Dear Mr. O'Dowd:

We have reviewed your letter dated March 2, 2005 requesting Nuclear Regulatory Commission (NRC) evaluation of a license condition relative to a regulation amendment for the "Resolution of Dual Regulation of Airborne Effluents of Radioactive Materials; Clean Air Act." The license condition was reviewed by comparison to the equivalent NRC regulations in 10 CFR 20.1003, 20.1101 and 20.2203. We discussed our review of the license condition with you on March 21, 2005.

As a result of our review, we have no comments. Since this regulation is incorporated by the license condition into active licenses, we have concluded that the license condition would meet the compatibility and health and safety categories established in the Office of State and Tribal Programs (STP) Procedure [SA-200](#).

The State Regulation Status (SRS) Data Sheet summarizes our knowledge of the status of other New Hampshire regulations, as indicated. Please let us know if you note any inaccuracies, or have any comments on the information contained in the SRS Data Sheet. This letter, including the SRS Data Sheet, is posted on the STP website: <http://www.hsr.doh.nh.gov/nrc/rulemaking.htm>.

If you have any questions regarding the review result, the compatibility and health and safety categories, or any of the NRC regulations used in the review, please contact me, or Kevin Hsueh at 301-415-2598 or by e-mail at KPH@NRC.GOV.

Sincerely,

IRA By M. Shaffer Forl
