William A. Passetti, Chief
Bureau of Radiation Control
Department of Health
4052 Bald Cypress Way
Tallahassee, FL 32399-1741

Dear Mr. Passetti:

We have reviewed the final revisions to Florida's Control of Radiation Hazard Regulations, Chapter 64E-5, Florida Administrative Code (FAC), as received by our office on February 21, 2007. These regulations were reviewed by comparison to the equivalent Nuclear Regulatory Commission (NRC) rules in 10 CFR Parts 20, 30, 31, 32, 34, 36, 39, 40, 70, and 71 and the requirements of the ten amendments identified in the enclosed State Regulation Status (SRS) Data Sheet. We discussed our review of the regulations with Michael Stephens on April 19, 2007.

As noted in All Agreement States letter STP-05-072, dated September 28, 2005, NRC staff will continue to hold in abeyance any determination on those rules and compatibility of 10 CFR 31.5 and 31.6, if the Agreement State has the essential elements of the NRC's rule and is more restrictive than the NRC's rule.

As a result of our review against the GL Device Rule Compatibility Category B designation, we have 14 comments as listed in the enclosure. Comments 11, 16, and 17 indicate that the State's regulations are more restrictive than the NRC's regulations, and there is no corrective action required for these comments at this time. However, Comments 9, 10, 12, 13, 14, 15, 18, 19, 20, 21, and 22 indicate that the State's regulations are less restrictive than the NRC's regulations, and they need to be addressed in the State's future rule making process.

As a result of the remainder of our review, we have 39 comments that have been identified in the enclosure. Please note that we have limited our review to regulations required for compatibility and/or health and safety. We have determined that if these regulations are revised, incorporating our comments and without other significant change, they would meet the compatibility and health and safety categories established in the Office of Federal and State Materials and Environmental Management Programs (FSME) Procedure [SA-200](#)

We request that when you revise your regulations to address our comments, a copy of the "as published" regulations be provided to us for review. As requested in FSME Procedure [SA-201](#), "Review of State Regulatory Requirements," please highlight the location of any changes made by Florida, in response to our comments, and provide a copy to Division of Materials Safety and State Agreements, Office of Federal and State Materials and Environmental Management Programs (FSME) (see letter [FSME 06-94](#) dated October 6, 2006 for further information).

The SRS Data Sheet summarizes our knowledge of the status of other Florida regulations, as indicated. Please let us know if you note any inaccuracies, or have any comments on the

COMPATIBILITY COMMENTS ON *FLORIDA* FINAL REGULATIONS

STATE SECTION		NRC SECTION	RATS ID	CATEGORY	SUBJECT and COMMENTS
1	64E-5.101(122)	34.3	1997-5	B	<p>Definitions</p> <p>Florida's definition of Radiographic exposure is not essentially identical to the NRC's definition. Florida omits the phrase "fastened or contained therein, in which the sealed source or shielding thereof may be moved, or otherwise changes from a shielded position to an unshielded position."</p> <p>Florida needs to add the above phrase to its definition of Radiographic exposure to meet the Compatibility Category B designation assigned to 10 CFR 34.3 definition of Radiographic exposure.</p>
2	64E-5.101(133)	34.3	1997-5	A	<p>Definitions</p> <p>Florida's definition differs from NRC's definition for "sealed source." Florida's definition includes "<i>or matrix</i>" after the word capsule.</p> <p>Florida needs to remove the words "or matrix" from the definition for sealed source to meet the Compatibility Category A designation assigned to 10 CFR 34.3 Definition Sealed source.</p>
3	64E-5.101(154)	34.3	1997-5	B	<p>Definitions</p> <p>Florida's definition is more restrictive than NRC's definition for "temporary jobsite." Florida's definition specifies that the site supports a "single job lasting for less than 2 years." NRC's definition does not quantify a time frame.</p> <p>Florida needs to remove the requirement for less than 2 years to meet the Compatibility Category B designation assigned to 10 CFR 34.3 Definition Temporary jobsite.</p>
4	64E-5.430	34.31	1997-5	C	<p>Inspection and maintenance of radiographic exposure devices, transport and storage containers, associated equipment, source changers, and survey instruments</p> <p>Florida omits the requirement for "written procedures" as stated in 34.31(b).</p> <p>Florida needs to add this requirement in order to meet the Compatibility Category B designation assigned to 10 CFR 34.31.</p>

