Project Description

The Teton Canyon Road is located approximately five miles north of Choteau, MT off of Highway 89. The road heads west to access Eureka Reservoir, Lewis and Clark National Forest, and Teton Pass Ski Resort. Work under this project consists of repaving the first 18 miles to a consistent width, flattening side slopes to increase safety, replacing culverts, and replacing and updating road signs and pavement striping. The scheduled completion date for the project is November 15, 2011.

Road Surface conditions

The existing pavement is still currently in place. There are some isolated spots of loose gravel, please use caution.

Current and Upcoming Work

Contractor operations currently consist of surveying, installing erosion control devices, clearing and grubbing, building up slopes on both sides of the roadway, and stripping the material source. The crusher is scheduled to move in to the Pebbles Pit sometime the week of Oct. 4 through Oct. 8. Culvert installation is anticipated to begin that week as well.

Traffic Delays

Please expect 15-30 minute delays, Monday through Friday, 7am to 6pm. There may be multiple flagger stations and pilot car operations. Please use caution and respect when passing laborers and machines working in the road and off the shoulder.

Area cleared and grubbed on the north side of the road.

Pit clearing and embankment material mining at the Pebbles Pit.

Building up and shaping new side slopes.
