Dear Mr. Parker:

We have reviewed the New Mexico license conditions that were submitted to address the Increased Controls and the Order Imposing Fingerprinting and Criminal History Records Check Requirements for Unescorted Access to Certain Radioactive Material received by our office on March 4, 2008. These license conditions were reviewed by comparison to the equivalent NRC Orders EA-05-090, EA-07-305 and the requirements of the two amendments identified in the enclosed State's Regulation Status (SRS) Data Sheet. We discussed our review of the license condition with you on March 27, 2008.

As a result of our review, we have no comments. We have determined that the New Mexico license conditions meet the compatibility and health and safety categories established in the Office of Federal and State Materials and Environmental Management Programs (FSME) Procedure [SA-200](#).

The SRS Data Sheet summarizes our knowledge of the status of other New Mexico regulations and legally binding requirements, as indicated. Please let us know if you note any inaccuracies, or have any comments on the information contained in the SRS Data Sheet. This letter, including the SRS Data Sheet, is posted on the FSME website:
<http://www.hsrdrn.gov/nrc/rulemaking.htm>.

If you have any questions regarding the review results, the compatibility and health and safety categories, or any of the NRC regulations used in the review, please contact Kathleen Schneider, State Regulation Review Coordinator at (301) 415-2320 (email: kxs@nrc.gov) or Monica Orendi at (301) 415-3938 (email: mlo1@nrc.gov).