STATE SECTION		NRC SECTION	RATS ID	CATEGORY	SUBJECT and COMMENTS
5	64E-5.440(2)(b) and (d)	34.79	1997-5	C	<p>Records of training and certification</p> <p>Florida's reference to the provision that requires radiographer certification documents is incorrect. The reference lists 64E-5.434(2)(e)-(f). The correct reference should be 64E-5.434(2)(d).</p> <p>Florida needs to make change this reference in order to meet the Compatibility Category C designation assigned to 10 CFR 34.79.</p>
6	64E-5.441 & Section II Subpart D	34.101	1997-5	C	<p>Notifications</p> <p>NRC's 10 CFR 34.101 states, "Any licensee conducting radiographic operations or storing radioactive material at any location not listed on the license for a period in excess of 180 days in a calendar year, shall notify the appropriate NRC regional office listed in Sec. 30.6(a)(2) of this chapter prior to exceeding the 180 days." Florida's regulations state in excess of 365 days make their regulation less restrictive.</p> <p>Florida needs to change its Reciprocity rule to match the NRC's time limit of 180 days to meet the Compatibility Category C designation assigned to section 10 CFR 34.101.</p>
7	64E-5.319	20.1703	1999-3	H&S	<p>Use of individual respiratory protection equipment</p> <p>In Florida regulation 64E05.319, Florida takes the second half of the phrase "cubic meter of air or less" from 64E-5.319(g)(2) and attaches it to 64E-5.319(g)(1).</p> <p>Florida needs to delete the phrase "cubic meter of air or less" from 64 E5-319(g)(1) and add the phrase to (g)(2) to meet the Compatibility Category H&S designation assigned to 10 CFR 20.1703.</p>
8	64E-5.11072	39.53	2000-1	C	<p>Energy compensation source</p> <p>Florida lists 64E-5.1107 as its equivalent to 10 CFR 39.57, when it should list 64E-5.1105 instead.</p> <p>Florida needs to have the equivalent reference to 10 CFR 39.55 (64E-5.1105) and delete its incorrect reference (64E-5.1107) to meet the Compatibility Category C designation assigned to section 10 CFR 39.53.</p>

STATE SECTION		NRC SECTION	RATS ID	CATEGORY	SUBJECT and COMMENTS
9	64E-5.206(4) (b)1 and (b)2	31.5(b)	2001-1	B	<p>Certain detecting, measuring, gauging, or controlling devices and certain devices for producing light or an ionized atmosphere</p> <p>Florida omitted “or initially transferred” in 64E-5.206(4) (b)1.</p> <p>Florida needs to add the phrase “or initially transferred” to 64E-5.206(4)(b)(1) to meet the Compatibility Category B designation assigned to 10 CFR 31.5(b).</p>
10	64E-5.206(4) (c)(4)	31.5(c)(4)	2001-1	B	<p>Certain detecting, measuring, gauging, or controlling devices and certain devices for producing light or an ionized atmosphere</p> <p>64E-5.206(4)(c)(4) only requires 1 year record keeping for leak testing and 2 years for other testing/servicing. 31.5(c)(4) requires 3 years for all testing/servicing.</p> <p>Florida needs to have the equivalent record keeping requirements in 64E-5.206(4)(c)(4) to meet the Compatibility Category B designation assigned to section 10 CFR 31.5(c)(4).</p>
11	64E-5.206(4) (c)(5)	31.5(c)(5)	2001-1	B	<p>Certain detecting, measuring, gauging, or controlling devices and certain devices for producing light or an ionized atmosphere</p> <p>64E-5.206(4)(c)(5) does not indicate the amount of removable contamination (0.005 microcurie) as stated under 31.5(c)(5) (“...in the case of detection of 0.005 microcurie or more removable radioactive material or failure of ...”). Having no value listed makes Florida’s regulation more restrictive.</p> <p>Florida needs to add the amount of removable contamination to 64E-5.206(4)(c)(5) to meet the Compatibility Category B designation of 10 CFR 31.5(c)(5).</p> <p>As noted in the September 28, 2005 All Agreement States Letter STP-05-072, the determination on this provision will be held in abeyance until such time that the NRC completes its review and response to the Organization of Agreement State on compatibility changes for the GL rule.</p>

