**Lodging rates increased.** After four years without a rate increase, Air Force lodging rates have gone up, Air Force Personnel Center Officials said today. The increase is necessary to ensure Air Force Lodging rates cover current operating and capital improvement costs, said Maj. Gen. A.J. Stewart, AFPC commander. The \$39 nightly room rate for a visiting quarters room is now \$53.25 and DV suites have gone from \$48.25 to \$66.75. Increased rates will fund costs for operations, room renovations and construction, Stewart said. As the Air Force works to improve business processes, implement efficiencies and maintain lodging operations in a constrained budget environment, other adjustments may be necessary, according to Col. Thomas Joyce, director, AFPC Services Directorate. "We are committed to keeping room rates as low as possible while providing clean, comfortable, quality facilities," he said. "This is part of our commitment to caring for Airmen and we take that obligation very seriously. However, we must be real-

istic as well." Even with the rate increase, Air Force rates are lower than comparable commercial rates outside Air Force installations, the director said. Coupled with quality service, clean facilities and reasonably priced room rates, Air Force lodging facilities are still a great choice, whether on temporary duty orders, retired and traveling, or just passing through.

### How Recycled Papers Help the Environment

The average American uses more than 655 pounds of paper every year. But you can help preserve trees and other natural resources by using 30%, 50% and 100% recycled papers. They're eco-friendly and office-friendly, with quality equal to non-recycled paper. Here's how our recycled papers help the environment when compared to non-recycled papers:

30% recycled paper	50% recycled paper	100% recycled paper
30% fewer trees used	50% fewer trees used	100% fewer trees used
13% less energy used	19% less energy used	42% less energy used
11% fewer greenhouse gas emissions	19% fewer greenhouse gas emissions	37% fewer greenhouse gas emissions
14% less water used	23% less water used	46% less water used
