medical record on an ongoing basis
- Agreeing to future MVP contact

Our highest priority is protecting your right to privacy. MVP has extensive safeguards in place to keep your personal information secure and confidential.

Your decision to participate in MVP will not affect access to health care or benefits.
