Dear Mr. Klinger:

We have reviewed the Illinois license conditions that were submitted to meet the Generally Licenced Device (GL) reporting requirements of 10 CFR 32.52 (a) and (b). Our review and comments are in response to the State's request for Nuclear Regulatory Commission (NRC) evaluation of the license conditions that incorporated the amendment identified on the States Regulation Status Data Sheet (SRS). These license conditions were reviewed by comparison to the equivalent NRC rules in 10 CFR 32.52 and the requirements of the one amendment identified in the enclosed SRS. We discussed our review of the regulations with Joe Klinger on March 8, 2004.

As a result of our review, we have no comments, however we would like to ensure that it is understood that the remaining portion of the GL Rule was due for Agreement State adoption on February 16, 2004. Please note that we have limited our review to the Illinois license conditions required for compatibility and/or health and safety. We have determined that the Illinois license conditions, as adopted, meet the compatibility and health and safety categories established in the Office of State and Tribal Programs (STP) Procedure [SA-200](#).

The SRS Data Sheet summarizes our knowledge of the status of other Illinois regulations and/or legally binding requirements, as indicated. Please let us know if you note any inaccuracies, or have any comments on the information contained in the SRS Data Sheet. This letter, including the SRS Data Sheet, is posted on the STP website: <http://www.hrsd.ornl.gov/nrc/rulemaking.htm>.

If you have any questions regarding the comments, the compatibility and health and safety categories, or any of the NRC regulations used in the review, please contact me, or John Zabko of my staff at (301)415-2308 or JGZ@NRC.GOV.

Sincerely,

IRA By K.N. Schneider Forl