12	N/A	31.5(c)(7)	2001-1	B	<p>Certain detecting, measuring, gauging, or controlling devices and certain devices for producing light or an ionized atmosphere</p> <p>Florida regulations omit a section equivalent to 10 CFR 31.5(c)(7).</p> <p>Although Florida does not have the authority to authorize export of any radioactive materials as per the Agreement between the state and the NRC, Florida still needs to add this section to the regulations to meet the Compatibility Category B designation assigned to section 31.5(c)(7).</p>
13	64E-5.206(4)(c)(7), (8), and (10)	31.5(c)(8)	2001-1	B	<p>Certain detecting, measuring, gauging, or controlling devices and certain devices for producing light or an ionized atmosphere</p> <p>Florida omitted reference to 31.5(c)(7) in 64E-5.206(4)(c)(7).</p> <p>Florida needs to add the reference to 31.5(c)(7) in 64E-5.206(4)(c)(7) to meet the Compatibility Category B designation assigned to section 31.5(c)(8).</p>
14	64E-5.206(4)(c)(7) and (8)	31.5(c)(9)(i)	2001-1	B	<p>Certain detecting, measuring, gauging, or controlling devices and certain devices for producing light or an ionized atmosphere</p> <p>The content of Florida regulations cited under 64E-5.206(4)(c)(8), specifically 64E-5.328 and 64E-5.329 do not match the regulations cited under 31.5(c)(9), specifically 20.2201 and 20.2202. 20.2201 and 20.2202, are equivalent with Florida regulations 64E-5.343 and 5.344.</p> <p>Florida needs to reference the correct regulations to match the regulations cited under 31.5(c)(9) to meet the Compatibility Category B designation assigned to section 31.5(c)(9)(i).</p>
15	N/A	31.5(c)(11)	2001-1	B	<p>Certain detecting, measuring, gauging, or controlling devices and certain devices for producing light or an ionized atmosphere</p> <p>Florida omitted this section.</p> <p>Florida needs to incorporate this section into its regulations to meet the Compatibility Category B designation assigned to section 31.5(c)(11).</p>

Under 31.5(c)(13)(i), only those devices containing certain isotopes above a certain threshold activity level need to be registered. By not listing the specific isotopes and their threshold activities Florida's regulation is more restrictive.</p> <p>Florida needs to add the isotopes and their threshold activities indicated in 31.5(c)(13)(i) to meet the Compatibility Category B designation assigned to section 31.5(c)(13).</p> <p>As noted in the September 28, 2005 All Agreement States Letter STP-05-072, the determination on this provision will be held in abeyance until such time that the NRC completes its review and response to the Organization of Agreement State on compatibility changes for the GL rule.</p>

Using "or" changes the meaning of the statement and makes Florida's regulation more restrictive.</p> <p>Florida needs to change "or" to "of" to meet the Compatibility Category B designation assigned to section 31.5(c)(14).</p> <p>As noted in the September 28, 2005 All Agreement States Letter STP-05-072, the determination on this provision will be held in abeyance until such time that the NRC completes its review and response to the Organization of Agreement State on compatibility changes for the GL rule.</p>
