Dear Mr. Flater:

We have reviewed the proposed changes to the Iowa regulations, Amendment 641, received by our office on December 20, 2005. These regulations were reviewed by comparison to the equivalent Nuclear Regulatory Commission (NRC) rules in 10 CFR Parts 30, 35, 40, 70 and NRC Order EA-05-090 Increased Controls Risk-Significant Radioactive Sources. We discussed our review of the regulations with Dan McGhee on December 22, 2005 and with you on January 3, 2006.

As a result of our review, we have no comments. Please note that we have limited our review to regulations required for compatibility and/or health and safety. Under our current procedure, a finding that the Iowa regulations meet the compatibility and health and safety categories of the equivalent NRC regulation may only be made based on a review of the final Iowa regulations. However, we have determined that if your proposed regulations were adopted, without significant change, they would meet the compatibility and health and safety categories established in the Office of State and Tribal Programs (STP) Procedure [SA-200](#).

We request that when the proposed regulations are adopted and published as final regulations, a copy of the "as published" regulations be provided to us for review. As requested in STP Procedure [SA-201](#), "Review of State Regulatory Requirements," please highlight the final changes and provide a copy to STP.

The SRS Data Sheet summarizes our knowledge of the status of other Iowa regulations, as indicated. Please let us know if you note any inaccuracies, or have any comments on the information contained in the SRS Data Sheet. This letter, including the SRS Data Sheet, is posted on the STP website: <http://www.hsrdrn.gov/nrc/rulemaking.htm>.

If you have any questions regarding the comments, the compatibility and health and safety categories, or any of the NRC regulations used in the review, please contact me, or Lloyd Bolling at 301-415-2327 or by e-mail at LAB@nrc.gov].

Sincerely,
