Mr. Edgar D. Bailey, C.H.P., Chief
Radiologic Health Branch
Division of Food, Drug & Radiation Safety
California Department of Health Services
P. O. Box 942732
Sacramento, CA 94234-7320

Dear Mr. Bailey:

We have reviewed the California license conditions that were submitted to meet the Generally Licensed Device (GL) reporting requirements of 10 CFR 32.52 (a) and (b). Our review and comments are in response to the State's request for Nuclear Regulatory Commission (NRC) evaluation of the license conditions that incorporated the amendment identified on the State's Regulation Status Data Sheet (SRS). These license conditions were reviewed by comparison to the equivalent NRC rules in 10 CFR 32.52 and the requirements of the one amendment identified in the enclosed SRS. We discussed our review of the license condition with you on February 25, 2004.

As a result of our review, we have no comments, however we would like to ensure that it is understood that the remaining portion of the GL Rule was due for Agreement State adoption on February 16, 2004. Please note that we have limited our review to the California license conditions required for compatibility and/or health and safety. We have determined that the California license conditions, as adopted, meet the compatibility and health and safety categories established in the Office of State and Tribal Programs (STP) Procedure [SA-200](#).

The SRS Data Sheet summarizes our knowledge of the status of other California regulations or license conditions, as indicated. Please let us know if you note any inaccuracies, or have any comments on the information contained in the SRS Data Sheet. This letter, including the SRS Data Sheet, is posted on the STP website: <http://www.hsrdr.gov/nrc/rulemaking.htm>.

If you have any questions regarding the comments, the compatibility and health and safety categories, or any of the NRC regulations used in the review, please contact me, or James Myers of my staff at (301)415-2328 or JHM@NRC.GOV.

Sincerely,

IRA By K.N. Schneider for
